MANNHEMII

SVMTIBVS AVCTORIS

MDCCCXVII.

PRAEFATIO.

Prodit tandem, quod ad tachygraphiae Romanae cognitionem maxime facit, Lexicon Tironianum, opus arduum et impeditum, diu multumque inter doctrinarum subsidia desideratum (§. 10. 82). Cujus quidem ratio quo melius perspiciatur, nonnulla praemonenda esse videntur, primum de fonte, ex quo potissimum hausi; deinde de difficultatibus, quae in construendo hoc opere superandae erant; denique de commodiore ejus usu.

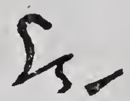

Ut bonum aptumque sit Lexicon, tria inprimis requiruntur: verborum summa copia, ordo eorum accommodatus, et vera atque exacta interpretatio. *Illam* uberrimam nobis suppeditavit notarum Collectio a Grutero edita (§. 67 seq.); in *his* multa desideranda reliquit Vir doctus. Quandoquidem notae haud ita sunt digestae, ut a quaerentibus facile reperiri possint; neque ita digeri potuerunt omni figurarum *analysi* destitutae. Ab *hac* igitur, tamquam fundamento superstruendi operis, mihi incipiendum esse, continuo intellexi, ex quo ad condendum Lexicon Tironianum me accinxi, multamque curam et operam in eam contuli. Quo factum est, ut,

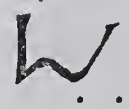

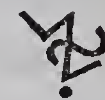

subtiliorem Tironianae scripturae notitiam assecutus, notarum explicationes nonnumquam invenirem veriores iis, quas Gruterus sua in Collectione vulgavit, magna ex parte miserrime corruptas.

Quam quidem subtiliorem notionem quum non haberet Gruterus, studiis altioribus et ingenio suo dignioribus ab ea sibi comparanda avocatus; quod vera notarum lectio saepius eum fugit, id ei, ut par est, vitio non verto: id vitio verto, quod explicationes earum utique ineptas, et verba notis adscripta, quae nihil omnino significant, cum ceteris edidit, ne ullis quidem annotationibus adspersis, quibus verior sententia perciperetur. Quis enim, quaeso, intelligat, et pro interpretamentis sibi venditari non indignetur, quae exempli causa notavi: *Quindecim viri satisfaciendi*, *Septemviri aepulorum*, *Anticialis*, *Clematur*, *Pantecupium*, *Gaunapum*, *Amitextum*, *Apostfragisma*, *Palachina*, *Hierohaerix*, *Scinobatra*, *Pitauritanus*, *Colobatra*, *Pantadium*, *Pentatheneum*, *Pentarici*, *Platocerus*, *Pethepus*, *Cerdopetephus*, *Scerbilita*, *Sifarus*, *Petrabulum*, *Petrestis*, *Chedagra*, *Iptericus*, *Honoradia*, *Memmatripus*, *Intestigo*, *Ecina*, *Botagra*, *Psicolutra*, *Praesterium*, *Apotesterium*, *Tyrticeum*, *Nyrticeum*, innumeraque alia, quae piget taedetque prosequi omnia.

O Grutere, Grutere, adeone indotatam e manu paterna adoptivam filiam mittere te decebat? adeone sordidam et vitiis squalentem exponere? Quae jam plus quam ducentos explevit misera an-

nos, neque grata acceptaque ulli adhuc fuit, neque umquam fuisset, nisi pro facultatum mearum tenuitate ei dotem, si non dignam, at aliquam, dedissem. Ejus enim, quod profero, Lexici Tironiani possessores habebunt ei insertam etiam illam Collectionem, sed multo meliori forma dotatam: quippe in qua non solum notarum figuras ex literarum, quibus constant, serie disposui; sed in adscriptis etiam interpretationibus errores a negligentia et ignorantia tum librariorum, tum ipsorum Collectionis auctorum, profectos, quoad fieri potuit, correxi, haud quidem expuncta mendosa lectione, sed subjuncta tantummodo veriori interpretatione. Neque enim ego is sum, qui critica audacia novam veteri lectionem substituere, meamque opinionem aliis obtrudere velim, sed liberum, ut decet, suum cuique judicium relinquo.

Difficillimam esse notarum analysin, equidem compertum habeo, neque dubito fore plerosque, qui in mea figurarum interpretatione subinde haereant, eamque vix intelligant, nisi diversas literarum formas probe didicerint, atque in derivatis primitivas, in compositis partes, quibus constant, respexerint. Erunt, ut his utar exemplis, qui mirentur, me in eruendis characteribus notae  qua *Consternit* (p. 73) significatur, literas invenire CN, quum posterior figura speciem potius habeat τοῦ S. Sed derivata illa nota comparata cum primitiva  *Sternit* (p. 351), videbunt, hanc nequaquam admittere interpretationem, qua duo S, quae in verbo *Sternit* ne cogitari quidem possunt (§. 122. 172), in nota

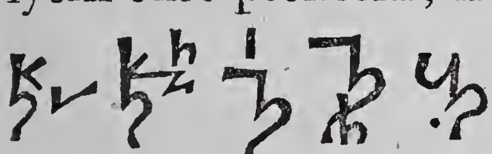

inesse statuatur. Mirabuntur fortasse iidem literarum formas, quas habet nota  *Venit in mentem* (399); sed mirari desinent, inspectis compositae hujus notae partibus, quae sunt nota  *Venit* (389), et nota  *In mente* (184). Accidit etiam, ut in notarum figuris conspiciatur litera, cui in verbo, quod nota significatur, nullus est locus; et vicissim, ut vel prima verbi litera a Tironiana nota prorsus absit. Sic literam H, quae in nota  apparet, quam *Almon* (158) interpretamur, in hoc nomine haud legimus. At vero legimus in nomine *Haedus*, cujus nota  non nisi literas ED comprehendit (p. 117). Scilicet ex diversa scribendi ratione id natum esse discrimen, nemo non intelligit. Quae quum praemoneo, id ago, ut ab incauta ad reprehendendum proclivitate censores avertam, omnes admonens lectores, in hoc scriptionis genere nondum satis versatos, a quolibet temerario abstineant judicio.

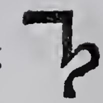

Sunt vero notae, in quibus dissolvendis diu anceps et incertus haesitavi: sunt etiam aliae, in quarum ratione explicanda adhuc mihi ipsi diffido. Haud igitur sine causa primum hujus operis volumen, licet abhinc annos prope quinque typis jam excusum, sollicitus continui, cavique ne vulgaretur, altero nondum expolito. Etenim una opera, quantumvis gnava et pertinaci, non ita perfici potuisse difficillimum opus, ut ab omnibus erroribus immune esset, facile mihi persuasi, praesertim quum in hac palaeographiae parte peritiorem non habuissem, quem consulerem, ac ne

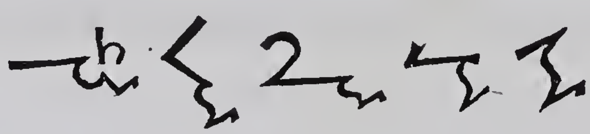

ullum quidem reperissem, qui saltim legere Tironianas notas posset. Quotquot igitur errores hoc temporis intervallo animadverti, eos neutiquam dissimulatos in altera cumprimis Lexici parte, emendare studui, haud veritus, ne offenderentur eruditi detectis

— — maculis, quas aut incuria fudit,
Aut humana parum cavit natura. —

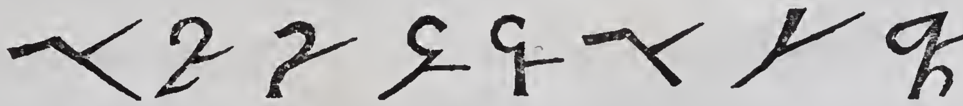

Quae autem ad generaliora in demonstranda analyseos difficultate pertinent, ea quidam hoc loco non praetermittenda esse videntur.

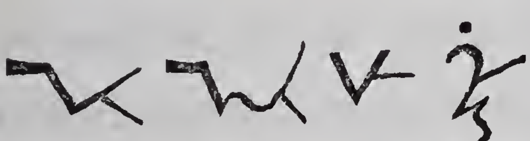

Alphabetum Tironianum quum exhiberem (§. 143), negavi literam Y, quippe Latio ignotam, in Tironianis notis deprehendi. Attamen, licet in vocabulis, quae origine sunt Latina, vix reperiatur, reperitur in peregrinis, civitate donatis. Quae quidem quum haud sint frequentia; mirum non est, me, primam notarum analysin suscipientem, non invenisse hanc literam. Jam vero ex notis  *Lyciae, Lycaonia, Tyrii, Tyrus capta, Zelotypus* (p. 216. 387. 409) eam restituens, facilius etiam demonstrabo, quo modo a ceteris, quae ei sunt adnexae, divulsa ejus figura  ex properante tachygraphorum calamo effluxerit. Capitalis enim forma Y, duabus partibus V et I constans, hanc illi, quasi caudam, adnecti patitur. Quam quidem formam quo citius uno calami ductu absolverent tachygraphi, caudam illam a suo loco paulum amoverunt, eodem fere modo, quo ejus locum mutatum esse videmus in Germanorum 𝔜. Proinde quae in capitalibus

literis TV, ut fiat TY, est mutatio, eadem est in notis  et . Neque in levi tantum vel vana conjectura niti hujus literae interpretationem, sed certam eam esse ac manifestam; notarum, quas exhibui, analysis probat, nullo quidem modo processura, hac litera neglecta.

Singulare etiam studium operamque diu frustra posui in solvenda forma, qua exprimitur syllaba *ur:* quae quum in pluribus conspiceretur notis, harum tandem omnium similitudines comparatae viam ostenderunt satis aptam, qua ejus procederet analysis. Sunt autem  *Jactura* (p. 196) *Captura* (202) *Conjectura* (90) *Penuria* (301) *Pauper* (301). Extrema omnium harum notarum pars est R litera, satis frequens in vocabulis, syllaba *er* terminatis; id quod notae docent  *Ter* (p. 384) *Inter* (189) *Praeter* (292) *Propter* (292). U vero praecedens adeo comparet distortum, ut speciem potius habeat literae S, ideoque vix dignoscatur, nisi ab iis, qui, literarum, Merovingicorum regum temporibus, et paulo post, usitatarum, haud ignari, illius formae meminerint, quae ex  caudato, negligentius picto , sensim emanavit. Qua quidem re perpensa, errorem deprehendi, in quem abreptus sum, notam explicans, qua *Pauper* notatur (§. 379), depravata apud Carpentierum (Tab. II) forma insuper impeditus, quo minus veram scriptionis rationem intelligerem.

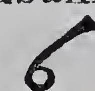

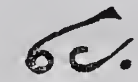

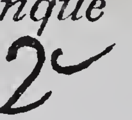

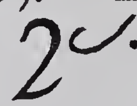

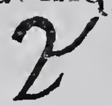

De alio, quod ex linguarum confusione oritur, impedimento, necessarioque Graecae linguae subsidio in explicandis notis, superius (§. 192) dixi. Jam vero Lexicon aptiora suppeditat exempla in notis Ἄκτιον (p. 11) Ἑξήρης (133) Ἡπτήρης (161) Χαμαίϛρωτον (199) Μονόβιβλα (222) Μαμμόθρεπτος (229) Παλαιϛρίτης (267) Πίθηκος (272) aliisque, quibus vere Graeca significari nomina, nemo in dubium vocabit.

Quae quum de analyseos difficultate non nisi speciminis loco dixi, tantum abest, ut omnia protulerim dubia, ut multa etiam supersint a felicioribus olim explicanda. Atque ne desint exempla, in quibus studiosi possint judicii acumen exercere, ablegatos eos velim ad notas, quae in Gruteriana Collectione (p. 81) cum particula *Nihil* compositae sunt; vel ad eas, quae ex verbo *Prosum* (p. 7) originem traxerunt, ceterasque, quarum characteres, ob brevitatis studium, ita sunt sensim deformati, ut vix discerni queant. Ejusmodi notas in partes, quibus constant, dissolvere, perardua res est, quam nemo fere umquam perficiet, nisi cui contigerit, ut primam obscurorum characterum formam feliciter eruat. Exemplo sint notae 

 *Quicunque* (Lex. p. 309) *Quaecunque* (310) *Quocunque* (310) *Cujuscunque, Cuicunque* (65) *Quemcunque* (309) *Quamcunque* (310) *Quacunque* (305) *Quibuscunque* (310) *Quibuscunque rebus* (309) *Utcunque* (407) *Quotiescunque* (309).

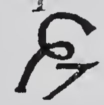

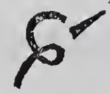

Harum omnium prima pars facile adgnoscitur ex simplicibus notis

Quis (302) *Quae* (310) *Quo* (304) *Cujus* (65) *Cui* (64) *Quem* (302) *Quam* (304) *Qua* (304) *Quibus* (309) *Quibus rebus* (308) *Ut* 389) *Quoties* (309); qui vero fiat ut per adjectam tenuem illam lineam his addatur *cunque,* haud quisquam intelliget, nisi cum ea comparaverit notam  *Cum* (52), in eandem tenuem lineam exeuntem; cui, ut notetur *Cumque,* adjici potest punctum, syllabam *Que* significans (409): id quod exemplo illustratur notarum  *Quando*  *Quandocunque* (304). Ita etiam ex nota *Quae,* adjecto *Cum,* primum fit  *Quaecum* (310). Ex hac vero nota deinde factam esse, mihi persuadeo, aliam  *Quaecumque;* denique properante admodum stilo, quam nunc videmus, notam  *Quaecunque.* Ea vero characterum obscuritas aliam laboribus meis attulit difficultatem, ejusmodi notas, suo quamque loco, in Lexico disponendi. Nimirum, quo facilius reperiri possent, ex reliquis, quibus adjectum *Cunque* olim constiterat, literis non nisi clariorem U respicere licuit.

Id enim inprimis mihi curae fuit in apparando Lexico Tironiano, ut faciliorem, quoad fieri posset, ejus usum redderem. Vix tamen aliquis commode libereque eo uti poterit, nisi literarum, quibus notae constant, cognitione instructus accesserit (§. 86 — 145), quippe ex illarum ordine hae sunt digestae, digerique alio modo minime poterant (§. 10. 82). Quapropter nec

audiendi sunt, qui supersedere cupiunt opera hasce literas discendi, haud dissimulantes, commodiorem se Lexici Tironiani usum exspectasse. Quis enim, quaeso, ut hoc utar exemplo, qui ab Hebraeis, ab Arabibus, a Graecis, cet. scripta intelligere laborat, Lexicis uti poterit, nisi literarum, quibus scripta sunt, cognitionem fuerit adeptus?

Quum autem literae Tironianae vel evidentes et perspicuae sint, vel obscurae et ambiguae (§. 258); in eorum gratiam, qui hoc scribendi genere non satis sunt imbuti, neque usu exercitati, eas tantum literas in assignando suo cuique notae loco respexi, quas magis esse perspicuas arbitratus sum, obscuriores dubiasque uncis includi curans. Exemplo sit utraque nota, et qua  *Comtus* (p. 74), et qua  *Colit* (75) significatur, quarum analysis ratione literarum CO nullam quidem habet dubitationem; in linea vero, quae ab O demissa sequitur, multi haesitabunt, neque injuria: in priori enim nota hanc lineam significare M, in posteriori eandem significare L, nonnisi ex ceteris vocabuli literis, quas nota habet, cogitur (§. 258). Eodem, quo dixi, instituto usus, ad explicandas notarum terminationes adhibui quidem literas minores; has autem, quoniam terminationes sunt inconstantes et mutabiles, in ordinanda notarum serie minime respexi. Quare ad majores tantum literas oculos vertant, qui ex literarum ordine notas in hoc Lexico quaerere instituent. Repertis vero notis, minores etiam literas, praesertim eas, quae uncis sunt inclusae, diligenter circumspi-

ciant, ut subtiliorem Tironianae scriptionis cognitionem sibi comparent, quibusque literis notae primitus sint conflatae intelligant, principales earum partes ab accessoriis probe distinguentes. Quum denique in omni scripturarum genere per literarum conjunctionem adeo nonnumquam similes fiant figurae, ut vix discerni queant (§. 169), idque in Tironianis etiam notis accidere soleat; ejus quoque rei rationem habendam esse duxi, saepiusque, ut in viam redire possint aberrantes, de similibus formis eos admonui. Qui igitur figuram  quaesiverit in EO (p. 124), ex literis, Italico charactere subscriptis, videbit atque intelliget, eandem formam etiam reperiri in IO, LO, et TO. Interdum, quoniam propter duarum literarum similitudinem dubium erat, quo potissimum loco notam reperiri quaerentes arbitrarentur, utroque eam loco inserui. Ceterum si qui forte erunt, qui ambiguas illas notarum literas, in quibus explicandis equidem jamdudum laborans sudavi, melius interpretentur; his ego libenter cedam, et palmam relinquam.

In prima hujus Lexici parte, quia notarum praesertim figuras explicare mihi propositum erat, ordo adhibitus hic est: Exponuntur primo loco ipsae notae Tironianae, ligno incisae. Sequitur earum analysis, majoribus minoribusque literis, ut supra dixi, scripta. Illis distinctos et apertos in notis characteres indicavi; his non solum obscuros et ambiguos (quos quidem uncinis circumdedi), sed etiam terminationes notarum mutabiles. Adjicitur denique explicatio ipsa, Tironianae orthographiae ratione vix habita, quippe

quae ex analysi satis elucet. Interpretationi subinde apposita est, Italico charactere, vel melior lectio, vel usitatior terminatio. Integra vocabula, ut ab iis distinguerentur, quae merae sunt syllabae, majori litera initiali signavi. Numeris, qui singulis versibus subjuncti sunt, paginae significantur Collectionis Gruterianae; quibus si jungitur litera c, indicio est, librum Casselanum (§. 330) diversam a Gruteriana habere vel figuram, vel lectionem. Asteriscus ubi numeris accessit, eo indicatur, sive meliorem formam Gruterianae substitutam, sive, servata principali nota, terminationem solam mutatam esse. Signo §, numeris praeposito, notantur prioris voluminis paragraphi, in quibus uberius quaedam interpretatus sum.

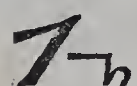

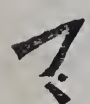

Restare videtur, ut nonnihil etiam moneam de altera Lexici parte, quae quidem eadem vocabula complectitur, quibus in prima parte notae explicantur, sed secundum alphabeti ordinem ita digesta, ut omnium literarum, quibus vocabula perscripta sunt, non paucarum, quibus notae constant, ratio habita sit. Paginae insuper laudantur, in quibus notarum etiam figurae, quas in hac parte omisi, facile reperiri possunt. Hunc vero apparatum neutiquam eo consilio cum eruditis communicavi, ut Tironianis scribere literis discerent, quae inutilis foret opera; sed ut harum literarum facilius redderetur studium. Etenim qui notas Tironianas legere intendit, atque in aliqua incertus haeret, quamvis eam intelligere sibi videatur, jam citius perspicere poterit, verumne viderit, an

erraverit. Quin etiam, opportune oblatam in hac Lexici parte occasionem amplexus, quaedam vocabula uberius explicavi, lectionumque emendatarum causas attuli.

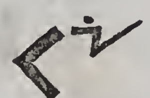

Quae igitur per annos prope nongentos (§. 53. 431 seq.) ignota erat vera Tironianis notis scribendi ratio, hanc ego exponere conatus, quaeque adhuc incomprehensa erat veterum notarum analysis, eam docere aggressus sum: atque ad difficillimae scripturae cognitionem, cujus aditus in tenebris jacens omnibus erat obstructus, viam ulterius progrediendi aperui et munivi, scopulos difficillimos perrumpens, atque impedimenta ubique obvia removens, adhibita in superandis eis incredibili opera, summa diligentia, et, paucis ut complectar, *Germanica* assiduitate atque industria. Quae si non temere de me sunt praedicata, ex his ego, atque ex his solis (§. 8), esse aliquo in numero eruditis videbor.

LEXICON TIRONIANVM.

LEXICI TIRONIANI

PARS ALTERA.

In altera hac lexici parte nonnulla uberius explicantur, simul etiam errata corriguntur, quae, licet omni adhibita cura, typothetae tamen, vel mea ipsius culpa, passim irrepserunt. Quare cum prima parte hanc alteram contendere ne supersedeant eruditi velim.

VOCABULORUM INDEX.

a) Persuasum mihi est, hanc notam ex Suetonii Claudio (15) fluxisse lectionemque ex eo emendandam esse: *Absentibus secundum praesentes.*

b) Licet martyris etiam nomen sit, hoc tamen loco prophetam intelligi, qui Hebraeis חֲבַקּוּק est, series verborum docet.

c) Constantem neque in nominibus casuum, neque in verbis temporum, dispositionem reperias, siquidem auctores collectionis notas ex libris ita excerpsisse non numquam videntur, prout ipsis occurrerant (v. quae annotavi ad notas *Ab absente*, *cet. Abrincatas*, *Gazophylacio*, *Herodiadis*).

d) Profecto non erat, quod Vossius (de vitiis serm. L. 7. Op. 2. 352) hoc nomen, recto casu ita terminatum defensurus, a Graeco Latinis repeteret. Graecum enim numquam fuit, sed Chaldaicum אַבָּא.

e) Quum literae A sinistrum tantum crus supersit; ita legendum esse cogitur (§. 94).

f) Quo ordine in Gruteriana collectione notae sint digestae (§ 70), hoc quidem loco optime videbis. Series notarum haec est (p. 182): *Piscis*, *Pisciculus*, *Piscina*, *Esox*, *Esocina*, *Abdomen*, *Thynnus* (*Indomitus* enim, quod a libro Casselano abest, post intercalatum esse videtur). Quodsi ratio quaeritur, cur inter piscium nomina sit *Abdomen*, nemo fere umquam eam reddere poterit, nisi *Plinii* locum (12. 15) legerit, ubi *thynni abdomen* commendat.

g) Liber Casselanus *Ablegat* habet: quae quidem lectio verior videri possit; sed cum forma notarum, quibus *Delegat* et *Relegat* significatur, haud congruit.

h) Solius Suetonii auctoritate hoc verbum nititur.

i) Praeter clarissimos legum interpretes Cajum et Julium Paulum, Suetonium etiam nominibus *Abnepos* et *Abneptis* uti videmus.

k) Inter vestimentorum genera *Abolla* legendum esse pro *Gruteriano Apolla* minime dubium est.

l) Nomen civitatis (Leusden Onomast. 6). Ita quidem legi potest nota. Sed altera lectio *Abram* eo magis praeferenda est, quo facilius ab hac nota derivari potest ea, quae in collectione proxime sequitur, *Abraham*, quod unum idemque nomen esse constat.

m) *Abrincatae*, hodie *Avranches*. Unde vero terminatio *as* sit, quae quartum casum denotat, videamus. Regum Francorum diplomata a notariis ex ore cancellarii primum notis Tironianis leviter excepta, deinde literis vulgaribus perscripta fuisse, superius (§. 358) dixi. Ex ejusmodi scheda illa nota fluxisse videtur. Pactum enim inter Gunthramnum et Childebertum, reges Francorum, atque Brunechildem reginam, quod primus vulgavit Gregorius Turonensis (L. 9. p. 440), inter alia habet „duas portiones „de — *Pictavis*, *Abrincatas*, cet." diversis casibus barbaro Merovingicorun more ita junctis. Atqui hisce ipsis casibus eadem nomina in collectione nostra leguntur. Etenim pro *Pictava* est (p. 141) *Pictavis*, et pro *Abrincatae* (p. 142) *Abrincatas*: ex quo magna significatio fit, collectionis auctores non nisi ex hoc fonte has notas hausisse.

n) Licet aspiratio haud dubie insit in nota; *Academiam* tamen esse, oppidum *Campaniae*, hodie *Bagni di Tritoli*, ex eo colligo, quod plures Italiae civitates in collectione hanc sequuntur.

o) A nota abest aspiratio, neque eam admittit litera K pro *ca* (§. 117) in secunda nominis syllaba. Pars *Graeciae* hoc nomine appellata.

p) Navium genera recensentes hanc notam inseruerunt collectionis auctores. Sed male legerunt G pro C.

q) Quo minus *Accentus*, quod est a *Cano*, legamus, notae figura prohibet, quippe quae absque omni dubio ab *Accendit* proficiscitur. Nomen substantivum hic designari arbitror.

r) Hanc lectionem postulare videtur notae terminatio, quam nullo modo explicare possum, si *Acer* legatur.

s) A Gruteriana collectione abest haec nota, quam ex libro Casselano supplevi, et aliqua certe significatione donavi.

t) Quum secundus hujus notae character, et C, et G significare possit, utroque eam loco inserui, haud tamen immemor ejus, quod de hac litera superius (§. 311) dixi.

u) Rationem hujus lectionis vide §. 275.

x) Posterior notae pars ex nota *Barba* bene procedit. Prior, quum *A* solum sit, liberum cuique arbitrium facit cetera divinandi. Legamus itaque *Aenobarbus* sive *Ahenobarbus*, quod est Domitiae gentis cognomen. C enim, temere insertum, interpretem prodit origine Francum (*Vid. Almon*).

y) Licet nullo modo *Atilius* legi possit, quia litera C haud dubie pars est hujus notae, attamen ne ab ista lectione longius recederem, *Acilius* legi. Sed L dubium est, et ita cum C conjunctum literae T similius, unde et *Actius* legere possis.

z) Neque enim *Achina*, neque quod sequitur, *Achinacis* intelligitur. Notandum femininum genus, quo etiam apud Catullum hoc nomen ante lectum est, quam a Gesnero mutaretur.

a) *'Ακινάκης Suidae* est *μικρὸν δορυ περσικόν·* et *Hesychio* idem, sive *ξίφος.* De recto hujus vocabuli casu vide Vossium (*de vitiis sermon.* 1. 12).

b) Veram esse hanc lectionem, series verborum apud Gruterum (91) satis docet.

c) Intellige medicamentum. Praecedunt in collectione *Balsamus*, *Antidotum*, cet.

d) Contractum *Acroma*, praeter Prudentium, nemo, quod sciam, usurpat.

e) *Acroamaticus*, immo *Acroaticus* apud Gellium (XX. 5), cujus plurimi quidem libri editi *ἀκροατικὰ*, habent, is vero, qui Gronovio curante prodiit, *ἀκροαματικά.* Atque haec etiam lectio auctoritate Plutarchi sustineri potest, *ἀκροαματικαὶ διδασκαλίαι* scribentis.

f) Cave *Actaeon*, *Actaeonis*, interpreteris, ubi in collectione leguntur *Acteon*, *Acteonicis.* Ludorum enim nomina recensentur, quibus adduntur *Actiaci*, id est quinquennales, quos in memoriam victoriae *Actiacae* instituit Augustus. Terminatio quidem nominandi casum non habet, sed dativum vel ablativum, ut in ceteris *Nemeacis, Isthmiacis, Olympiacis,*

g) Ἀκουητής, qui acuit, medio aevo dicebatur *Acutor*, sive *Acutiator* (Cangius).

h) Vel compositum est verbum, sicut *Coartat*; vel emendanda interpretatio, immo notae forma, cujus periculum feci in nota *Artat*.

i) In eadem pagina reperies etiam *Accingit*.

k) Fons erroris fuit in literis *ci*, quas duas unam *a* putavit librarius legens *Adfiat*.

l) Nota quidem haud dubia est, sed verbum inusitatum.

m) Sequioris tantum aevi scriptores verbo *Allocare* usi sunt. (Cangius).

n) Adsueti notarum collectores primitivis verbis derivata adnectere, saepius etiam inusitata temere finxisse videntur; quod semel admonuisse lectores sufficiat.

o) Licet lectio haud dubia sit, ipsum tamen vocabulum non intelligo. *Amenti* oppositum esse videtur.

p) Hoc nomine *Adonidem* appellant Plautus et Ausonius.

q) Lege *Amputat.* Quum prima notae linea transversa tum *ad*, tum *am*, significet, eo in errorem inductum esse interpretem mihi persuadeo.

r) Quum in priori notae parte tam *At*, quam *Ad* legi possit (§. 300); *Atquin* sive *Atqui* lectio melior erit.

s) Subjeci quidem hoc nomen usitatius; sed *Hadriaticum* in nota inesse, ejus analysis docet. Ratio hujus orthographiae a Livio petenda est, qui (5. 33) Hadriaticum mare, ait, ab Hadria Tuscorum colonia nomen accepisse.

t) Hoc enim ultimo casu id nomen legerunt apud Virgilium (*Aen.* 3. 534), Ovidium (*Met.* 3. 86. et 14. 796), Prudentium (*Apoth.* 937). Vid. p. 413. not. c)

u) Inauditum nomen.

x) Fortasse *Ad summam*, sive *Ad summum*, legendum est, neglecta obscura admodum et involuta terminatione.

y) Licet verbum *Adtegere* nusquam reperiatur, nomen tamen *Adtegiae* apud Juvenalem legitur.

z) Inusitatum est verbum.

a) A reliquis sermonis verbis abrupta haec esse videntur.

b) Probatur haec emendatio serie verborum, quae in collectione sese excipiunt.

c) Vera haec notae lectio est, sed *Ebur* intelligendum. In o transtulerunt secundae syllabae literam, quia sit *eboris* (Quint. 1. 6). Diphthongus vero in hoc nomen irrepsit, sicut in alia, e. g. *Aegloga*, *Faecundus*, cet.

d) Abest a libro *Casselano* inusitatum hoc nomen.

e) Ex *plebei* contractum. Praesertim a Livio ita scribitur.

f) Gruteriana haec lectio est: quam quum non intelligerem, in ejus locum subjeci *Aedituus*, cui tamen lectioni obstat terminatio *tus*, quam numquam pro *tuus* me reperisse fateor. Succurrit *Aedilatus*, quo nomine aedilitiam dignitatem appellatam fuisse, testes sunt Festus et Paulus (*Gothofr.* 246).

g) Haec et duae, quae sequuntur, notae a G incipiunt, neque alia initialis litera in eis inest, nisi E Tironianum rotundum partem illius literae esse ponas. Est quidem illud nomen proprium argentarii cujusdam; hoc tamen loco accusativum casum nominis civitatis esse putem, quarum plures fuere.

h) Insula propter Carthaginem.

i) *Aegipam* Aethiopiae oppidum fuisse tradit Plinius (6. 30).

k) In glossis *Isid.* est „*Egrotatitius*, qui frequenter aegrotat."

l) Licet me non fugiat, *Aegyptiam* epitheton fuisse *Minervae; Aegyptum* tamen legere malui, et *Aegyptius*, quia Tironianae scripturae proprium esse animadverti, terminationem sive punctum in nominibus regionum subjicere, in nominibus vero incolarum super imponere.

m) In geographica collectionis sectione reperitur hoc civitatis nomen, quae hodie *Angoulesme* dicitur. Apud Martiniere (lex. geogr. 1. 298) *Aequolesima* est: quare syllabam *ma* uncis inclusam addidi. Nota ipsa haud dubie syllaba *na* terminatur: quam terminationem etiam servat Ausonii *Incolisna.*

n) Ab aere derivatum esse inauditum hoc nomen, notae et locus et forma documento sunt. Fortasse idem est, quod *Aerificium*, vel *Aerificum*, de quo Nonius (Gothofr. 522).

o) Priscos B in *Abfui* omisisse, Dausquius et Cortius (ad Plin. L. 2. Epist. 11) jam monuerunt. Sic etiam in codice Theodosiano (L. 7. T. 12. L. 1. 2) legitur; et Livius (IV. 12) „Unum *afuit* bellum extern." (IV. 58. VI. 31) „Tantum afuit" (VII. 6) „Multum afuit" cet. habet.

p) Hanc nostram emendationem approbabunt, qui in collectione viderint illius socios *Calonem*, *Lixam*, *Spadonem*, cet.

q) Deficiente notae terminatione legere etiam licet *Agens in rebus.* Apud Gruterum nota explicatur *Agentem in rebus.*

r) Ἀγωνία. Quum de bene maleque sanis, sauciis, et vulneratis, hoc loco agatur, Gruterianam lectionem *Azona* ita emendabit etiam is, qui literarum in nota latentium omnino est rudis. Latinis literis scribitur in Vulgata (Lucas 22. 43 (44)).

s) Fortasse idem est, quod in charta quadam (Ludew. rel. manuscr. 6. 67) dicitur „in agone mortis positus."

t) Pro *Agrientum*, et *Agrientinum*, haud dubie legendum est *Agrigentum*, *Agrigentinum*.

u) Huic notae, et illi, cui *Ajunt vero* adscriptum est, aliam subjicio interpretationem. Nota enim *Ajunt* omnino differt ab illis. Neque *Ajunt tandem* et *Ajunt vero* me legere memini: frequenter autem *Ain' tandem?* apud Livium, Terentium, Ciceronem, et *Ain' vero?* apud Plautum, Terentium et Ciceronem. Quare hanc illi substituendam esse lectionem arbitror.

x) Si quis *Alaricus* legere maluerit, transversam notae lineam non X, sed L esse, statuat.

y) Nomen proprium viri esse videtur: non enim in geographica collectionis sectione legitur.

z) Ab antiquis saepius permutari literas B et V, ut in ceteris scriptis, ita etiam vel in notis Tironianis ipsis, vel in earum interpretatione, videre licet. Exempla sunt *Verbex*, *Verbecina*, *Vison*, *Rabrachus*.

54

a) Saepius hoc nomen legitur in inscriptionibus apud Gruterum.

b) Notae *Aligit* et *Alegit* non a praepositione *Ad* incipiunt, sed ab A. Quare conjicio *Alligit*, *Allegit*, pro *Adligit* cet. notata esse. *Aligere* enim inauditum est verbum.

c) Ingenue fateor, me dubium ac incertum fuisse, quomodo interpretarer hanc notam. *Carpentierus* quidem falsus est, legens *Alimonia* ex consueta diplomatum forma. Quodsi sola legenda esset nota, ex verborum serie evulsa, *Olla* legerem. Sed haud scio, an dixerit Ludovicus pius: „Proficiat in olla pauperum in augmentum."

d) Aliter atque aliter (*Plin.* 2. 93).

e) Quod olerum et herbarum nominibus inseruerunt collectionis auctores nomen *Aulium*, profecto *Allium* est.

f) In congerie propriorum nominum legitur. Fortasse *Alexia* explicari debet nota. *Alexium* certe habet lapidis titulus apud Gruterum (584. 2).

g) Notandum est, in compositis verba *Licere* et *Lacere* a nostris confundi.

h) Rivum esse prope Romam, satis notum est. Nota quidem H addit; sed eo haud contentus interpres insuper C adjecit, *Chalmon* scribens. Unde haud absurde colligimus, *Francum* eum fuisse.

i) *Alopecia* fortasse legendum. Adversari quidem videtur huic conjecturae, quod in collectione proxime sequitur *Alpocatis*, eadem notae figura notatum, mutata solum terminatione. Locus vero terminationis satis arguit, ejusdem vocabuli secundum casum ea nota haud indicari (§. 282), sed diversum ab illo nomen, fortasse *Alopecidis* ab *Alopecis*.

k) Conjunctim *Alticinctis* Phaedrus (2. 5. 11), disjunctim *Alte cinctus* Horatius (Sat. 2. 8. 10) et Seneca (Ep. 92. f.) habent.

l) Ita neutro genere Festus etiam hoc nomen profert apud Paulum (Gothofr. 249).

m) Inusitatum verbum. Quo minus autem, permutatis literis V et B, *Albescit* intelligamus, et series verborum, et forma notarum *Albus* et *Albicat* prohibent. Fortasse descendit ab *Alvus*, aeque ac *Alvinus*.

n) Ad nomina *Ama*, *Amula* Papias adnotat: „Vasa sunt, in quibus sacra oblatio contine„tur. Amula minor Ama." Haud barbarum sed Graecae originis nomen esse *Ama*, Vossius (de vit. serm. L. 7. Oper. II. 353) docet.

o) *Amaneo*, ἀποκοιτῶ (Gloss. Graeco Lat. apud Cangium).

p) Ut in verbis tertiam personam, ita in nominibus accusativum casum nonnumquam posuisse collectionis auctores, ideo monendos esse lectores arbitratus sum, ne semper illos genere excidisse, falso sibi persuadeant.

q) Optimae et evidentes sunt hujus emendationis rationes. *Anticialis* enim, nihil prorsus significans, eo magis expungendum, quo certius haec nota ab illa descendit, qua *Arvalis* significatur, quum quoad formam, tum quoad vim et potestatem.

r) Quum de coloribus hoc collectionis loco agatur, pro *Amitextum*, *Amitextinum*, legendum esse *Amethystinum*, *Amethystinatum*, nemini dubium erit.

s) In vestimentis, quae recensentur, locum habere non potest nomen *Adminiculum;* quod ne in hac nota admittamus, alia et vera hujus vocabuli nota facit.

t) Ad cetera aromata referunt hanc notam, de cujus sensu haud dubito, licet explicata sit *Admomum.* Primam potius figurae lineam, quae A significet, emendandam esse, ut ad perpendiculum sit demissa (§. 96), quam interpretationem meam improbandam, arbitror.

u) Paraeus (Lex. crit.) hoc verbum bis legit apud Ovidium (Met. 2. 564 et 6. 150), ubi alii *Admonere* habent.

x) Prima notae linea tam *ad*, quam *am* explicari potest. Hinc in errorem inductus interpres *Adplectitur* legit. In eadem pagina iterum reperias verbum *Amplectitur*, sed diversa orthographiae ratione notatum.

y) Idem hic fuit interpretis error, qui supra in nota *Amplectitur.*

z) Inter vestimenta legitur: quare Graecum ἀναβόλαιον esse conjicio. Isidorus (Orig. 19. 25) *Anaboladium* amictorium lineum faeminarum fuisse tradit.

a) Ita adscripsi, quia *Anariacarum* populum fuisse, Plinius (6. 16) tradit. Jam vero hac conjectura mihi non satisfaciente, aliam, immo meliorem, infra ad nomen *Arariacus* proposui.

b) Quum Gruteriana interpretatio clementis notae non adversaretur, haud ausus sum, aliam substituere. Attamen mirus est notae locus inter morborum nomina. Quare commodior lectio *Anathymiasis* videtur; cui etiam non obstant, quae praecedunt, verba *Anathema* et barbarum *Anatematiarinata*, quum absint a libro Cass. iisque collectio tum demum interpolata esse videatur, quum illius notae interpretatio jam corrupta esset. Nomen vero *Anathymiasis* collectionis auctores a Petronio (47) accepisse videntur.

c) *Amfractus* lecturo obstat terminatio *rius.* *Enfractarius* in collectione sequitur, quod quidem *Effractarius* esse potest. Illud vero ignotum.

d) Ita liber Casselanus: Gruteriana collectio habet *Anulus.* Neutrum dubio caret. Quum

enim ita verba se excipiant: *Anus*, *Aniculus*, *Anilis*; omnino patet, de *anu*, haud vero de *ano* cogitandum esse. *Anicula* igitur scribere debebat notarius. Etenim *Anniculus* ex alia radice nascitur.

e) In Epiro Graeciae fluvius, quo ad mare devectum Caesarem esse, Plutarchus tradit.

f) *Asylum* legendum esse conjicio, quoniam *Adytum* sequitur. Ita vero notam legentes primum ejus characterem ex A jacentis, haud ex syllabae *An* figura, interpretari debent.

g) Perperam legitur apud Gruterum *aut.* Meliorem ex libro Cass. lectionem substitui, quae in plurium notarum terminatione obvia est.

h) *Anthropographum* cognominatum esse Dionysium pictorem, testis est Plinius (35. 10). Quum *Antegradum* corruptum sit vocabulum, atque *Antigraphum* praecedat; hanc proposui conjecturam. Melior etiam lectio fortasse *Altigradum* sive *Altegradium* erit, mutata scilicet notae analysi.

i) *Antigraphus* Isidoro (1. 20) signum quoddam est in notis grammaticorum. Sed Ἀντιγραφεὺς in aula imperatorum notariis praepositus fuit. Illud nomen hac nota intelligi magis placet, quam hoc.

k) Duae sunt notae, quarum utramque *Anus* interpretamur. Primam haud dubie quartae declinationis nomen, nempe vetulam, significare, ex derivatis *Anilis*, *Aniculus* (*la*), patet. Altera apud Gruterum *Anis* explicatur, additurque ejusdem vocabuli casus *Anibus*. Quo fit, ut hac quoque nota vetulam designari, eo quidem faciliori lapsu conjicere possimus, quod vetulae medio aevo dictae sunt *Anes* (Carpent.); et a Catone (Non. ap. Gothofr. 762) etiam *Anuis* singulariter scriptum est. Verum enimvero hanc notam in collectione antecedunt *Adeps*, *Alvus*, ex quibus facile colligas, *Anum* secundae

declinationis nomen, id est, exitum intestini, intelligi; ut taceam, alterum vocabuli sensum priori nota jam occupatum esse. Illud igitur *Anibus* errorem esse malim notarii, nomen male declinantis.

l) *Apories*, quod Gruterus habet, de Graeca quidem voce ἀπορία nos monere videtur. Si autem sequentis notae lectionem *Erycina* veram dixeris, *Aphrodite* legendum esse, eo magis placebit, quo minus huic emendationi literae Tironianae adversantur.

m) Adjectivum nomen ab *Apocha* esse videtur. Quod quum nusquam reperiatur, fortasse *Apocopus* legendum est, quo Julius Firmicus (3. 14) utitur.

n) Literae, quibus nota constat, repugnant interpretationi apud Gruterum (p. 161) adscriptae *Apocripha*: quae igitur ipsa, aut certe notae forma, est mutanda. Interpolatam esse hac nota collectionem, patet ex libro Casselano, a quo omnino abest.

o) Ita legi, ratione (§. 207) jam exposita permotus. Neque enim priscum *Ampedix* (Festus ap. Paul. Diac. 251) ex notae literis elicitur.

p) *Amputat* Gruterus habet. Sed *Am* nequaquam est in nota. Unde quamvis insolens sit verbum *Apputat*, ita tamen invitus lego.

q) *Aprugna* legendum esse conjicio (Jul. Capitol. in Maxim. Jun. 2).

r) Plures hoc nomine civitates in Gallia fuere. Hac vero nota illam significari arbitror, quae in veteri Notitia Galliae in provincia Novempopulana medias inter civitates Elusatium et Lactoratium refertur. Apud Gruterum enim *Aquenses*, *Vasates*, *Lactorates*, *Elusates*, sese excipiunt.

s) Ab *Aquilex* derivatum esse videtur, licet nusquam reperiatur, et terminatio sit *ius*, non *gus*.

t) *Aethiopiae* oppidum. Neque enim apud Gruterum, qui habet *Abrabam*, neque in libro Cass. ubi legitur *Abraham*, probe explicatur nota, quae in geographica collectionis parte est.

u) Corruptam esse tam interpretationem, quam notae formam, suspicor. Sit potius illa

Araneolus; atque hujus levissima mutatione reponatur L pro C. Tironiani enim C apicem paululum si depresseris, eadem prodibit figura, quae est literae L. Neque apud Gruterum literae C perfecta est forma.

x) Equidem nullibi hujus populi nomen reperi. Quoniam autem ad Lugdunum *Arar,* Galliae Narbonensis fluvius, in Rhodanum influit, atque illius oppidi cives in collectione *Arariacis* proximi reperiuntur; non improbabilis est conjectura, populum, qui ad illum fluvium habitaret, ab eo nomen traxisse; sed *Araricus* legendum esse, antiquae inscriptiones (Grut. 418. 3. et 425. 1) monent.

y) Quid voluerit notarius, cum ignarissimis ignoro. In libro Cass. terminatio notae est *tati*, eadem tamen manente interpretatione.

z) Haud est dissimulandum, alteram hujus notae literam aeque S explicari posse, ut in *Acherusia.* Quare non refragabor, si quis, antiquo dicendi more (Quintil. 1. 4) *Arbos* notatum esse, maluerit.

a) *Archadius*, cum adspiratione in libris antiquis scriptum, eamque scribendi rationem retinendam esse Ludovicus Cario contendit, repugnante Graeci nominis Kappa, quod et Tironiana nota retinuit.

b) In collectione utrumque est, et *Archelaus* et *Archilaus.* Illud nomen viri; hoc, quum punctum infra notam conspiciatur, *Archelaidem*, Cappadociae urbem, interpretor.

c) Priscam orthographiam sectantur notarii, scribentes *Arquat.*

d) Altera nota, cui idem verbum adscribitur, suspecta quidem videtur, attamen aliter eam interpretari non ausim.

e) Ecce iterum Francum interpretem, aspirationem notae subjicientem, quae a simplici A absque ullo dubio incipit (p. 427. h).

f) Adjectivum esse nominis civitatis cujusdam in Italia verisimile fit ex serie verborum. Aspirationem, quamvis in nota conspicuam, negligi posse interpretaturus conjeci. Etenim idem nomen esse mihi persuadeo, quod a Floro (1. 18) *Arusinum* dicitur.

g) *Aristippeus* lecturo litera C obstabit.

h) Refragantur literae, quibus nota constat, Gruterianae lectioni *Ariototalis*, quae obscurius etiam, quam nota ipsa, aenigma est.

i) Sive *Arretium*, Tusciae urbs, Romanorum colonia. Silius (5. 123) *Arreti* pro *Arretii* habet.

k) Quum apud Gruterum Arruns duplici R scriptum esset, equidem *Arruntius* legi. Quodsi quis, neglecto altero R, *Aruns*, nomen ex Livio notissimum, legere maluerit, per me licebit. *Arruntem*, geminato R, Sigonius (Gothofr. 1408) etiam scribit.

l) *Harundo* notatum est, pro quo *Arundo*, usitatius nomen, posui. Neque tamen dissimulandum, priscos distinxisse *Arundinem*, cannam, ab *Harundine*, telo, e canna confecto, si fides est Agroetio (ap. Gothofr. 1350).

m) Rejecimus adscriptum vocabulum *Ars;* neque injuria, quippe quod aliam occupat notam. Accedit, quod nota, quae sequitur, *Arcet* est, atque terminatione tantum ab illa differt, saepiusque X in fine verborum puncto notatur (§. 253).

n) In geographica sectione ignotum hoc populi nomen adscribitur notae, cujus ex literis *Asculi* etiam legere licet, immo *Asculani.*

o) Dimidiam literam H (§. 114) in capite hujus notae apparere mihi persuasi, unde analysis. Mira tamen orthographia est, quae in nota ipsa latet. Quodsi primam notae lineam *as* et ultimam *ci* interpreteris; illa, quae a prima ascendit, nihilominus aspirationem addit, siquidem ea notae pars vix alia litera, nisi H, esse potest. (Exempla vide §. 311. Lit. C.).

p) Notae figuram, ex libro Casselano emendatam secutus, pro *Asur* legi *Ascius.* Punctum enim superimpositum ex more Tironiano, notam, quae cum terminatione *a erat Ascia,* reddit *Ascius* (ἄσκιος).

q) Derivatum ab *Aesculapius* nomen hac nota designari, ejus forma arguit (§. 275). Quum vero Latinum nomen, praeter *Asclepius,* quod alia nota notatur, haud noverim; ad Graecum quidem confugi. Neque tamen inficior, incertam esse interpretationem, aliis etiam nominibus exsistentibus, quae hacce nota significari possint.

r) *Adspernari* a doctissimis etiam viris usurpatur. Male. Haud enim originem traxit ab *Ad* et *Sperno* (*Cellar.* orth. 1768. p. 164). Proba igitur scribendi ratio est, quam nota prodit.

s) Mira quidem videri potest notandi ratio propterea quod in hoc scribendi genere compositorum verborum praepositiones raro ita mutantur, ut postrema earum litera se primae verbi accommodet. Etymologiae igitur ratio habita esse videtur, quasi sit ab *Assibus* (Gellius 16. 10).

t) Collectionis auctores enumerantes jumenta inserunt *Asturcum*, quo *Asturiconem*, sive *Asturconem*, eos significare voluisse haud dubium est.

u) Urbis *Astyrae* cives fortasse intelligendi.

x) Terminatio *um* est: quare aut *Athlum*, quod dixerint pro *Athlon*, aut *Athleticum* legendum.

y) In pluribus collectionis libris scriptis, aeque ac apud Gruterum legitur *Ac.* Ego vero (§. 269) conjeci *au* legendum esse, siquidem *Ac* alia nota (p. 9) significatur, duabus his literis composita.

z) Abest a libro Cass. quare interpolatam barbaro hoc verbo collectionem esse, mihi persuadeo.

a) *Auctoraticium* glossae Graeco Lat. interpretantur Αὐθεντικόν.

b) In lapidum titulis apud Muratorium (p. 171. n. 7) et Donatum (Class. IV. n. 42) reperias *Avispex*.

c) A libro Cass. haec nota abest; illi vero, quae *Affert* apud Gruterum explicatur, adscribitur *Aufert*.

d) *Aufustius* nomen proprium ex inscriptionibus apud Gruterum notum est. *Aufuscius* vero notatur.

e) Quum eadem huic notae forma sit, quae notae *Augur*, nisi quod sola terminatio *is* in locum puncti succedat; equidem *Auguris* legendum esse arbitror.

f) Mutato terminationis loco, L quidem additur; sed haud dubie legendum est *Auguralis*.

g) Utramque interpretationem et *Aviola*, et *Avilia* admittit nota. Hoc, foeminae nomen, bis in lapidis titulo (Grut. 521. 7) legitur; illud, viri cognomen, magis notum (Plin. 7. 33. Val. Max. 1. 8. 12. Sueton. Claud. 45. Tacit. Ann. 3. 41).

h) Gruterus habet *Avisus*, liber Cass. *Abyssus*. Quum vero in collectione *Avidus* praepositum sit, punctoque retro posito derivatum significetur nomen, nota etiam aucta sit litera S; mea de conjectura *Avidissimus* posui.

i) Notam inter *Proscenium* et *Odeum* positam sane *Aulaeum* interpretor. Difficilior ejus est analysis. Equidem E praecedere conjeci, aeque ac in nota *Aer*.

k) Hoc verum hujus populi nomen esse, non *Alerci*, ex Caesare omnibus notum. Sed quum mirum in nota videatur X; eam quidem scribendi rationem ex pronuntiatione ortam esse suspicor, cujus rei alia etiam sunt exempla in notis *Alces*, *Alacer*, *Ulysses*. Si quis vero propositam notae analysin approbare noluerit; AVL legat, ita ut V sit, quod ego L esse putavi, et L, quod ego X.

l) Bis in notarum collectione obvium hoc nomen. Primo loco nomen viri est, secundo nomen civitatis, ubi *Aurilianus* adscribitur. Equidem *Aurelianos*, cives *Aureliae*, (hodie *Orleans*) esse arbitror.

m) Nomen proprium. *Auruncul ejus* conjicio (Ael. Spart. Sever. 13).

n) Omnino ignotum est, quod in collectione legitur, *Ausopetum*. *Aussonium* legenti minime adversantur literae, quibus nota constat. Neque tamen *Ausoniam* terram intelligi velim, sed *Aussonam* hodie *Auxonne*. Galliae enim oppida enumerantur.

o) Gruterus habet *Austeris*, liber Cass. *Hausteris.* Quum vero nota puncto terminetur, aeque *Hausterus*, pro *Austerus*, legi potest. Ab H enim incipit nota.

p) Perperam apud Gruterum *Anus* legitur. Saepius enim in diplomatario Ludovici pii (ap. Carpent.) eadem nota *Avus* notatur.

q) *Bagacum* in itinerario Antonini, *Bacaco Nerviorum* in tabula Peutingeriana, hoc Galliae Belgicae oppidum appellatur. Gruterianae lectioni *Basiacum* omnino repugnat notae analysis. Nostram vero lectionem certam esse, *Nervii* nomen, quod praecedit, docet.

r) Ita pro *Bajoras* legendum. *Bajocae* nomen civitatis est, quae hodie *Bajeux* dicitur. Accusativum casum e Notitia imperii (179. b) exscriptum esse, mihi persuadeo, quo-

niam ibi et *Bajocas*, et *Redonas*, legitur, quod utrumque in collectione ita notatum est. Rationem scribendi *Bagocas*, magis etiam corruptam, animadvertes in nomine *Bagassinorum*, ejusdem urbis incolarum. (Gregor. Tur. ed. Ruin. 578).

s) Hoc verbum ad imitationem sonus, quem mittunt oves, effictum esse, indeque ortam orthographiam in nota latentem, superius (§. 379) dixi. Aliud quidem etymon proposuit Scaliger (de caus. L. L. 28); sed Quintilianus (1. 5. f.) jam asseruerat, ab ὀνοματοποιΐα vocem profectam esse; et Varrone teste antiqui oves appellarunt *Bela* (Voss. etym. 80).

t) Idem quod *Saltat;* inde etiam *Ballator*, *Ballatrix* (Cang. v. Balare).

u) Quum in geographica collectionis sectione sit; *Balearis* legendum est.

x) Identidem animadverti, Carpentierum notas neque legisse, neque legere potuisse, sed ex tritis diplomatum formulis tenorem hariolando saltim explicasse (§. 364). Cujus rei specimen dedit in hoc vocabulo: quod quum in eo chartae loco reperiret, ubi duarum commutationum mentio fit, *Conscriptas* legit, licet id verbum nudo C inverso, addita saltim terminatione, notetur, nostra vero nota *BRtas* exhibeat. Ita ne evidentes quidem literarum formas cognitas habuit. Duplex est verbi *Baratare* significatio, una *Permutare* sive *Commutare*, altera *Munire;* id quod glossaria docent. Quae apud Carpentierum praecedit nota, si *Tenore* legenda, certe male picta. Etenim, ut aeri est incisa, *PLto*, i. e. *Placito*, notatum esse dixerim.

y) *Barca* et diminutiva *Barcula*, *Barcella*, ex Graeco *βᾶρις* in Latinam linguam migrarunt.

z) Ecce inter media populorum civitatumque nomina inseruntur *Botulus*, *Basium*, *Basiolum*. Quod quum mirum sit, vix credo, ea iis significari, quae videntur. *Balesium*, Calabriae oppidum, apud Plinium (3. 11) legitur; atque in Notitia Galliae *Basiliensium* civitas dicitur, quae nunc *Basilea* est. Alterutrum hic fortasse legendum.

a) Si *Basiolum* nomen urbis esse haud sine ratione conjeci; hac nota *Basium*, olim regum Francorum palatium, quod hodie *Baisieu* dicitur (Mabill. 4. 12), significari arbitror.

b) Non syllabam solum, sed etiam interjectionem esse, ex Plauto (Pseud. I. 8) novimus.

c) Ita liber Casselanus. Gruterus Beltica habet. Neque illud, neque hoc satis intelligo. Linea persecans abest a Gruteriana figura, et C resurgens formam potius induit literae L ut BLa, *Baalia*, בַּעֲלִיָּה legi possit. Sequuntur notae *Balac*, et *Balaam*.

d) Notam, inter nomina propria obviam, restituta ex libro Cass. ejus forma, ita legendam esse censui. Gruterus quidem *Bellerofons* habet, et quo majus etiam imprudentiae librariorum exemplum adferam, in libro Casselano *Bellorum fons* legitur.

e) *Beneficiose* explicatur a Carpentiero (Glossar.) „Ex beneficio" seu „Feudi nomine."

f) *Berecynthii* tractus in Caria mentionem facit Plinius (5. 29); sed montis *Berecynti* (T non adspirato) Servius (ad Aen.)

g) Immo *Bethsabee*. Haud enim esse בְּאֵר-שֶׁבַע, sed בַּת-שֶׁבַע, ex eo colligo, quod filius ejus *Salomon* proxime sequitur.

h) An eadem nota, qua haec syllaba notatur, etiam *Bes*, pars assis, notetur, equidem haud scio.

i) Notae radix dilucida conspicitur in nota *Bibit*, neque dubia terminatio est *ria*. Attamen in lexicis frustra quaeras hoc vocabulum. *Bibesiam* habet Plautus: *Biberius* ob nimiam vini aviditatem vocatus est Tiberius, parva nominis immutatione (Suet. 42)

k) Notae partes haud dubie *bi* et *aeris;* quare ad eam paene opinionem adductus sum, ut de navibus aeratis agi putarem, quarum meminerunt Livius, Caesar, Horatius, et Virgilius. Quum vero sequantur *Exeris*, *Epteris*, *Penteris*, quae aperte Graeca sunt vocabula, *Bieris* idem esse conjeci, quod *Biremis.*

l) Ex mensurarum quidem genere esse videtur, ipsius vero vocabuli auctores idoneos adhuc frustra quaesivi.

m) Nihil enim me movet notandi ratio *VSO*, quum B et V saepius permutari notissimum sit (v. p. 425. z). Ita quod Caesari est *Vesontio* nomen, idem Ammiano est *Bisontio.* Quid? quod nonnulli Solini (C. 20) libri *Visontes* etiam habent pro *Bisontes.*

n) Haec enim hujus nominis proprii usitatior est scribendi ratio, licet Graeci et Βλαισὸν et Βλεσὸν scribant.

o) Quae quidem dubitationis causa sit in hujus notae interpretatione, superius (vid. p. 444. z) exposui. *Bolanus* fortasse legendum est.

p) Sive *Bracca*. *Brax*, quod collectio habet, nomen olim non inauditum fuisse, auctor est Hesychius, qui Βράκες Ἀναξυρίδες interpretatur.

q) *Bructinos* populos quum haud nossem, *Breuci* hac nota significari conjeci.

r) *Brochimus*, *Brocimus*. Alterum Gruterus, alterum liber Casselanus habet: neutrum intelligo. Anceps etiam nota est, quae quidem ab eo, qui apud Gruterum *Brochimus*

adscripsit, ea ratione in partes dissoluta esse videtur, ut ego analysin apposui; sed nihil impedit, quominus literas B(u)CT. ex ejus forma eliciamus, et eo confidentius legamus *Bucetum*, quo aptius hoc conjungitur antecedentibus et subsequentibus *Pampinus*, *Dumosum*, *Granarium Duracinum*, *Racemus Folium*, *Flos*, *Germen*.

s) Ita legendum. Bubon (βουβὼν) enim tumor est inguinis. Hoc vero collectionis loco de sepulcris agitur, quare commodius *Bubo*, funebris avis (Plinius 10. 12), legitur; de qua Ovidius (Met. 5. 550)

Foedaque sic volucris venturi nuncia luctus
Ignavus bubo, dirum mortalibus omen.

t) Apud Plautum, Livium, Varronem, et Columellam pro *Bobus* saepius legitur *Bubus*: quare illud adscripsi. Sed scrupulum injicit notae forma, quae loco tantum, quo punctum ponitur, differt ab illa, qua *Bus* (βοῦς) significatur. Quum enim diversi ejusdem nominis casus literali terminatione adjecta notentur (§. 282), derivata vero nomina mutato tantum puncti situ significentur (§. 275); equidem pro *Bubus* legendum esse *Buculus* dixerim.

u) *Buciferum* a *Bucca* esse, ex serie verborum palam fit. Sed vereor ne perperam interpres legerit F pro L, et *Bucciferum* adscripserit pro *Buccellatum*.

x) Ejusdem originis est, sed mihi ignotum. Fortasse idem quod *Bucco*.

y) Abest a libro Casselano; neque notum mihi hoc nomen proprium. *Cabira*, quod adscripsi, Straboni Κάβειρα est. Sed incertam esse hanc conjecturam ipse confiteor. *Cambriam* legerem, quia *Hiberia* praecedit, si antiquius id nomen esset.

z) In Aequiculorum tractu fuisse *Caedicos*, tradit Plinius (3. 12). Quoniam autem haec nota ponitur inter Byzantium et Smyrnam, utramque procul ab Italia, aliud nomen intelligendum esse censeo, fortassis *Ceductum* sive *Cedoctum*, quod oppidum fuisse prope Constantinopolin auctores sunt Curopolates, Zonara, et Cedrenus.

a) Adjectivum civitatis Caeninae nomen, quod legerint apud Livium (1. 10).

b) Error in notae forma apud Gruterum apertus est, quem mea de conjectura correxi, siquidem alterutrum C abesse debebat.

c) Inserui *Imperator* huic et praecedenti interpretationi, quoniam, quae in hisce notis est, linea recta aliter explicari nequit. Reperitur etiam *Imperator Germanicus*, quod videsis.

d) Nusquam reperi hoc vocabulum. Dubium est, utrum merum sit compositum nominibus *Calceus* et *Caliga*, an vera lectio *Callicula* (Graev. thes. 8. 113). Isidorus (Orig. 19. 34. f.) *Caliculae caligae* habet, si lectio certa. Venit etiam in mentem *Caligula*; sed aliam rationem notandi hoc nomen, a *Caliga* derivatum, fuisse (§. 275) arbitror.

e) In collectione utrumque est, et *Calculus*, et *Calculum*. Sed hoc vocabulum solius Isidori (Orig. 19. 33) auctoritate nititur, qui cinguli genus esse ait, a coacto loro dictum.

f) Id enim urbis nomen ideo adscripsi, quoniam *Callidus* alia nota, cum KL composita, notatur; haec vero inter nomina legitur, quibus Galliae populi significantur.

g) Ita liber Casselanus: Gruterus *Gambarus* habet. *Cammarus* vero legendum. Nota incipit a K.

h) *Camelarius* legi non potest, quum nota inter nomina propria appareat. Quare vel *Camilius*, vel *Camillanus*, vel etiam *Camellius* (Salmas. ad Solin. p. 1272), legendum erit.

i) *Canava* medio aevo Cella erat; Italis *Canova* idem est.

k) *Canidus* nomen mihi ignotum est. Fortasse *Canidius* legendum. Certe *Canidia* nomen faeminae fuit (Gruter. 724. 7. Horat. Sat. 1. 8. 24. et Epod.)

l) Aliis *Cannanefates*, *Cannenufates*, *Caninefates* dicuntur.

m) Ita liber Cassel. quod multo melius est, quam Gruterianum *Capitaneus*. Facessant igitur, qui ex hac nota, aliisque male lectis, Tironianae scripturae aetatem definire moliuntur.

n) Interpretatio haec melior est ea, quam ex libro Casell. adscripsi, *Caprella*. Etenim ex *Capra* diminutivum fieri *Capella*, jam Priscianus docuit.

o) Coloniae in Italia nomen fuisse, Frontinus (de colon. p. 113) prodidit. Idem fortasse nomem *Capus*, quod marmori insculptum est (*Grut.* 170. 1).

p) Duae sunt notae in collectione, una *Captabulum*, altera *Capistellum*: quarum si una *Capistellum* significet, certe illa est, in qua situ terminationis simul indicatur litera L (§. 286). Haud vero intelligo hoc nomen. Melior fortasse conjectura fuerit *Catabulum* (Voss. de vit. serm. 3. 3).

q) Omissa litera E adjectivum hoc nomen Propertius (4. 3. 64) profert.

r) Ut distingueretur nomen appellativum a nomine civitatis proprio, utriusque secundum casum posuerunt tachygraphi.

s) Hocce vocabulum aeque ac *Carus* a K incipere haud mirum est (§. 117). Quid? quod Isidorum etiam (Orig. 10) *Kharus*, *Kharitas*, scribere videmus.

t) Inter nomina propria positam hanc notam significare *Carfinius* conjeci, haud certa tamen lectione, quia et *Carienius*, *Carisius*, *Caristius*, legere licet. Gruterianum *Carominius* nusquam reperi.

u) Inauditum hoc vocabulum si olim in usu fuerit, multo magis excusari debebat *Incestuosus*, quod apud Valerium Maximum expunxerunt viri docti.

x) Error est sive notarii, sive interpretis. Notae enim literis repugnat interpretatio.

y) Quoniam, quod apud Gruterum notae adscribitur, *Catacussis* omnino ignotum est vocabulum, hoc vero collectionis loco vasorum genera nominantur, *Cataclistus* legendum esse conjeci, quo vocabulo Apulejus de veste quidem utitur in arca reposita; sed hac nota significatur vas, cataclistica artificis opera constructum. Graecum vocabulum corruperunt sequioris aevi scriptores, quorum in numero est Gregorius Turonensis (glor. conf. 63) scribens: „Calicem non comminuit, quia *cataclyza* in ipso „fuerant solidata."

z) Hodie *Cavaillon.* Straboni *Caballio*, Plinio *Cabellio*, Gregorio Turonensi *Cavillonensis urbs* est.

a) A *Cauda* apud Gruterum derivantur *Caudula*, *Caudilla*. Illud *Codicula* esse potest, hoc vero ignoro.

b) *Coccus.* Diversa scribendi ratione *Caecus* etiam notatum reperies.

c) Quia Graecum est κέλευσμα; quamvis reperiantur etiam, qui *Celeuma* scribant, ut Asconius in Ciceronem.

d) Nota enim non habet terminationem *us*, sed punctum.

e) Dubitavi an *Cinnum* legendum sit; quum liber Cassel. habeat *Cynum.* Jam vero sentiens occultum illum inter C et N characterem *ae* esse, eo confidentius lego *Caenum*, quod Lutum praecedit, et Pandectae Florentinae etiam habent *Caenum* pro *Coenum* (Brisson. Parerg. §. 49).

f) Mirus videtur locus, quem hoc vocabulum in collectione occupat. Sequitur enim adverbia *Prope*, *Propius*, *Porro*: quo fit, ut de interpretationis veritate dubitare liceat. Venit in mentem *Coeppe*, quo Ulpianus (l. 3. §. 5 de acqu. poss. in Pandectis Florentinis) utitur. Sed *Quippe*, quod idem est, alia nota exprimitur.

g) In geographica sectione *Cretacerenae* legitur: quod quum omnino ignotum sit nomen, *Ceranae* substitui, cui emendationi minime repugnant literae, quibus nota constat.

h) *Cerco* quidem cognomen est Romanum. Quoniam autem inter animalium nomina ponitur haec nota, melior fortasse interpretatio erit *Cercops.*

i) Gruteriana collectione in errorem inductus, literarum C et H similitudine insuper deceptus, notam in primo hujus operis volumine (§. 114. 311) perperam interpretatus sum *Herix.* Immo vero hanc notam a C incipere, docet illa, quae in collectione se-

quitur, *Hierohaerix*, lege *Hierocceryx*, in qua nihil dubitationis habet C, quod literae H annectitur.

k) Ita pro *Calcidocus* lego, atque hoc loco *Chalcidicum*, partem aedium, intelligi volo (v. *Orchestra*).

l) Pro *Camea* reposui, ut sit lecti genus a χαμαὶ, appellatum. Hancce interpretationem poscere videtur series verborum (149): *Suppellex*, *Caenaculum*, *Camea*. Inter omnes enim constat, Caenacula fuisse aedium partes, in quibus maxime plebeji caenitabant. Unde Juvenalis (Satyr. X): *Rarus venit in caenacula miles* (Bulengar. de conviv. L. 1. C. 27). *Chama* vero, lectus humi stratus, quo etiam non nisi pauperiores utebantur, Hesychio est χαμεύνιον κλινίδιον πενιχρόν. Isidorus *Camam*, sine adspiratione, lectum brevem et circa terram interpretatur (Orig. XX. 11).

m) Haud scio, utrum Χαριςήριον legendum sit; an *Charisticon*, quod in pluribus Pandectarum libris scriptis (44. 20. 6) legitur; an vero *Charistion* pro *Charistium* sit. *Charistia* festa certe haud ignota sunt, et in collectione mox sequuntur *Festus*, et *Festivus*.

n) *Chariontes*, quod Gruterus habet, equidem ignoro. Quum vero Bacchus ejusque epitheta praecedant; *Charites* substitui, quae Bacchi filiae sunt ex Venere susceptae, ut quibusdam placet.

o) Nisi Graeci nominis χειροκρασία secundus casus hac nota significetur, nihil equidem intelligo.

p) Haud dissimulandum est, notae, quam a K incipere dixi, lectionem aegre procedere, quum nominis *Cherronesus* Graeca origo Ch poscat. Mea igitur conjectura vix defendi

poterit nisi aut pravam scribendi rationem subesse, aut primam notae literam dimidiam angulati C partem esse statueris, quod in nonnullis aliis similibus formis ita se habere suspicatus quidem sum, sed non ausus asserere. Quae utut sint, Gruterianum *Caeromensum* certe error est apertus.

q) Haud scio an sit *Coraciensis*, Coraces, Arabiae petreae oppidi (Ptolem.), civis.

r) Incertus, an legendum sit χορεία, *Chorea*, *Choreae*, hanc quidem proposui conjecturam, ita tamen ut quae ei adversantur haud dissimularem. Etenim in omnibus, quae a χορὸς descendunt, vocabulorum notis Xi perspicuum est (§. 145). In hac autem nota C initialis est litera. Quare videndum, an fortassis nomen proprium *Chorae*, Aegypti oppidi, intelligendum sit. *Memphiticus* certe praecedit.

s) Licet *Choragiarius* nomen ex inscriptione etiam lapidis (Gruter. 475. 2) notum sit; ob puncti tamen in nota locum *Choragus* legere malim.

t) Cangius *Cicendile* in notarum collectione reperit, quare hanc etiam lectionem addidi. Certe apud Gregorium Turonensem (de mirac. 1. 15) *Cicendile* lampas est.

u) Haec nota, quam ex libro Cass. addidi, exstat etiam in appendice collectionis Gruterianae (200). Mensurae quidem genus ita appellatur Plinio Valeriano: quoniam autem *Gruis* praecedit, et *Turtur* sequitur, *Cygnus* legendum esse patet.

x) Interpretatio nota ipsa obscurior est. Haud scio an sit κύμβη, idem quod Cymbium, poculum (Voss. de vit. serm. 1. 12).

y) Insuetum vocabulum a *Cirrus* deductum. Ad hunc etiam collectionis locum respexit Pseudo-Isidorus (in glossis) scribens *Cirrus*, *Cirritus*, *Cirritudo*, nullamque addens explicationem. Excerpta scilicet ex collectione sunt, in qua ita sese excipiunt nomina illa (§. 381).

z) Alterum C, quod in notae figura apud Gruterum conspicitur, modica emendatione transformavi in literam L.

a) Pro *manifestatione juris* medio aevo usurpatum fuisse hoc vocabulum, satis notum est. Sed mira est notandi ratio *Clarifigatio*.

b) Facile intelligitur, sed nulla, quod sciam, nititur auctoritate.

c) Gruterianum *Clematur* nemo profecto erit, qui intelligat. Paulo melior libri Cassel. lectio *Clemater;* sed duo C, quae in nota conspiciuntur, optimam demum suppeditarunt interpretationem *κλιμακτήρ.*

d) Haec nota vocabulo *Cliothedrum* apud Gruterum explicatur. Quum vero notae *Cathedra* forma eadem sit, quae hujus est, nisi quod illa a K, syllabam *ca* plerumque significante (§. 117), incipiat, haec a C, quia vocabulum ea notatum ab alia syllaba exorditur; facile inde colligo, ad derivatum nomen recurrendum esse, quod Graecis est *κλινοκαθέδριον*, et quamvis Latinum nomen nusquam reperiatur, *Clinocathedrium* tamen notatum esse, ex terminatione notae apparet. Cujus generis haec sella fuerit, Chimentellius (in marmore Pisano de honore bisellii cap. 27) docet. Atque idem hoc nomen varie corruptum apud sequioris aevi scriptores (Cang.) legitur *Cliothedrum, Cleothedrum, Cliophedrum, Clothedrum, Kliothedmus.*

e) Non intelligo, nisi *Clinius* sit, nomen ducis Graecorum, Nectanebo regi militantium, de quo Diodorus Siculus.

f) Licet insuetum, haud tamen obscurum nomen. Sicut enim a Capsa est Capsarius, a Carbo Carbonarius, a Carcer Carcerarius, cet. ita a Clipeo *Clipellarius.*

g) *Clipeum*, et *Clupeum*, diversis notis notantur. Plinium majorem secuti esse videntur, qui pugnatorium per I, imaginem vero per V scribendum esse censet, quam quidem ejus opinionem refutat Sosipater (Gothofr. 1361).

h) Sive sit *Coaegyptus*, sive *Coaegyptius*, nemo umquam intelliget. Equidem *Comes Aegypti* legendum esse arbitror, de quo et Codex Theodosianus (l. un. de comit. et trib. scholar.), et Notitia dign. utriusque imperii (Gothofr. ad Cod. Th. ed. Ritter. II. 99). Primus ab Augusto constitutus fuit (Salmas. ad Treb. Poll. Macrian.). Neque me movet, quod apud Gruterum sequuntur *Coaegyptia* et *Coaegypticus*, siquidem utraque haec nota a libro Casselano abest, et tum demum inserta esse videtur, quum illius sensus alienus jam irrepsisset.

i) Ita lego, quia *Coenacellum* non intelligo. Haud ab initio in notarum collectione fuisse hanc notam, testantur glossae Isidori, quae, ad hunc collectionis locum respicientes, id vocabulum omittunt (§. 381).

k) Abest a libro Cass. insuetum hoc compositum.

l) Repugnantibus notae literis apud Gruterum legitur *Conlubrium.*

m) *Colobathra* legendum esse suspicor, quae sunt perticae ligneae. In Lexicis frustra quaeras hoc nomen, quod Graecae est originis a Κῶλον et Βάθρον. Nonius Marcellus (Gothofr. 549) Grallatores, ait, sunt *Colobathrarii.*

n) Ut sit *Coliseum*, sive *Colosseum* (Philander ad Vitruv. 4. 3). Eadem, quae in nota est, scribendi ratione utitur Beda verbis: „Quam diu stabit Colyseus, stabit et Roma" cet.

o) Adjectivum nominis *Comes* medio aevo usu venit; sed nil impedit, quo minus *Comitialis* legamus.

p) Notae terminationem male effictam esse puto.

q) Hancce lectionem nota suadet, qua *Comoedia* notatur, quamvis *Comedum*, quod nomen apud Gruterum notae adscribitur, antiqui dixerint eum, qui bona sua dilapidat (Fest. ap. Gothofr. 1373).

r) „Competenter operam dat": ita Papias (Cang.).

s) Conjeci quidem *Computum* legendum esse; sed medio aevo *Compotum* etiam viguit pro Tractu vel Regione. Eo magis autem Gruteriana lectio servanda esse videtur, quod *In Compoto* proxime sequitur.

t) Apud Gruterum *Concapsa* legens eo fere adductus eram, ut intelligendum esse crederem vexatum illud vocabulum, quod ex legibus XII tabularum Festus (Gothofr. 466. v. 9) prodit, *Concapu* scribens, sive *Concapes*, ut Scaliger legit, sive *Concape*, ut Gothofredus (Fragm. XII. tab. T. 6). Quoniam autem huic notae eadem forma est, quae notae *Capsa*, nisi quod litera P literam C persecat, eoque L primitivae notae addit (§. 286); de alia conjectura vocabulum *Captentula* proposui, quod etiam a *Capio* descendit. Non autem *Captensula* scripsi, quum in glossis Isidori, quas saepius cum collectione congruere animadvertimus, legerem *Captentula Captio*, eademque scribendi ratio in multis aliis glossis (vid. Cangium) sit.

u) Notae enim forma non prohibet, quo minus ita legamus. Gruterianae lectioni *Concubinum* obstat punctum, quod notam terminat. Numquam enim obliquus casus puncto notatur.

x) Quasi *Condominium* (Cang.). Medii aevi hoc vocabulum in libro Cass. frustra quaeras.

y) Terminatio *a*, in libro Casselano, impedit, quominus aliter legamus. Apud Gruterum vero nota puncto terminatur, quod admittit interpretationem *Condisciplinatus*, quo vocabulo Augustinus utitur.

z) *Conditorium* posui, quod usitatius est vocabulum. *Condiarium* tamen in glossis Isidori explicatur *Aerarium*. Utramque lectionem nota admittit.

a) Ecce apud Carpentierum ignari et imperiti notarii specimen. Ex praeterito enim verbi *Confindo* notam construit, quam a *Confido* declinare debebat.

b) Ad tuendam nostram lectionem sufficit dilucidam esse notae terminationem, quamvis insolens sit verbum, a *Forare* derivatum. Sed silentio haud praetereundus est liber Cass. in quo punctum est pro terminatione, adscripta interpretatione *Conforaneus*, quod nomen in glossis Isidori explicatur *Unius fori*, et a *Philoxeno* σύντεχνος, i. e. idem opificium exercens. Etenim non est, quod in malam partem a grammatico acceptum esse vocabulum Graecum cum Hederico et Ernestio (in Lex. Graeco) statuas, qui non nisi scribendi ratione *Confuraneus* pro *Conforaneus* decepti sunt.

c) Ne quis unquam Tironianam scripturam interpretantis Carpentieri in verba juret!

Hanc enim notam non nisi in praefatione libri solam inspectam eo auctore *Optimum* significare (§. 188) dixi. Jam vero cum aliis junctam in Capitulari Ludovici Pii intuenti (§. 3. ap. eund. p. 6), *Conspiciendum* ea significari, perspicuum est.

d) Terminationis figuram per errorem inversam in ligno incidi. Columella et Plinius hoc verbo utuntur.

e) *Constabilire* comicorum Plauti et Terentii verbum est.

f) Nomen *Constipulatio* in chartis antiquis obvium est (Martene collect. 1. 16).

g) Mira utriusque, qua hoc verbum significatur, notae forma est. Terminatio et V litera in unam quidem eandemque lineam coire videntur; sed ab eo, qui declinare hoc verbum voluerit, aliam terminationem, praeter hanc lineam, quae tum V solum significet, addendam esse, mihi persuadeo. Falso suspectum fuisse hoc verbum, Vossius (de vit. serm. 7. Op. T. 2. p. 356) docuit.

h) Pro Satisfacit medio aevo usu venit. A libro Cass. abest haec nota.

i) Licet *Tribulis* notum sit; *Contribulis* tamen suspectum videtur. Certe pro hoc nomine Cicero (pro Rosc. Am. 16) utitur *Tribulis meus.* Glossae Isidori *Contribules* interpretantur *Consanguineos.* Sidonio (8. 13) idem est, quod Tribulis. Neque medio aevo demum invaluisse hoc vocabulum, lapidis titulus (ap. Grut. 873. 4) docet.

k) *Cardiacus* alia nota, quae a K incipit, notatur. Illa vero scribendi ratio apud eos fortasse invaluit, qui, decepti ambiguitate vocabuli, a *Cor* id duxerunt, non a Καρδία. Sed haud scio, an non *Cordicitus* potius legendum.

l) Admodum dubiam esse lectionem meam, ingenue confiteor; sed *Chyrugilis*, quod Gruterus habet, nomen neque proprium, neque appellativum, umquam me legere memini. Venit quidem in mentem *Chirogylium* (Plin. 5. 31), et *Curagulus* (in gloss. Isid.), et *Chirogrillus* (Cang.), et *Chirurgus*; sed obstat notae terminatio.

m) Etsi notissimum sit Hispaniae oppidum *Corduba*, hodie *Cordova*; literae tamen, quibus nota composita est, huic Gruterianae interpretationi adversantur. Accedit locus, qui in collectione huic nomini datur, medio inter *Corsicam* et *Corinthum*.

n) Ignoto huic nomini *Casturis* adscripsi, quod Pannoniae oppidum erat (Martiniere Lex. geogr.). *Caturigis* enim, Galliae oppidum, longius abest a Scordiscis, qui sequuntur. Sed fortasse ad praecedens Gruterianae collectionis caput VI referenda est haec nota.

o) Mirum est, et notam, et Grut. interpretationem hujus nominis, a G incipere. Paucae, quas nota prodit, literae ulteriorem indagationem difficilem reddunt. Sed aliud nomen proprium vix ea significari potest, nisi sit *Gliptus*, quod est in lapidis titulo (Grut. 597. 1).

p) Duae sunt notae, quarum alteri *Crista*, alteri *Cerista*, adscribitur. Sed unum idemque vocabulum utraque nota significari, series verborum docet. Antecedunt illam *Galea*, *Lorica*, aliaque arma, sequitur *Cristatus* (126); praecedunt hanc *Anguis*, *Natrix* (182). Scripserit fortasse interpres *Kerista* (ut galli gallinacei vel serpentium crista intelligeretur), a *κέρας* hoc nomen deducens, quam etymologiam Vossius approbat; *Christa* vero (galeae), quod a *κόρυς* esset. Haud infrequentes sunt grammaticorum ludicrae ejusmodi subtilitates.

q) Latere in nota videtur Phaedrianum (I. 25) *Corcodilus.*

r) A *Cumba* sive *Cymba* deductum insuetum verbum, quod, ni fallor, navi vehi significat.

s) Lege *Cynomya.* Notae figura apud Gruterum duo M habet, quorum alterum in N transformavi, quo illud vocabulum prodiret.

t) Terminatio enim notae ad *Decemviri* spectare videtur. *Decemviri legibus judicandi* certe error est interpretis. Nec *Decemviri legibus scribendis* legere ausim, quum extrema notae linea, sive K literam, sive *an* syllabam significet. *Decemviri* vero *stlitibus judicandis* noti sunt (l. 2. §. 29. de O. J.). Et licet obsoletam hanc scribendi rationem, quae in legibus XII tabularum reperitur, reprehendat Quintilianus (l. 4. p. 30); in lapidum tamen titulis saepius obvia est (Gruter. 350. 7. 407. 1. 465. 5). Sed aliam etiam lectionem, *Decemviri sacris faciundis*, nota admittit, quum posterior ejus pars nota *Sacer* (p. 344) ipsa sit.

u) Perperam apud Gruterum legitur *Deditius*. Atque haec etiam nota documento est, scriptorem glossarum, sive Isidorus fuerit, sive quis alius, ante oculos habuisse collectionem nostram (§. 381). Legas velim apud eum: *Datitius* (l. *Deditius*) *Latinum non est, sed Dedititius*, cet.

x) *Definit* legendum esse arbitror, quum haud repugnet notae terminatio, quae tam *is*, quam *it*, significare potest, prout magis vel minus prolongatur.

y) *Delerus* collectio habere videtur, quo clarius appareat vocis origo a Graeco λῆρος.

z) Libera quidem sit sua cuique conjectura; ego vero, ut ita legerem pro Gruteriano *Democretis*, literae C forma sum adductus, quae magis literam L simul continere videtur, quam literam R (§. 258).

a) Vix credo, notarios ipsos hoc vocabulum umquam audiisse, sed eo tantum consilio id notasse, ut verbum *Denomino*, substituta in locum puncti apta terminatione, quilibet effingere possit. Exemplum habes in nota *Inviolatam*, quam is, qui Confessionem fidei notis excepit (§. 355), ex inusitato apud Gruterum (88) verbo *Inviolat* cum alia terminatione commode composuit.

b) Fortasse eadem de causa, quam modo dixi, id notarunt, ut inde fieret *De propinquo.*

c) Modica terminationis mutatione fieri potest *De salute.*

d) Falsam esse apud Gruterum interpretationem notarum *Desit*, *Desiit*, animadvertens (quasi hoc sit illius praeteritum), equidem, ut ab errore caveant alii, adscripsi *Desinit*, *Desivit*, quod idem ac *Desiit;* sed typographi incuria (p. 338) expressum est *Desiniit*, quod corrigendum. Certe verbum *Desinere*, non *Deesse*, voluit notarius. Hoc enim terminatione superimposita notandum erat, ut ex notis *Desumus*, *Desunt*, patet.

e) Gruterus *Divehit* habet, quae etiam vera notae lectio est. Sed *Devehit* intelligendum esse videtur.

f) *Deuterius* fortasse legendum. Plinius enim (14. 10), vina quaedam a Graecis *Deuteria* appellata esse, tradit.

g) Cum terminatione hujus nominis, quae apud Gruterum explicatur *as*, congruit quidem Casselana notae figura; Gruteriana vero melior, *Diablintes* legi, sinit.

h) Socias habet in collectione *Colubram* et *Echidnam:* quo verisimile fit, ex serpentium genere esse. Nomen vero ipsum ignotum. An graecae sit originis, ex *δὶς* et *βία* compositum, nescio. B litera et terminatio impedimento sunt, quo minus *Dipsas* legamus, quod quidem vocabulum haud venit in mentem Carpentiero et Adelungio (in Gloss.) scribentibus: *Dispades, genus serpentium.*

i) Martinus (Lex.) hancce scribendi rationem praefert vulgari *Ditio.* Certe litera C in nota inest.

k) Apud Gruterum neglecto C legitur *Ditione.* Incertum est, quid voluerit notarius, quem quidem e recentioribus fuisse, ex libro Cass. patet, a quo omnino abest haec nota.

1) Quum *Diadema*, quod apud Gruterum legitur, aliam notam occupet, hoc loco *Digma* legendum esse incertus quidem conjicio.

m) Vana fortasse erit haec conjectura; sed de alia interpretatione desperans hanc arripui.

n) Vide quae supra ad notam *Conspiciendum* monui de fallaci in interpretandis notis duce Carpentiero.

o) Notatum esse pro *Descendit* mihi persuasum est. Nota enim, qua *Descendit* notatur, a libro Cass. abest.

p) *Discertatio* nomen, pro contentione, medio aevo usitatum fuit. *Decertat* a libro Cass. abest, quare conjicio, in eo *Discertat* esse pro *Decertat.*

q) Graecum δίςχωλος esse arbitratus sum. Gruterianum *Discolis* si quis servare maluerit, ad medii aevi vocabula ei confugiendum erit. Namque *Discolus* Papias interpretatur *difficilis, aut moraliter indisciplinatus, a scolis dictum vel a colore et dis.*

r) Quartum hujus nominis casum ex Plinio (35. 11) notasse videntur.

s) Glossae Isidori interpretantur *Diversa donat:* ubi male Graevius substituit *Dissonat, diversa sonat.* Manifesta enim Tironianae notae lectio *Disdonat* est.

t) Nota quidem *Degregat* habet; sed ignotum hoc, usurpatum illud a Martiniano Capella.

u) Fortasse *Dispatat*, quod aeque obscurum dixeris; sed vide *Expadat*.

x) Ut supinum sit verbi *Dispandere*. Etenim *Dispendium* alia nota notatur.

y) Pro *Depetit*. Nota enim, qua *Depetit* significatur, a libro Cass. abest.

z) Ita liber Casselanus, Gruterus *Dirudis* habet. Sed lege *Diruit*. Quod enim in collectione sequitur *Diruit* praeteritum verbi tempus est, hoc praesens. Atque terminationes *is* et *it* non nisi lineae longitudine differunt, facillimeque confunduntur. Viam errori aperuit ignavia librariorum, qui, ut operae parcerent, in compositis et derivatis, primitivo verbo subjectis, non nisi primam verbi syllabam scripserunt (§. 75). Quo factum est, ut, si erratum in primitivo verbo esset, idem in derivatis etiam transiret. Atqui id ipsum accidit hoc collectionis loco, ubi ita sese excipiunt voca-

bula: *Rudis*. *E* —. *Con* —. *Di* —. *In* —. *Sub* —. *Ruit*. *Eruit*. *Cor* —. *Dis* — *In* — *Sub* —. In primo enim error est, ejusque loco *Ruit* (praes.) legendum (§. 325).

a) Pro *Deturpat*. Hoc enim a libro Cass. abest.

b) Punctum in terminatione loco inferiori apponi debebat. Causam cur et *Docimentum*, et *Documentum*, in notis reperiatur, cognoscere nondum potui.

c) Sive *Domnedius*, *Domnaedius*, *Dominaedius*, idem ac *Dominus aedium* (Cang.).

d) Duo nomina, *Donum* et *Munus*, in unum coalescere potuisse, vix credo; neque alterum alterius glossam esse, in contextum perperam illatam, nota ipsa docet. Fortasse Plinium male quis intellexerit, asserentem (35. 14), Graecos *Dora Munera* vocasse, indeque inconcinnum nomen *Dorummunus* finxerit, ut igitur ita sit legendum.

e) Ita lege; nisi retinere malueris *Dossum*, ut sit *Dorsum*, ea scribendi ratione, quae apud antiquos passim reperitur.

f) Crucem mihi fixit haec vox, quam neque Pseudo-Isidorus (in gloss.) intellexit, curiosos ad collectionem notarum ablegans (§. 381); neque Cangius interpretari potuit. *Drama*, quod adscripsi, nullo modo congruit cum serie verborum *Lancea*, *Framea*, (*Dramea*), *Spicum*, *Spiculum*, cet. Ad Graecum δοῦρα fortasse recurrendum est. Certe Homerus (Od. α. Il. ω. μ.) pro hastis, seu hastilibus spiculis, hoc nomine utitur.

g) In verbo quidem nulla difficultas est, sed in ipsius notae forma, quae plures comprehendit characteres, quam ut simplex illud verbum ea significari possit. Namque vel *Didoit*, vel *Diduit*, vel fortasse etiam *Didit* habet. *Didere* quidem idem ac Dividere est; sed proxime sequuntur *In* — *Per* —, ut igitur verbum repetendum sit cum praepositionibus: quod fieri nequit, si primitivum est *Didit*. Haud enim praeterita *Indidit*, *Perdidit* notari, ex aliis notis constat, quibus *Indit*, *Perdit* significantur. Videntur igitur antiqui scripsisse *Diduit* pro *Duit*, Graecum διδόω fortasse respicientes.

h) Quum in optimis libris hoc nomen pluraliter efferatur, eodem etiam numero id adscripsit interpres. Attamen vereor ne in notae figura error sit, qui facile corrigatur, si lineam curvam, quae in litera A inest, acutam reddideris, quo facto M fiet, quod modo A erat.

i) Versus duodecim syllabarum. Insuetum vocabulum ex Δυώδεκα et Σύλλαβος compositum.

k) Duae sunt notae unius ejusdemque fere formae, quarum altera apud Gruterum explicatur *Dyrachium* (170), altera *Dirachium* (138), quasque unum idemque oppidum *Dyrrachium* significare olim quidem putavi. Jam vero persuasum mihi est, *Duracinum* significari ea nota, quam in collectione praecedunt *Pampinum*, *Dumosum*, *Granarium*. Parum me movet scribendi ratio, qua G cum C commutatur. Saepenumero enim id fieri, supra (§. 311) dixi.

l) Haec quidem nota ab illa *Duracinum* terminationis loco dignoscitur, quae in nominibus urbium infra ponitur. Substituas velim hanc notam ei, quae per errorem in primo volumine (§. 311) posita est.

m) Hodie *Evreux*. Magis notum apud antiquos *Eburovicensium* nomen.

n) Documento est haec nota, vel priscos Gruterianae collectionis auctores non semper bene legisse; qui, similitudine conjunctarum literarum EC et TC in errorem inducti, populos *Tictinos* finxerunt, qui numquam fuere.

o) *Edubium* quum inter cibaria compareat; *Edibilium* esse conjeci, quod medio aevo usu venit (Carpent. gloss.). *Ebullitum*, inusitatum compositi verbi participium, legissem, si non obstaret ratio scribendi notariorum, qui in compositis primam verbi simplicis literam raro servarunt (§. 243).

p) Vitium in notae terminatione esse suspicor, qua quidem mutata, *Effetus* legere possis.

q) Cangius hoc nomen, quod in notis Tironianis inter vasorum genera positum est, ab Hydria deducit, idemque esse putat, quod Gallorum *Aiquiere.* Adelungius Germanorum *Gelte*, quod vas ligneum significat, adscribit. Sed vereor, ne viri docti, inter-

pretatione notae adscripta decepti, fictae vocis etymon frustra quaesiverint. Equidem ex notae literis *EGe* lego Ἐγγυθήκη, repositorium vasorum.

r) *Exanclare* verbum fuisse, Quintilianus (I. 6. p. 54) docet; sed monente nota ipsa, quae procul dubio cum *Lancinat* composita est, *Elancinat* reposui.

s) Casselanus liber *Hillanum*. Nota inter *Sulpur* et *Galena* inserta est. Si quis forte nostrae interpretationi diffidat, primum notae characterem I esse putans, is notam *Eleutherium* cum hac comparet, memineritque, literam E hoc loco ad eandem formam pictam esse, quam supra (§. 105) descripsimus, dimidiamque ejus partem in subsequenti L involutam.

t) Qui *Elefans* legit apud Gruterum interpres, syllabam *ans* in nota inesse statuit, quae literis Ph junctis simillima est. Quare non refragabimur, si quis nostrae illam substituerit analysin.

u) Notum quidem vocabulum est, sed sequitur *Delixum* omnino ignotum: quare haud scio, an vera utriusque notae lectio sit.

x) Populi ex Caesare et Plinio noti. Satis decernere nequeo, utrum singulariter notatum sit *Elusatis*, an ex negligenti pronunciatione E et I literae confusae sint.

y) Similitudine literarum E et I jacentis deceptum interpretem a vera lectione aberrasse, nullus dubito.

z) Graecum vocabulum, solium balnei significans. Lectio indubia est, quoniam hoc loco de balnearum partibus agitur.

a) Pro *Comminiscitur* usurparunt hoc vocabulum sequioris aevi scriptores: unde etiam *Ementum* (Cang.).

b) Haud esse a verbo *Enecare*, alia nota docet, qua *Enecat* significatur. Equidem legere malim *Ecce autem*, quum duas horum adverbiorum alias notas in hujus figura inesse pateat, atque etiam in collectione proxime antecedant *Ecce*, *Em*, *En*.

c) Certe vitiosa lectio est *Aenephus*. Neque enim nota a diphthongo incipit, neque id nomen usquam reperitur. *Enejus* vero lapidi insculptum est (Grut. 540. 6).

d) In nota ipsa *Innormis* legitur, ratione scribendi satis antiqua, testante edicto Turci Aproniani (Grut. 147. 7).

e) *Ensiculus* lego. Nota enim puncto terminata liberum facit arbitrium. *Ensicula* singulariter dicitur Probo (ap. Prisc. 3).

f) Diphthongus, quae in nota inesse videtur, fortasse Graeco η substituta est.

g) Meliorem notarum *Epigramma* et *Epigraphe* interpretationem si quis dederit, ei libenter accedam.

h) Ita quidem posui de conjectura mea, et exstat Dialogus Platonis hoc nomine insignitus; sed refragatur series verborum, quae omnia cum vocabulo *Nomen* composita sunt. Quapropter, ex utraque lingua constructum esse insuetum hoc vocabulum, superius (§. 192) dixi.

i) *Epitolium* corruptum esse videtur. *Epistylium* legere vetat syllaba *to*, quae in nota est conspicua. *Epistomium* vero lectio eo se commendat, quod de balneis hoc loco agitur (Baccius de thermis. Cap. IX. f.).

k) Quod inter oppida Italiae legitur *Epitectum*, mihi quidem ignotum; quare *Epiterpum* lego, quod Straboni (L. 5. p. 214) parvum ad mare Adriaticum oppidum est. Ptolemaei *Opitergium* idem fuisse videtur.

l) Iterum alia nota notatum comparet inter nomina *Mappa*, *Culcita* et *Pulvinus*. Pro certa interpretatione non nisi conjecturas adferre licet. Sit igitur Graecae originis vocabulum, sive ab 'Επιθολόω, obscuro, ut significetur velum, vel lodix; sive *Epiclintrum*, 'Επίκλιντρον (Bulenger. de conviv. C. 29. f.). *Epistylium* enim inter cetera illa vocabula notari, vix credibile est.

m) *Ergasticus* legere mavult Cangius. Ego vero Gruterianam lectionem intactam servavi. Quum enim *Ergata* praecedat, *Ergaticus* derivatum ab illo esse apparet, quod purum Graecum Ἐργατικὸς est.

n) Utrumque, et *Erucius* et *Eruccius* antiqui habent lapides (Grut. 241. 869. 14. et 938. 12).

o) Invitus adscripsi Gruterianam lectionem *Erycina*. Quum enim haec nota excipiat verba *Runcinat*, *Eruncinat*; commodior profecto esset interpretatio *Runcina*. Hoc vero no-

men, sive error sit in notae figura, sive in analysi mea, ex notae characteribus nullo modo elicere possum.

p) Sunt quidem, qui *Aesquilis* scribant; sed ab E sane incipit nota. Quid vero *Esquiliae* inter verba ab *Esca* derivata? quid id, quod sequitur, *Esquilis et Aquila?* Errorem esse in interpretatione suspicor. *Esculis* fortasse legendum, ut sit ab *Esculus*, cujus arboris nomen ab *Esca* ducit Isidorus (Orig. 17. 7). Syllabam *cu* saepius notatam esse litera Q, ne tironi quidem ignotum (§. 131).

q) Quodsi lectio *Esculis* probatur, arboris hujus cum *Aquila* conjunctio facilius intelligi potest. Utraque enim *Jovi* sacra. Ex ipsa vero nota non nisi unum vocabulum *Escula* elicere possum, ne *Esculea* quidem, manente terminatione in eodem loco, quo in *Esculis* est (§. 290).

r) Abest a libro Casselano. Neque hoc intelligo, neque, quod praecedit, *Evadaticiae.*

s) Notae terminatio *Eurota* quidem legere jubet; sed inter cetera fluviorum nomina certe intelligendus *Eurotas*.

t) Ex duabus his notis illa ex collectione Gruteriana, haec melior ex libro Cassell. est.

u) Adjectivum *Examantissimus* in scriptis medio aevo legitur (*Cang.*).

x) Quid intersit inter *Exasperat* et *Exasprat* verba, diversis notis notata, nemo erit qui

63

intelligat. Equidem ex notarum forma conjicio, pro *Exasprat* legendum esse *Exasperat*, et pro *Exasperat* reponendum *Exsternat*. Certe *Sternit* in Collectione proxime sequitur.

y) Addidit hanc notam Gruterus in adnotationibus suis ad Collectionem. Quae autem hoc loco commentatur, documento sunt, eum ne a limine quidem salutasse artem notandi. Notae terminationem, quae *at* est, *Jota* appellat, et literam K, quae in nota *Excastra* (l. *castris*) est, *Lambda* dicit!

z) Corruptum vocabulum esse pro Graeco ἐξήρης, supra (p. 446. k) exposui.

a) Error est typographi. Lege *Exsoletum* ab *Exsolesco*, quo verbo Tertullianus utitur.

b) Nisi me omnia fallunt, *Expatat* legendum est, quod verbum Festus (Gothofr. 285) explicat *In locum patentem se dare*, atqui a *Patere* id ducere videtur. In Collectione etiam inter derivata ab eodem verbo est.

c) De meliori notae explicatione desperans *Exuit* quidem adscripsi; sed parum ipse meae interpretationi fido, quandoquidem haec nota ex primitiva *Suit* fluxisse videtur. S litera me non moveret, si cetera non refragarentur. Saepius enim literae X temere additam esse illam, notissima res est. Quid? quod in vocabuli *Exuviae*, quod ab *Exuo* etiam originem trahit, notam eadem litera irrepsit.

d) Non obstante litera S ita lego, quum in Collectione praecedat nomen *Exsequiae*.

e) Vix credo, a bonis auctoribus usquam *Febrotiriam*, quod nomen notae adscribitur, appellari civitatem, quae Ciceroni, Juvenali, Vellejo, et Silio Italico *Fabrateria* est: unde etiam *Fabraterni* apud Livium, Plinium, et in lapidum titulis (Grut. 1095. 6).

f) Deesse aliquid in nota videtur, sive punctum sit, sive linea transversa, X literae officio fungens.

g) Id est Fanestrem coloniam inhabitans. Gruterus perperam *Eanitas*, liber Cass. *Fanister* habet. Terminatio *ter* in nota ipsa inesse videtur, nisi malueris hanc ejus partem interpretari N.

h) Lege *Fastiscit.* Perperam subjicitur *Foetescit*, quod aliam occupat notam (p. 145).

i) Neque nota ab illa, qua *Faustus* notatur, descendere videtur, quum desideretur litera T; neque *Faustuarius*, quod adscriptum est, intelligo. Ex usitata notandi ratione *Fatuarius* lego. Etenim medio aevo *Fatuarii* dicti, qui futura hariolantur (Carp. gloss.).

k) Nota terminatur syllaba *or*: cujus orthographiae causam Quintilianus (I. 6. p. 51) prodit.

l) In glossis Isidori haec Dea, de qua antiqui auctores consulendi, *Dea agrorum* dicitur.

m) Nomen *Focis* quum ignotum mihi esset, verbum *Focit* substitui, quod quidem aeque obscurum videtur, sed pro *Focillo* olim dictum esse ex Glossario Latino Graeco (Martini Lex.) patet. In eo enim leginus: ψωμίζω, *Focio*, adesco, allicio. Postea autem, quam haec scripseram, ipsum nomen *Focis* a sequioris aevi scriptoribus pro fluvii ostio (Cang.), vel canali (Voss. vit. serm. 2. 7) usurpatum esse, didici. Servanda igitur Gruteriana lectio esse videtur.

n) *Pontalis* apud Gruterum manifestus error est, quem correxeris, si vel *Fontalis*, vel *Fontanalis*, vel *Fontinalis* legas. *Fontalis* medio aevo invaluit (Cang.).

o) Libri Casselani *Firmitudo* lectio melior est.

p) Per literas, quas paucas nota complectitur, *Fornicatrix* etiam legere licet, quo nomine Isidorus utitur pro *Fornicaria.* Sed magis placet *Fornix*, quia *Lupanar* in Collectione praecedit, *Leno* sequitur. *Fornex*, quod liber Cassel. habet, haud inusitatum olim fuisse, Glossae docent (in Lex. Mart.), quae *Fornex* interpretantur πόρνη, καμάρα.

q) Melior videtur lectio *Fors Fortuna*, eique Tironiana hujus notae scriptio minime adversata esset, si prolongatum calami ductum literam *S* interpretaturi fuerimus, aeque ac in nota *Fossa* eundem interpretati sumus.

r) Apud Gruterum *Fulsit* quidem est. Sed emendationem nostram nota ipsa efflagitat.

s) A *Fundere* deduci, series verborum prodit. Quum igitur *Fusicium* vocabulum mihi

prorsus ignotum esset; *Fuscinum* legi, ita tamen ut mutato genere *Fuscinam*, quod a *Fundere* sunt qui ducant, intelligi velim. Haud raro enim aliis generibus neutrum substituunt Collectionis auctores.

t) Licet insuetum nomen sit, facile tamen colligitur, significari eum, qui *Fusuram* curat.

u) Quum nota puncto terminetur, haud scio, utrum legendum sit *Gabalus*, an *Gabalis*. Utroque enim nomine appellatur Galliae Aquitanicae populus.

x) Aegre procedit hujus notae analysis. Difficillima enim lineae, ex G surgentis, interpretatio est. Modo T in ea latere, modo ex aspera pronuntiatione additum H (§. 311) esse literae G suspicatus sum. Neutrum dubio caret.

y) *Galenum*, vel *Calenum*, vas vinarium dicunt glossae Isidori; sed inter metalla quum inseratur, praevalet lectio *Galena*. Mira tamen initialis K litera; quam nisi eo consilio, ut A simul exprimeretur (§. 117), adhibitam esse dixeris, alia ratione eam excusare vix poteris. Veniunt quidem in mentem Graeca καλάϊνος et καλλαίνος; sed melior videtur interpretatio *Galena*.

z) Pluralis videtur notatus, quia *Gallicinia* numerabantur, prima, secunda, cet. (Ammian. 22. 14.).

a) Hujus vocabuli, quo antiquiores scriptores non utuntur, ablativum casum posuisse videntur notarum collectores, ad evangelium Johannis (8. 20) respicientes (v. p. 414. f.).

b) Ita interpretatus sum, licet haud dissimulandum sit, notam ipsam habere *Genesalia:* quod vocabulum ex Graeco γενέσια fortasse factum ad modum aliorum nominum, quibus festa distinguuntur.

c) *Genita Mana*, ut meram conjecturam, addidi, quandoquidem *Genimina* vocabulum in classicis libris nequiquam quaeras. Quum vero haec nota, quia in libro Cass. haud reperitur, posterioribus demum temporibus inserta esse videatur; illud vocabulum auctoritas etiam recentiorum scriptorum tueri potest. Papias *Genimina* germina esse tradit: et Vulgata (Luc. 3. 7) *Genimina* viperarum habet.

d) Inter nomina propria legitur, atque etiam *Genius Pompejus* sequitur. Profecto error fuit librariorum, qui *Gn.* in interpretatione notis adscripta explicarent *Genius*. *Gnaeus*

Lentulus et *Gnaeus Pompejus* debebant legere, quae nomina omnibus nota. Quintilianus (1. 7) bene docet, *Cneum* eam literam in praenominis *nota* non accipere, qua sonet. Hisce perpensis incidit mihi suspicio, falsam etiam esse lectionem notae quae praecedit *Genius*, reponendumque *Gnaeus*. Certe *Genius* alia nota notatur.

e) Interpolatam hac nota esse seriem verborum, liber Cassel. arguit, in quo haud conspicitur. *Gergesaci* גִּרְגָּשִׁי (Gen. 15. 20), populus terrae Chananiticae. *Gergesacus* filius Chanaan. *Gergeseos* sine diphthongo scribit Prudentius (Hamart. v. 413).

f) *Glabinus* in libro Cassel. est. Enumerantur quidem hoc loco nomina propria, sed istud ignotum, atque a *Glabrione* derivatum analogiae repugnat, secundum quam ab ejusdem terminationis nomine *Scipio* declinatur *Scipionarius* (Varr. 8. p. 145 ed. Bip.). Quare equidem conjicio, legendum esse *Gabinius* (Cic. pro l. Manil. 17. 19. Dom. 9. Caesar. Liv. cet.)

g) Nisi in notis nusquam legitur. Fortasse a medicis cusum est vocabulum ad significandum hominem, qui glaucomate laborat.

h) Hanc notam et aliam, cui *Conglomerat* apud Gruterum adscriptum est, incertus utrum legendum sit *Conglobat* et *Conglomerat*, an *Globat* et *Glomerat*, utroque loco inserui.

i) Nomen proprium significari, locus indicat, quo nota comparet. *Gulussam* esse conjicio, Masinissae filium et Massivae patrem (Sallust. Jug. 5. et 35).

k) Alio modo *Natus* notatur. Videlicet ex Grammatici Frontonis (Gothofr. 1333) sententia diversus hisce vocabulis sensus inest.

l) Absque dubio legendum est *Golias*, et intelligendus gigas גָלְיָת. Quum enim declinari peregrinum hoc vocabulum non possit, *Golias* nominandi casu scripserunt, perinde ac Prudentius (in Psych. v. 291. p. 31) quarto casu dixit: „Vidimus horrendum „membris animisque *Goliam*" cet.

m) Usitatius quidem *Conger*; sed nota haud dubie a G incipit, ut Graecum servetur etymon, quod etiam Plinius (32. 11) observat.

n) Sequuntur *Grandis pecunia* et *Grandis modis pecunia*. *Grandis pecunia* quidem dictio est Plauto, Livio, Ciceroni et Sallustio familiaris. Sed *Grandis modis* quid sibi velit non assequor. Et quamvis, emendato adjectivo, *Grandibus modis pecunia* legas, nihil tamen profeceris.

o) A *Graphium*, diminutivum, quod nusquam reperi. *Graffiolum* medio aevo dictus est Surculus vel ramus arboris (Cang.).

p) *Griphus* pro Gruteriano *Grifus* reponendum esse censui, quia *Catapulta* et *Cataphracta* sequuntur, quibus *Gryphus* nullo modo respondere videtur. Retis vero aliqua cum machinis bellicis cognatio cogitari potest, si laqueum, e muro demisum quo obsessi caput arietis constrictum suspendere solebant (Vitruv. et Veget.), *Griphum* dixeris.

q) A *Gyro* derivatum esse inusitatum hoc vocabulum, utriusque notae comparatio docet. Significare videtur idem, quod Sphaeristerium. De balneis enim hoc loco agitur. *Gyratum* etiam legere licet, et fortassis *Gerontocomium*, *γεροντοκομεῖον*.

r) Praecedit *Hebes*. Utrumque sine S legendum. *Habe* est pro *Ave*. Ita frequenter in inscriptionibus legitur (Gruter. 331. 3). Est etiam Sallustii (Catil. 35. f.) liber scriptus, in quo legitur *Habe* pro *Haveto*. Verbum *Habere* diversa omnino ratione notatur.

s) Tironianarum literarum jam ignarus fuisse videtur interpres, qui literam H omnino neglexit, notae apud Gruterum adscribens *Adrianus*.

t) Vera haec notae lectio, et melior nominis scriptio (Cellar. orth. 108. 161) est, pro qua interpres perperam substituit *Adrimentum*, literarum scilicet, quae in nota latent, nescius.

u) Nota habet *Edus*: quam orthographiae rationem secutum Glossarium Bened. *ἔριφος Edus*, *ἐρίφειον Edina* interpretatur. Antiquissimo scribendi more *Oedus* (Quint. I. 5. p. 37), et Varrone (de L. L. Libr. 4. Gothofr. 17) teste rure *Hedus*, in urbe *Haedus*, et a Sabinis *Fedus* dicebatur.

x) Gruterianum *Honoradia* sensu caret. *Hemoradia* libri Cassel. ad verum propius accedit; neglecta tamen ab interprete est G litera, quam nota dilucidam profert. Tanto igitur majori fiducia *αἱμοῤῥαγία* lego, quanto aptior huic vocabulo inter morborum nomina locus est.

y) Nomen הָגָר intelligitur (Genes. 16. 1), quamvis nota ab A incipere videatur, ut Graeco more scriptum sit Ἄγαρ (Paul. ad Galat. 4. 24). Sed lineam, quae ab A surgit, non nisi H interpretari possum.

z) Licet *Halesum* notatum sit; *Halesam* tamen, Siciliae oppidum, intelligi, ex eo patet, quod *Halesinum* sequitur.

a) Ἄλυκος Siciliae fluvius (Diod. Sic. 15. 17). *Halycienses*, aliis *Halicyenses*, hac nota significari conjeci. Certe Gruteriana lectio *Aliquinsis* haud vera est, quum nota incipiat ab H.

b) Per vitium ligni, cui incisa apud Gruterum est nota, pars figurae excidisse videtur, quam ego supplevi.

Helisaeus. 158
(*Isidor.* 9. 2).
Hellas. k) 158
Helvetius. 158
Helvidius. 157
Helvillum. l) 196
Helvius. 158
Hemicadion. m) 157

c) Sane *Heber* interpretanda est nota, licet *Eber* legenda: quae quidem scribendi ratio a Graecis proficiscitur, qui et ἑβὲρ et ἐβὲρ scripsere, eo videlicet consilio, ut עֶבֶר ab חֶבֶר distinguerent.

d) Equidem malim *Hebe* legere, quia omni terminatione destituta est nota.

e) Inter Romanorum nomina propria haec nota conspicitur. Manifestus error est in interpretatione apud Gruterum *Achala;* sed veri incertus, non nisi ex comparatione cum alia nota, qua *Hejulat* notatur, hanc interpretationem subjeci, licet haud sciam, an umquam auditum fuerit id nomen. Magis notum *Helviae* nomen est (Senec. consol. Cyriaci epigr. Illyr. 1. 2.): sed U rotundum in nota *Helvius* conspicitur.

f) Adspirationem τȣ̃ א observantes ita notarunt nomen, quod a Graecis Ἐλιακεὶμ scribitur.

g) Hoc urbi nomen teste Plinio fuit, quae postea *Velia* dicta est.

h) *Helius* quidem apud Gruterum legitur: quum vero nota puncto terminetur, Ἥλιος legere licet.

i) Ita quidem reposui pro *Heliotropheum;* haud tamen inficiandum est, notam ipsam syllaba *um* terminari. Verior igitur lectio erit *Heliotropium.*

k) Melior quidem videri potest Gruteriana lectio *Helias,* propterea quod *Helisaeus* sequitur. Sed Eliae prophetae nomen alia nota notatur, quae ab E incipit.

l) Umbriae oppidum (Itin. Anton.). Notatum esse videtur *Ilvillum,* fortasse etiam *H* inest in composita notae forma.

m) *Haebicadium,* quod Gruterus habet, ex Ἥβη et κάδιον compositum esse, vix credo. Nisi *Hemicadium,* ex Graeco ἡμικάδιον notatum fuerit, equidem notam alio modo explicare nequeo.

n) Huic notae, inter aegrotorum nomina obviae, apud Gruterum *Extemus* adscribitur. Quam quidem lectionem, si *Extimo* extremum spiritum ducentem significari statuas, series verborum admittit, haud vero notae figura, quae H et M complecti videtur. *Hemitritaeus* igitur posui. Sed neutiquam asserere ausim, veram esse conjecturam meam. Ceterum membris mutilatus medio aevo *Extemus* dictus esse videtur (Cang.)

o) Versus undecim syllabarum (Plin. epist. 4. 14, et 7. 4. Auson. epist. 4, 81. Catull. 42. 1).

p) Notandi ratio magis ad Graecum 'Ενὼχ accedit, quam ad Hebraeum חֲנוֹךְ.

q) Ad formulas (ap. Lindenbrog in gloss. p. 1402) tantum respiciens Carpentierus, nulla omnino Tironianarum literarum ratione habita, *Foraticum* legit; licet, facta hujus notae comparatione cum nota *Herba*, veriorem interpretationem nullo negotio reperire potuisset. *Herbaticum* vero tributi genus fuisse aeque ac *Foraticum* chartae antiquae docent (Le Blanc Diss. hist. de monet. p. 89)

r) Ex libro Cassel. hanc notam, quam Gruteriana Collectio non habet, supplevi, quo licet *Herbitum* et notatum et adscriptum sit, *Herbitam* tamen civitatem intelligi posse conjeci. Si quis vero notatam terminationem servare maluerit, Isidorum (Orig. 17. 7) adeat, qui „*Herbitum*" ait „vocaverunt pastores, eo quod vice herbae praebeatur pe„coribus, ubi desunt pascua." Usitatius *Herbidum* est.

s) Similitudine literarum H et O deceptus *Herix* legi, quod quidem Perottus (p. 961), Stephanus (2. 500), et Gesnerus (2. 890) idem esse tradunt ac Erinaceus. Perversa insuper scribendi ratione impeditus eram, quo minus veram notae lectionem Ὄρυξ assequerer. Transferenda igitur haec nota in paginam 257 ante eam notam, qua *Operarius* notatur, addendumque: *OR(x). Oryx.*

t) Haud obscuri quidem Italiae populi. Sed nota dat *Hercini*, sive *Hercyni*, neque exponi potest *Hernici*, nisi transpositis syllabis. Major etiam difficultas oritur ex loco, quo eam positam videmus inter *Boeotia* et *Tyrii*. *Hyrcanos* intelligi, literae C figura prohibet, quae I simul complecti videtur.

u) Ante oculos habuisse videntur evangelium Mathaei (14. 6), unde secundus nominis casus (vid. p. 414. f. 510. a).

x) *Esion* et *Insion* ante *Tantalus* in Collectione quum legerem, illaque vocabula haud intelligerem, nomina propria *Hesione* et *Ixion* eis significari suspicatus sum. Sed haec mera est conjectura.

y) Licet nota ipsa Gruterianam lectionem *Hiterogrania* tueri videatur; haud dubie tamen explicatio nostra magis intelligitur.

z) Subscriptum *Hibridia* error est, qui ex primo volumine (p. 344) in hoc quoque irrepsit, utroque loco corrigendus.

a) Barbara haec enuntiatio olet aevum auctoris, qui hanc notam Collectioni inseruit.

b) Ita reposui pro *Hiemsal*, quod apud Gruterum, et pro *Hiemsalis*, quod in libro Cass. est. Nomen enim fuit filio Micipsae, regis Numidiae (Sallust. Jug. 5). *Adherbalis*, qui primogenitus fuit, nomen reperias in prima Lexici parte (p. 6. f.), licet in hac altera (p. 419) per incuriam omissum sit.

c) Dixerit fortasse aliquis, notam *Hierocorax* aeque explicari posse. Minime vero. Nota

enim primitiva, a qua derivatam illam esse Collectio docet, *Ce* habet. In lapidis titulo (ap. Grut. 27. 4) *Hierocεryx* omnibus literis perscribitur: quo quidem loco P. a Turre (*mon. vet. Antii.* 1700. p. 190) *Hierocorax* legit; sed, *Gruteri* librum ipsum evolvere supersedens, nonnisi Reinesii (p. 95) oculis vidit.

d) Non nisi apud Philoxenum Ἱεροσαλπιγκτής Graece quidem scriptum reperi hoc nomen.

e) Interpres adspirationem addit, quae a nota abest. Apud Orosium (4. 6) et in meo Justini (19. 2) exemplo nomen hoc *Imilco* scribitur.

f) Oenomai filiae nomen hoc loco notari, ubi animalia nominantur, vix credo. Melior videtur lectio *Hippodama*, quam liber Cass. habet. Capra enim in Collectione praecedit. Sit igitur ex utraque lingua compositum nomen, quod quidem alibi non reperio.

g) Inter nomina propria est, atque vox sonat Ἱππορητός! At numquam auditum fuisse hoc nomen mihi persuadeo, erroremque esse suspicor in altero notae *P*, ut legendum potius sit *Hyperides*.

h) Non populi Hyrcani, sed viri nomen Ἱρκάνος (2 *Mach.* 3. 11), esse videtur.

i) Inter nomina propria legitur. Fortasse *Herennulejus* est (Grut. 941. 7. et 1077).

k) Nota habet *Umerale.* Similiter a notis *Humerum*, *Humor*, et derivatis, adspiratio abest. Eandem scribendi rationem reperias in Pandectis Florentinis (Brisson. Op. min. 396. §. 43).

l) Corrige *Hydra.* Liber Cass. *Idra* habet.

m) Notae figura ex libro Cassel. desumta, verum discrimen ostendit, quod est in notandis *Hydra* et *Hydraules* vocabulis.

n) Hispaniae Tarraconensis pars. Quamvis inconstans in libris classicis sit hujus nominis

scriptio, quum modo *Jacetania*, *Jaccetania*, modo *Lacetania* efferatur; notam tamen ab I incipere perspicuum est.

o) Gruterus habet *Acneumon*, liber Cassel. *Ecneumon*. Vitium esse suspicor in notae figura, cujus primam ante C lineam si ita ⟝ refinxeris, ut plane jacens I sit, ICM(o), id est *Ichneumon*, legere licebit.

p) Nomen proprium in geographica Collectionis parte, cujus a scriptorum nemine mentionem fieri memini, nisi a Thucydide, qui (L. 8. f. p. 617) Atheniensium classem, ad Chersonesum, ait, exporrectam cornibus fuisse ἀπὸ Ἰδάκου μέχρι Ἀῤῥιανῶν.

q) Inter populorum et civitatum nomina inserta est haec nota, quam, licet *Idea*, oppidum Lydiae, et *Idacus*, ab *Ida* declinatum adjectivum, notissima sint, haud tamen ab I incipere, sed potius literas *ED(e)e* continere arbitror, quibus fortasse urbis *Edessae* nomen significetur.

r) Certe emendationem efflagitare videtur interpretatio haec apud Gruterum adscripta; sive legas *Ignobilis cognatorum*, sive *Ignobilitas cognatorum*.

s) *Trojam* hoc loco non intelligi, series verborum docet. Ab *Ile* esse videtur, ex Plinii (20. 5) loco notatum. Sed recto casu singulariter etiam dicitur hoc nomen Isidoro (Gothofr. 1098).

t) Neque enim *Ilcia*, quod habet Gruterus, neque *Chilcia*, quod est in libro Cassel. nemo umquam intelliget. *Illicium* vero hoc loco optime convenit cum antecedentibus *Rete* et *Tragula*, ut esca intelligatur, qua inescantur pisces. Quodsi quis primam literam H esse maluerit (ut p. 158. 159); *Helcium* (Apul. Met. 9), idem quod funis, erit.

u) *Illurgis* Ptolemaeo est in Hispania Turdulorum urbs. Festo (ap. Gothofr. 293) *Illurcis* dicitur, quae postea *Gracchuris* a Ti. Sempronio Graccho nomen accepit.

x) Verbum *Impellare* certe medio aevo usu venit (Cang.). Sed reliqua cum obsoleto *Pellare* composita argumento esse videntur, antiquioribus etiam temporibus illud haud ignotum fuisse.

y) Haud dubie pro *Tribunus* legendum *Tribunitiae*. Incertum vero est, cui ex Imperatoribus, qui Germanici cognomen acceperunt, hic honoris titulus tribuatur. (Conf. Grut. inscr. p. 153. sequ.). Hujus etiam notae lectione confirmatur Manutii sententia, secundo casu legenda esse correpta nomina *Trib. Pot.* saepius obvia, quae vel omnibus literis perscripta sunt in epistolis M. Antonini (Graev. Thesaur. 4. 1952), vel pluribus in inscriptionibus (Plin. 3. 20. Grut. 262. 6. 264. 2. Hard. ad Plin. 3. Sect. 24. Sunt tamen et exceptiones).

z) Germanicum numquam fuisse Imperatorem κατ' ἐξοχήν, Romana docet historia. Fuerunt tamen plures imperatores, sive belli gerendi duces, qui re prospera gesta illo honoris titulo a legionibus salutarentur: quem quibusdam etiam Augustus concessit, ac Blaeso postremum tribuit Tiberius (Tacit. Annal. 3. 74. et 1. 3).

a) Ita Gruterus. Equidem incertus sum, an *Imparatus* sit legendum.

b) Medio quidem aevo *Implanare* verbum haud inauditum fuit, usurpatumque pro Decipere, ut sit a Plano, impostore.

c) Tertullianus hoc nomine utitur. Incuriam significat (Carpent. gloss.).

d) Verbum inusitatum: Nomen vero *Impurgabile* Ammiani Marcelini (22. 3) est.

e) *Aepodixis* quidem sanari potuit, Graecum vocabulum substituendo. Difficilius hoc. Succurrit tamen altera nominis *Epideixeos* explicatio (Reines. Inscr. 261. 262), qua ipsum etiam locum designat, sive auditorium, in quo artis specimina dederunt veteres. Quare *In epideixi* legere possis, mutata tamen notae analysi, ita ut linea figuram persecans haud sit terminatio *is*, sed *x* litera (§. 142).

f) Intellige *Lege*, quod nomen saepius omittitur (Cic. Att. 1. 18). Diversa notae *Ager* forma non sinit legere *In Agro*. Quod si haec emendatio minus placet, lege *In aggere*.

g) Inchoativum verbum esse videtur, quo fortasse usi sunt, quum exardescerent pretia rerum. *Incariare* enim medii aevi scriptoribus idem erat, quod Gallis *Encherir* (Cang).

h) Certe falsus est interpres apud Gruterum, qui secundam notae lineam omnino neglexit. Equidem jam suspicor, ab H incipere notam, sequente L, ut igitur Ἡλιοκαυςὸν, *Heliocaustum* legendum sit.

i) Erravit typotheta: lege *Incomma*. *Anchoma* quidem literis in nota latentibus respondet; hoc vero vocabulum non intelligo, et notarium voluisse *Incomma*, eo magis mihi

persuadeo, quod liber Cass. *Encoma* habet, ipsum paene Graecum Ἔγκομμα. Accedit, ut modica saltim notae immutatione *Encomma* fieri possit.

k) Verior est Gruteriana notae lectio *In concubinato*, ut igitur *concubinatum* recto casu dictum esse videatur.

l) Hujus notae figura fere eadem est, quam habet nota *Incrementum.* Solius terminationis et loci, quo ea reponitur, mutatione notatur *Incrementulum.* *Incunabulum* aliam notam occupat.

m) Venit in mentem verbum *Incrocare*, quod in lege Salica (69) legitur. Sed nota haud dubie a *Crux* descendit.

n) Errorem in notae forma esse suspicor. Namque terminatio *at* lineam inter I et C mediam persecare debebat.

o) Hoc quidem facile sanari potest verba separando. Ita Cicero *in duplum ire*, et Jurisconsulti *in duplum agere* dicunt.

p) Notae, quibus *Invicem* et *Ininvicem* adscriptum est, sese excipiunt. Illa significari *In vicem* disjunctim, hac conjunctim *Invicem*, suspicatus sum. Quodsi prima notae linea prona esset, *Ad invicem* legerem, qui est Graecismus ex Πρὸς ἀλλήλους (Nov. 105. C. 2. §. 3. Vulg. Joh. 19. 24).

q) Suspecta mihi nota, cui hoc verbum in Collectione (p. 153) adscribitur. Minus enim in ea inest, quam in nota; a qua derivatur. Contra vero notis, quibus *Enectit*, *Enexus* (p. 122) adscriptum est, illud verbum significari suspicor, licet ab E incipiant, cujus scribendi rationis causam a neglecta et confusa vocalium pronuntiatione originem traxisse mihi persuadeo. Haud tamen dissimulandum est, *Enectere* verbum medio aevo usurpatum esse (Cang.).

r) Latino *Inultus* barbarum *Inoletus* substitui. Quod ne quis temere a me factum putet, comparet cum hac nota aliam, qua *Inultus* vere notatur, quamque a primitivo Ultus descendere similis quum literae L, tum terminationis forma satis probat. Porro observet notarum *Adultus*, *Adulta*, *Inultus*, *Inulta* in Collectione seriem, quae quidem vocabula sono tantum, non vi ac potestate cohaerent. Quid enim re vera inter se commune habent *Adultus* et *Inultus?* quorum illud ab Adolescere proficiscitur. Accedit, quod *Inoletus*, a verbo Inolescere deductum, huic loco sit aptissimum, et, licet barbarum, olim tamen usurpatum, uti Cangius docet. Equidem suspicor, post *Adultus* non nisi syllabam *In* notatam fuisse, cui incautus librarius, lacunam expleturus, dein adscripserit *ultus* (§. 75). Quo demum facto, quae sequitur nota *Ultrix* ab aliis inserta fuerit.

s) Duae sunt notae, quibus *Integer* adscripsi: quarum quidem altera (p. 178) nulli dubitationi subjecta est, atque interpretationem ejus ratam facit ea etiam nota, quam *Integram* significare docet Confessio fidei, Tironiano charactere exarata (§. 355). Altera apud Gruterum (p. 176) perperam explicatur vocabulo *Iners*, quum litera G manifesta ejus pars sit, proutque picta est, *Integer* quoque exponi debeat. Parvam tamen immutationem primae lineae, quae prona *Ad* significabat ad perpendiculum vero demissa *In* valet, post demum temere factam esse, si ponamus; *Adteger* antea legebatur. Atque ea facilis et apta notarum series in Collectione erat *Adteger*, *Integer*, *Redintegrat*, *De integro*, *Ad integrum*. Quibus vero ignotum istud vocabulum est, in eorum ego gratiam et Festi (Gothofr. 1991) verba appono: „*Adtegrum*, minus „factum. *Integrare*, in statum redigere;" et Scaligeri interpretis, qui „*Adteger*" ait „προςθιγής est, quia tactus et diminutus est. Adtigere enim veteres pro Attingere; ut contra Integer ἀθιγής, ἄθικτος."

t) Carpentierus (in Gloss.) adscripsit huic vocabulo ex glossario veteri verba haec: „quod nec vivus sit nec mortuus." *Internecivum* legere terminatio vetat.

u) Nota habet *Intiba;* quod idem esse Papias docet.

x) Hoc quidem vocabulo Gellius utitur. *Invitalis* autem, cui illud subjeci, prorsus ignotum est. *Vitalis*, quod apud Gruterum praecedit, a libro Cass. abest.

y) Neque notae forma, neque verborum series huic interpretationi respondet. Equidem lego *Inurbanus*.

z) In sectione geographica haec nota legitur, quae *I(s)C(l)i* literas comprehendit. Populi vero nomen ignotum est. Quantum ego conjectura assequi possum, ab *Isca*, Mysiae fluvio, quem *Oescum* Plinius (3. 26), *Escum* tabula Peutingeriana nominat appellati sunt. In Mysia etiam civitatem *Oescum Triballorum* fuisse, Ptolemaeus. (3. 10) auctor est. Quos Triballos hodie Bulgaros esse, Raph. Volaterranus (L. 8. p. 92) tradit. Haud scio, an *Eschibaba*, quod Turcae adhuc *Ischeboli* appellant idem, quod *Iscaballi*, nomen sit.

a) Gruterus *Hilistrionicis* habet, in quo corrupto vocabulo ne *Histrionicis* latere suspicarer, et notae figura fecit, cui L inesse videtur, et contextus vocabulorum: *Pythicis, Nemeonicis, Isthmicis, Olympionicis, Actiacis, Hieronicis*, atque quod subjeci *Iselasticis*. Solis enim *Hieronicis* *ἐισελαύνειν* fas erat (Scalig. de Em. temp. p. 477), atque histrionibus cum hieronicis commune nihil umquam fuit.

b) Eandem figuram, omisso tamen puncto, liber Parisiacus (§. 342) eo loco, ni fallor, ubi apud Gruterum (p. 3) nota *Ipsi* est, interpretatur: *Ita etiam.*

c) Ita, vel *Juri dicundo* (Liv. 22. 35), vel *Jure dicundo* (Idem 34. 48. Sueton. Jul. 7), vel *Jure dicendo* (Id. Aug. 97. Claud. 33), legi malim, quam, quod repugnantibus principalis notae literis interpres adscripsit, *Jurejurando.* Quo vero clarius diversa scribendi ratio perspiceretur, aliam notam (p. 190) composui, qua *Jurejurando* notari debebat.

d) A notae quidem literis non abhorret interpretatio, attamen obscura est. Finxerit fortasse aliquis hoc vocabulum, quia proxime sequitur (in libro Cass.) nomen *Pharisaeorum*, quos juris studiosos fuisse constat. *Jebusaeus* legerem, si per notae literas liceret.

e) Paulum quidem differunt notae, quibus idem vocabulum notatur; sed altera (Grut. 153) a libro Cass. abest.

f) Hoc etiam loco Plinium (4. 19) ante oculos habuisse videntur Collectionis auctores. Sicut enim ille inter Galliae Aquitanicae populos laudat *Consorannos*, *Basabocates*, *Latusates*, *Elusates*, *Osquidates montanos*, *Osquidates campestres;* ita etiam Collectio habet *Consorannos*, *Vasates*, *Lacturates*, *Elusates*, *Obsedatos montanos*, *Obsedatos campestres.* Jam quod adtinet ad *Lacturates*, sive *Lactorates* commode nota explicatur ex ejus radice, quae est nota *Lac*, cuique additae sunt litera T et terminatio *is.* *Lactura* oppidum habes in Itinerario Antonini, et *Lactoratium* civitatem in Notitia Galliae. Hodie *Leyctoure* dicitur, sive *Letoure* in Arminiaco Galliae Aquitanicae; ubi etiam lapidum tituli sunt, in quibus civitatis *Lactor.* et *Lactoraten.* (Grut. 29. 14. et 30. 1) mentio fit. In tabulae Peutingerianae fragmentis (Velser. op. 727) populi leguntur *Lactorates*, quae quidem lectio optime convenit cum Tironiana hujus nominis scriptione; et Plinii *Latusates* ipsos esse *Lactorates* vix est quod dubitemus. Nonne igitur miremur audaciam Harduini, qui apud Plinium prorsus expungens *Latusates* substituit eis, omni etiam librorum scriptorum auctoritate destitutus, *Tarusatium* nomen. Utinam salva et intacta, quae in libris scriptis sunt, critici tuerentur, adnotasse contenti, si quid melius videant! Errata veterum auctorum, si quae sint, servari multo praestat, quam eorum scripta immutari.

g) Secunda notae litera G est, non C. Saepius commutatas esse hasce literas apud antiquos, (§. 311) vidimus. Ita etiam in glossis Cyrilli λάγυνος vocabulo *Lacuna* explicatur, quod omnino *Laguna* est, pro *Lagena.*

h) *Lecebra* est seductio, vel occulta blanditio (Cang.). Althelmus scribit *Lacebra;* sed corruptam esse lectionem suspicatur Vossius (de vitiis sermon. 3. 18).

i) Neque Gruterianum *Languena*, neque, quod magis notum est *Lagena*, ex hac nota elici posse, quilibet literarum Tironianarum non omnino rudis perspiciet; licet series verborum, quoniam *Amphora* praecedit, lectionem *Lagena* efflagitare videatur. *Lampadephoria* quidem adscripsi; sed certi quid de hac nota, quae a libro Cass. abest, et a recentiori quodam ficta esse videtur, statuere non ausim. Error fortasse in ipsa notae figura est, in qua si litera P transmutatur in N, *Lagena* legere licet. Ex reliquis literis obscura illa, quae O esse videtur, aeque G esse potest.

k) Apud Gruterum *Lacina* legitur, quam *Lanciam*, Lusitaniae urbem esse conjeci eo quod *Lusitanus* proxime sequitur; sed *Lancinaa*, vel potius *Lancina* in nota inesse videtur.

l) Gruterus quidem *Lapidicinae*, (Voss. de vitiis serm. 1. 13) habet. Quum autem nota utramque lectionem admittat, meliorem amplexus sum.

m) Gruterianum *Lasernacium* sensu caret. Quum vero *Laserpicium* praecedat; Plinium ante oculos habuisse Collectionis auctores videntur, qui (19. 3) *Laserpitium* ait *in* Cyrenaica *provincia repertum*, et paulo post *Laser Cyrenaicum* ab alio distinguit.

n) Simplex hujus verbi nota est, sicut derivatorum *Allatum*, *Ablatum*, *Collatum* cet. Sed terminationem *tum* notarius apud Carpentierum (46) addit.

o) Ita reposui pro *Lassamen*. Est autem habena, a laxando sic dicta ferreo Latinitatis aevo.

p) Cangii haec conjectura est, cui quidem literae C forma non omnino respondet. Glossae Isidori habent „Lectistium, statio lecti;" ubi fortasse *Lectistitium* legendum, ut sit a *Stare*, sicut *Interstitium*, *Antistitium*.

q) Tironianae scripturae ignorantia lapsus Carpentierus hanc notam, in syllabam *ne* desinentem, atque bis in eadem pagina comparentem, constanter adverbio *Legitime* interpretatur.

r) Duae sunt notae, quibus Leo notatur, sed altera Λεὼς significat, altera Λέων. In utraque vero V pro O inesse videtur.

s) Gruterus habet *Laether*, liber Cass. *Lether*. Quum *Cocytus*, *Tartarus*, et (Cerberi) *Antrum* antecedant; *Lethe* legendum esse conjeci.

t) Invitus ita lego pro Gruteriano *Loetificat*, quia a nota *Letum* haec descendit. Substituta tamen terminatione *us* pro *at*, vocabulum intelligitur (vid. p. 480. a).

u) Notissimi quidem sunt *Leuci*, Galliae populi; sed regionem, quam inhabitarunt, *Leuciam* dictam esse, non nisi ex hac nota, quae quidem minime dubia est, discimus.

x) *Liburnica* et *Liburna* navis intelligitur, ubi Gruterus habet *Liburnicus* et *Liburnus*.

y) Hodie *Livorno*. Sequitur enim in Collectione *Ligurus*. Longe differt notae forma ab illis, quibus *Liburna* et *Liburnica* navis notatur. Recte quidem. Haud enim ab Italiae oppido, ut Zosimi fert opinio, naves id nomen traxerunt, sed ab Illyrico populo (Steph. Byzant. in *Λιβυρνοί*, et Appian. de bell. Illyr.)

z) Haud dubie falsa apud Gruterum (p. 49) est notae interpretatio *Legatarius;* magis etiam falsa ejus, quae sequitur, *Quintus legatarius.* Notatur enim nomen proprium ex Cicerone nemini non notum.

a) Inter luminum genera quum legerem *Lignithis*, ut primam nominis syllabam servarem, reposui quidem *Lignythis*, suspicatus, medio aevo a λιγνὺς, Flamma, barbarum hoc verbum confictum esse. Quoniam autem ne apud infimae quidem aetatis scriptores reperitur; ampliorem etiam Gruterianae lectionis emendationem necessariam esse arbitror, legendumque *Lychnitis*, quod quidem herbae genus est, sed ea de causa cum praecedenti nota *Lucerna* conjunctum, quod Plinius (25. 10) folia ejus ad lumina in lucernis apta esse tradit. Est et *Lychnites*, marmoris genus, ita appellatum, quoniam ad lucernarum lumina in cuniculis caedebatur (Plin. 36. 5); attamen praevalet lectio *Lychnitis.* Quod restat, si quis *Lychnuchus* legere maluerit, alia notae analysis adhibeatur necesse est, statuendumque solas literas LH notae figura comprehendi.

b) Ne mireris, me pro eo, quod apud Gruterum est *Licola* legere *Ligula*, quamvis alia adsit nota, cui *Lingula* adscribitur. Diverso enim sensu haec vocabula a Collectionis auctoribus accepta esse videntur. *Ligulam* eis fuisse lorum, quo calcei ligantur, series verborum docet. *Lingula* vero a *Lingit* ductum esse, ex utriusque notae comparatione perspicuum est, ideoque forsitan cochleare significare hoc vocabulo voluere. Haud quidem ego doctorum virorum sententiae subscribere ausim, qui Martialem grammaticos perstrinxisse arbitrantur distichis (L. 14. E. 120).

Quamvis me ligulam *dicant equitesque patresque,*
Dicor ab indoctis lingula *grammaticis.*

Poeta enim ipse alibi (2. 29. et 8. 59) utroque utitur nomine, unde patet, eum nullum diversae scribendi rationis respectum habuisse. Charisius vero ex grammaticis fuit, qui *Lingulam* a *Ligula* distinguerent: cujus ego locum (ap. Gothofr. 1361) male sanum ita restituendum esse, nullus dubito: „Lingula cum" (dele *non*) „a „linguendo dicta est, in argento; in calceis vero *Ligula*" (dele *n*) „a ligando. Sed

„usus *Ligulam* sine *n* frequentat:" videlicet ut eodem hoc vocabulo utramque rem et cochleare, et lorum, appellare liceat. Omnino necessariam esse hanc emendationem, eo magis mihi persuasum est, quod Charisius non id agebat, ut unum idemque verbum plures habere significationes doceret, sed ut sonu similia tantum distingueret. Quod quia in ceteris exemplis apud eundem auctorem animadvertimus, certum est, eum primo loco *Lingula* et inferius *Ligula* scripsisse, nequaquam bis *Lingula*.

c) Inter linteamina ignoto huic vocabulo locus est. Haud scio, an sit *Levitonarium*, id est vestis quaedam, qua monachi Aegyptii utebantur. Etenim B, in nota conspicuum, pro V positum sit. Certe Isidorus (19. 22) *Libitonarium* pro Levitonarium scribit; et in Graecam etiam linguam pravam hanc scribendi rationem irrepsisse, testis est Suidas, qui Λεβητωνάριοι habet.

d) Omnino restituenda est Gruteriana lectio *Linamentum.* Neque enim *Linteamentum* intelligitur, neque, quod ei substitutum vides, *Linteamen* placet, quum hoc nomen aliam notam occupet. Sed Gruteriana notae figura corrigenda est ex libro Cass. quod equidem (p. 211) feci, vera etiam interpretatione adscripta.

e) Nisi sit *L. Virginius*, quod adscripsi, certe *L. Varginteius* (Sallust. Catil. 17) legendum.

f) Equidem legere malim *Ludus*. Quid enim coloris nomen medium inter verba a *Ludere* derivata?

g) Non nisi dubitans reposui hoc vocabulum pro *Limfidum*, monente verborum serie. Nihil enim prohibet, quo minus etiam *Limpidam* legas.

h) Haec Gruteri lectio servari nequit, nisi notae analysi ita facta ut ego eam adscripsi. Sed secundum nominis casum haud significari, punctum additum arguit. Recto igitur casu *Lyncis* dictum esse pro *Lynx*, statuendum; vel, mutata notae analysi, legendum *Lyncx*, siquidem transversa illa linea, quam interpres syllabam *is* putavit, etiam X esse potest.

i) Gruterus *Lita* habet. *Lyta* conjeci, quod nomen in praefatione ad Digesta (Constitut. *Omnem reipublicae* §. 5) legitur. Sequitur in Collectione *Litura*, quod fortasse etiam a λύω deduxerint, ut sit quasi solutio literarum. Quod enim solvitur, deletur. Verius tamen etymon esse videtur supinum verbi *Lino*.

k) Nihil refert, *Maceries* legas, an *Maceriae*: utrique eadem vis est. Illud Prudentius, hoc Isidorus habet. *Maceria* singulariter in optimis libris scribitur. Apud Suetonium etiam videant, quibus contigerit libros scriptos inspicere, num (Ner. 33) *Materia* scriptum, quod ego *Maceria* mallem. Certe a saeculo nono ad duodecimum tanta saepe literarum c et t est similitudo, ut vix discerni queant.

l) Dubitationis causa est in terminationis loco, quem in nominum propriorum notis raro infra esse videmus. Quum vero exceptiones sint in notis *Britomarus*, *Petronius*, *Pontidius*; etiam hac nota *Macrinus*, nomen viri significari eo magis conjicere licet, quod haud semel id reperitur in lapidibus insculptum (Gruter. 720. 4. et 513. 1).

m) *Macror*, vel *Marcor*. Nota quidem utramque interpretationem admittere videtur; sed illud solius Pacuvii est (Gothofr. 561), hoc satis frequens. Gruteriana igitur lectio eo melior, quo magis, notae radici, quae *Marcet* est, respondet.

n) *Menander* quidem pluribus viris nomen fuit; quoniam autem inter fluviorum nomina compareat haec nota, haud dubie falsa est lectio Gruteriana.

o) Hanc lectionem subjeci Gruterianae *Mancus*, eo quod nota inter nomina propria comparet, ex quibus *Manciorum* (Gruter. 918. 1) quidem nomina, haud vero *Mancorum* umquam fuisse novi.

p) Haud quidem legitur in nota; sed hujus terminationem mutandam esse censeo, quia *Manilis* nomen proprium prorsus ignotum est.

q) Fluviorum nomina sequitur *Moreontes*, quo corrupto nomine absque dubio significatur *Mareotes*, Africae palus.

r) *Massipiarius* nullo modo intelligitur, unde *Mancipiarius* hoc loco legendum esse, conjecit Cangius (verbo *Manciparius*): qui, si Tironianarum literarum peritus fuisset, vanam hanc conjecturam illico abjecisset. Audacem vero esse eam, quam proposui, fateor, quum ex *Marsupio* fieri *Marsupiarius* nisi ex me nemo adhuc audierit. Sed notae figura docet, MarSupiaRrius legi posse, eamque lectionem series verborum suadet, quae quidem haec est: „*Plagiarius*, *Sutelae*, *Marsupiarius*, *Stropha*, *Chaldaeus*, „*Magus*, *Mathematicus*, *Psyllus*." Qui omnes ex genere sunt praestigiatorum: quin etiam *Sutelae* dolosae sunt machinationes. Atqui in his *Marsupiarium* eundem esse conjeci, qui nobis *Beutel-Schneider*, Gallis *Coupeur de bourse*, Tertulliano *Manticularius* est. Riserit fortasse aliquis protervum interpretem: sed etymologis et criticis quidlibet audendi semper fuit aequa potestas. Conjecturae conjecturam qui addere voluerit, legat *Mascarpionarius*. Qui enim *propter* Mascarpionem *ingemuit* apud Petronium (134) *Encolpius*, amissam fascinationibus virilitatem deplorat: quare pace doctissimorum virorum, qui hunc Petronii locum emendare conati sunt, nihil mutandum esse censeo. A *Mas* et *Carpere*, idem quod Minuere, Deprimere, scurriliter compositum et fictum esse hoc nomen videtur, aeque ac a verbo *Capere* nomen *Capio* descendit, et compositum *Usucapio*. *Mascarpionarius* igitur inter praestigiatores dictus sit is qui virilitatem alicui adimit fascinationibus.

s) Incertus utrum R, an L altera notae litera significetur, ambas figuras suo quamque loco inserui; sed illam cum R, veriorem esse arbitror.

t) Pro vana mea conjectura uno tantum S addito verum nomen *Massiva* erit, qui Gulussae filius (Flor. 3. 1. 8), et Masinissae nepos fuit (Sallust. Jug. 35. et 61).

u) Peregrinum id nomen quum mihi ignotum esset, *Mesizabel* (Neh. 3. 4. et 10. 21) quidem legi posse conjeci; sed nota, quae huic proxima est, et ex ea derivata esse videtur, scrupulum injicit (vid. not. seq.). Quare ne *Maharbal* (Liv. 21. 12) quidem legere ausim.

x) Ex Masinissa natus filios procreavit Jugurtham et Gaudam (Sallust. Jug. 5. et 65).

y) Utrumque vocabulum, *Medulla* et *Medela*, eadem quidem nota notatum est, sed distinguendum esse videtur diverso terminationis situ. Quae quum absit ab utraque nota; una eademque earum forma est. At certe ei quam pinxi, in libro Cass. adscribitur *Medela*.

z) Fortasse *Megalensis* legere licet, quod est Cybeles cognomen. Nam paulo post *Eris* quoque notatur.

a) Haud vanam esse emendationem meam, contexta apud Gruterum vocabula docent *Atellanus*, *Menodiarius*, *Methodus*, *Methodia* cet. quae, nisi *Monodiarius*, *Melodus*, *Melodia* legeris, haud intelliges.

b) *Epus* et *Melus* notantur quidem, sed *Epos Melos*que omnino intelliguntur.

c) Duobus notis notatur, et *Maenia*, et *Menia*. Hanc columnam esse constat; quare illam *Moenia* significare dixerim, nisi ex eadem factum esset *Maeniana*.

d) Gruterianum *Mesisula* nemo erit qui intelligat. Venit in mentem *Mesaulia*. Sed inter escas quum posita sit nota, magis adridet interpretatio *Mensalia*.

e) Persecare quidem debebat notam terminatio *is*, ut fieret *Menstrualis*.

f) Parva hujus notae mutatione aliam fingere possis, qua *Mensa* notetur. Hanc enim nequidquam in Collectione quaeras.

g) Qui medii aevi vocabulis contenti sunt, iis non opus est emendatione Gruterianae interpretationis. Conductor enim operarum *Mercedarius* dictus est.

h) *Marchobria* prorsus mihi ignota est; quare Plinii *Merobricam*, quae Ptolemaeo *Meribriga*, et in lapidibus *Mirobricens. municip.* (Gruter. 257. 2) dicitur, significari conjeci: quae tamen lectio pro certa venditari nequit, quum per notam liceat, et *Macaria*, et *Machara* cet. legere.

i) Duabus quidem notis idem notatur nomen; sed prior, quae a libro Cassel. abest, suspecta videtur.

k) Licet syllaba *is* nota terminetur, *Metalles* tamen adscribitur. Quid significare voluerit notarius, incertum videtur. *Metelli* enim nomen alia nota exprimitur. *Metelis Aegypti* oppidum fuit. Terminus medio aevo *Metalis* lapis dictus (Cang.). A Meta enim fieri Metalis, non magis mirum, quam a Mensa Mensalis. Quid? quod *metali* forma fuisse pileum pontificum, Festus (Gothofr. 217) ait; qui quidem locus apud Paulum (Ibid. 470. f.) corruptus legitur. A libro Cass. nota abest.

1) Praecedunt *Pepo*, *Pepunculus*. Gruterianum *Milipepo* profecto corruptum est. Cave tamen certam esse existimes meam lectionem. Ex Plinii (20. 6) loco, quo *Pepones* remedia esse dicuntur in morsu *Millepedae*, eam cepi conjecturam, quia animadvertere mihi visus sum, Collectionis auctores saepius ante oculos habuisse illius librum (vid. p. 414. f.). Melior fortasse lectio fuerit *Melopepo*.

m) Gruterianum *Missastum* illico rejeci, Cass. lectionem praeferens; quum medio aevo Missorium et Missurium perinde scriptum fuisse Cangius doceat (vid. etiam Voss. de vit. serm. 3. 26).

n) Vide quid intersit inter sequioris aevi notarios, et illos, qui primi notis scripserunt. Profecto non intellexissent hi notam, qua apud Carpentierum notarius *Moderno* notavit, quam quidem notam vocabulum *Modo* continere Collectio docet.

o) Duplici modo emendatam habes notae figuram, quae apud Gruterum perperam picta est, quandoquidem certe non incipit a P.

p) Neque usitatum est vocabulum, neque respondet literis notae. *Monocondylos* quidem legere licet; sed de musica hoc Collectionis loco quum agatur, haud aptam esse interpretationem ipse fateor. *Monochordos* placeret, si notae figuram mutare fas esset. Quid si *Monoclonos*, legamus? *Αὔλημα μονόκλονον* solius tibiae cantus est Julio Polluci (4. 9).

q) Lectionem *Mimi centunculus* (Apulej. Apol. 282), quam nota admittit, Gruterianae *Monopticus* substitui, quum hoc vocabulum, neque intelligerem, neque ab ullo scriptore usurpatum esse scirem, nisi a Pseudo-Isidoro (in gloss.), qui *Monopticus mimus* habet: cetera enim desunt. Istum vero ad notarum Collectionem, in qua *Mimos Monopticus* sequitur, tantummodo respexisse verisimile est (§. 381). Certe fallitur Arevalus, qui ex aliis lexicis addit: *Monopticus, unico casu.* *Monoptotus* enim legere debebat, ut cum hac interpretatione vocabulum congrueret. *Monodicus* ex notae forma vix elicitur.

r) Cum notae figura, quam ex libro Cassel. apposui, lectio quidem satis convenit; sed ignoro id nomen proprium. Fortasse *Mazippa* intelligitur, quem Maurorum ducem Tacitus (Annal. 2. 52) memorat. D quidem cum Z facile commutatur.

s) *Mulctam*, quae Multa etiam dicitur, intelligi hac nota nunc credo, quam antea (§. 171) *Multa* (πολλὰ) significare putavi.

t) Finxi hanc notam comparata ea, quae recte apud Gruterum (176) *Muscipula* explicatur.

u) Duae quidem sunt notae, quibus hoc vocabulum significetur; sed neutrius lectio certa est. Namque prior, cui apud Gruterum *Myrticeum* adscribitur, ideo nobis suspecta videtur, quia a radice *Myrta* longius abest, et *Myrothecium* etiam legi potest; cujus quidem lectionis alias haud contemnendas rationes infra (v. *Nyrticeum*) videbis. Posterior cujus lectio apud Gruterum est *Myrtecum*, a *Myrta* omnino originem traxit. Quid igitur impedit, quominus *Myrtetum* legamus?

x) Invitus obscuro *Nabdalphae* nomine exposui hanc notam, ad formam ejus, quae in libro Cass. est, depictam, quum succurreret *Nabdalsae* nomen, ex Sallustii Jugurtha nemini non notum. Sed ex Gruteriana etiam notae figura, literas NDN continente, hoc nomen nullo modo extorquetur. Ex Casselanae vero characteribus, nonnisi adhibita alia scribendi ratione, NPD(l)a *Nabdalsa* legi potest: quare suo loco (p. 245) eandem notam iterum possui.

y) Graeco Chi substituerunt Latinum G, ut in pluribus aliis etiam notis (§. 311. C).

z) Insulae quidem nomen est; sed hic Ναυμάχου intelligi, ex puncti loco colligo. Quodsi haec conjectura haud placet, *Navarchus* lege. Certe enim *Naumarcus*, quod Gruterus habet corruptum est vocabulum.

a) Neque hoc intellexit auctor glossarum, quae Isidori nomine inscriptae sunt. Nullam enim addit interpretationem. Nequidquam Graevius aliam lectionem obtrudere conatur ei, qui solam notarum Collectionem haud dubie respexit (§. 381).

b) Ex Νέμεα et νικάω compositum nomen est *Nemeonici*, aeque ac Ὀλυμπιονίκης ab Ὀλύμπια trahitur.

c) Quum inter *Attagena* et *Tomaculum* insertam viderem hanc notam; conjeci *Nena*, quo medii aevi scriptores potum appellarunt (Carpent. gloss.), legendum esse. Jam vero persuasum habeo, lectionem *Nenia*, sive *Naenia*, haud mutandam esse. Trimalchio enim apud Petronium (47), contemnens fercula vilia et rustica, hoc nomine utitur.

d) Gruterianae lectioni, quae *Nefela* est, subjeci *Nepeta*, quia nota proxime sequitur verbum *Libare*, et vinum ex nepeta priscos fecisse, Plinius (14. 16) docet.

e) Terminatio *em* in libri Cass. figura est. Gruteriana duobus punctis terminatur, quae *im* significant.

f) Licet ne in glossariis quidem reperiatur, tamen intelligere mihi videor hoc nomen. Sicut enim medio aevo Sororiger uxoris frater dictus est (Cang.), ita etiam *Neptiger* uxoris nepos fuerit.

g) Regionem intelligi, arguit terminationis locus, quae causa est hujus emendationis. Liber Cass. neque hanc, neque duas, quae in Collectione sequuntur, notas habet.

h) Solis notae literis nititur haec conjectura. Quum enim inter *Olefactum* et *Abolet* notae locus sit; magis conveniret verbum a *Nidore* derivatum. Sed *Nidorat*, quod apud Gruterum est, nemo novit. Fortasse *Festi* locus: „*Nictit* canis in *odorandis* vestigiis" ita digestorum vocabulorum causa fuit.

i) Nihili est verbum *Nigruis*: sed pro *Nigrido*, quod per errorem typis excusum, lege *Nigritudo*.

k) Quamvis facilis ex notae litera P emendatio sit *Nimphagoras*, sive *Nymphagoras*; haud tamen magis notum mihi hoc nomen est.

l) Frequens in diplomatibus enunciatio est: Veniens ad praesentiam nostram *Nobis suggessit* cet. (Marculfi form. I. 4. 17. 21. seq. app. 30 et autogr. plur. reg. Franc.). Codici Theodosiano etiam *Suggestio* est Relatio ad principem.

m) *Narbonianus* potius, quam *Norbanus*, legendum esse videtur, quamvis ignotum illud nomen sit.

n) Nomen *Novemvirorum capitalium*, quod ad similitudinem antecedentium Triumvirorum capitalium a Collectionis auctoribus procusum esse videtur (p. 419. n), a nemine, quod sciam, usurpatum est.

o) Ausonius (Idyll. 12. 72): *Perjurum Lapitham Junonia ludificat nubs.*

p) Pro *Nucleus* legi *Nuculeus* in Plauti libris scriptis Gruterus auctor est (Gesner).

q) Primo etiam casu *Nugas* dici, pro *Inutilis*, satis notum est.

r) Pro *Numitius*, quod inter fluminum nomina comparet, legendum esse *Numicius*, nota ipsa confirmatur.

s) Recte quidem apud Gruterum voce *Nuptiabilis* explicatur nota; sed mendum in ipsa ejus figura esse suspicor.

t) Latinis literis scriptum nusquam vidi, nisi in Psalmis (101. 7).

u) Hujus notae duarumque aliarum, *Tyrticeum* et *Myrticeum*, interpretatio apud Gruterum certe corrupta est. Quodsi earum figuras spectaveris, easdem esse videbis, quas notae habent *Apotheca*, *Dactylotheca*, *Bibliotheca*, nisi quod initialis litera variet, et terminatio sit *um*. Persuasum igitur mihi est, hoc loco *Narthecium* esse legendum.

O.

x) Nisi disjunctim hoc legeris, et *Ob duplex* abrupta a ceteris partibus orationis esse verba statueris, nullo modo intelliges. *Octuplex* legerem, si notae *Octo* forma, quae in omnibus ab ea derivatis facile agnoscitur, huic aliqua saltim ex parte responderet.

y) Eadem est ratio hujus, quae antecedentis, vocabuli. Quodsi ea non obstante *Octuplum* legere malueris, dic quaeso, quid sit *Induplum*, quod eodem Collectionis loco legitur?

z) Quamvis notae terminatio sit *et*, עוֹבֵד tamen significari ex eo cogitur, quod *Booz*, pater ejus, antecedenti nota notatur.

a) Quum a libro Cass. absit haec nota, haud scio, an in pingenda terminationis figura erratum fuerit.

b) Ita apud Gruterum legitur, et sequitur *Obsedatus campester*. Haud dubie iidem populi sunt, qui Plinio (4. 19) *Osquidates campestres* et *montani* dicuntur, ubi tamen libri scripti, Colbertinus et regius *Oscidates* habent. Quas vero in Gallia regiones habitarint, diversae sunt virorum doctorum conjecturae, ex quibus praevalere videtur D'Anvillii (Notit. Gall. 510) opinio. Ad Tironianam hujus nominis scriptionem quod attinet, posterior utriusque notae pars *Montani* et *Campester* dilucida et manifesta est. Prior vero, quum O solum contineat, utramque lectionem, et Gruterianam et Plinianam perinde admittere videtur. Obscuritatem auget, quod nisi apud Plinium, et in notarum Collectione, nulla in aliis scriptis hujus nominis fit mentio. Subtiliori tamen notarum cognitione praeditus primam nominis syllabam vel *Ob*, vel *Op* explicabit, quandoquidem nullum a syllaba *Os* incipiens vocabulum in Tironianis notis cum hac literae O forma est compositum, quae, si sola conspicitur, vel *Ob*, vel *Op* significat, atque etiam in compositis *Obses*, *Obsidium*, *Opus*, *Oppidum* cet. satis elucet. Quare eo fere sum adductus, ut *Oppidani campestres* et *montani* legerem, praesertim quum terminatio harum notarum eundem locum occupet, quem in nota *Oppidum*, et altera earum pars Tironiano more (§. 186) succedat in locum literae P. Certum tamen quid de prima notae parte constituere non ausim; et si quis, ne a Plinii *Ossidates* longius recedat, *Oscidates* legere maluerit, eodem redibit. Namque qui ab omnibus bonis auctoribus *Osci* appellantur, similiter *Opsci* olim dicti sunt. Id vero in Collectione memoratu dignum videtur, nomen *Campester* singulariter, et *Montani* pluraliter notatum esse, quo ex discrimine mihi quidem verisimile fit, ex libro quodam, nobis haud cognito, haec nomina excerpta esse.

c) Corruptum hoc vocabulum notam sequitur qua *Lithostrotum* significatur; unde conjeci, *Opus lithostrotum* legendum esse, nisi malueris Ὀδόςρωτον, neglecta adspiratione.

d) *Opportunus* et hoc loco legendum esse, persuasum habeo, quoniam similis haec nota est ei, qua id vocabulum notatur, nisi quod punctum loco terminationis ponitur (§. 251). Neque me movet *Ultroneus*, quod praecedit. Hac enim nota Collectionem interpolatam esse, liber Cass. docet.

e) Gruterianum *Ostricometra* certe corruptum est. Notae figuram, ex libro Cass. restitutam, pro literarum, quibus constat, forma haud aliter interpretari possum, quam *Octominuta*. Primarum enim literarum transpositarum CO conjunctio talis est, qualis in *Octo*, et omnibus ab eo descendentibus vocabulis. Neque nota est ulla, cujus literae CO, ita junctae, significent *co*; sed semper *oc* explicari debent. Literae M praeterea forma eadem est, quae in *Minus*, et accedit terminatio *ta*. Quae quidem

omnia si interpretationem *Octominuta* non efflagitarent; certe legerem *Cometa*, quo aliqua saltim consociatio esset cum sequenti *Erinaceo*: cujus sicut est spinosum corpus, ita crinita illius stellae forma dicitur.

f) Apud Gruterum notae sese excipientes vocabulis *Proscenium*, *Aulium*, *Odium* explicantur; sed *Aulaeum*, *Odeum* legendum esse, nemo dubitabit.

g) Erratum est in aversa terminationis forma, quae corrigenda. Barbarum vocabulum, aeque ac *Odiatio*, pro *Odio* (Carp. gloss.) medio aevo usu venit. Similia: Dividuitas, Medietas, Malitas, in Pisano Pandectarum libro leguntur (Brisson. Parerg. §. 121. 127. add. Ducker opusc. de latin. juriscons. p. 325).

h) Gruterianae lectioni *Omajus* neque notae figura adversatur, neque verborum series. Sed intelligendam esse literam O majorem (O *μέγα*) quum mirum videretur, ex conjectura posui *Omadius*, quod Bacchi est cognomen. *Majus* enim et *Madius* medio

aevo promiscue scribebantur. Neque tamen negaverim, etiam *Omasum*, sive *Omasus*, ex notae figura elici posse.

i) In geographica Collectionis parte legitur haec nota, in qua fortasse *Odessus*, *Moesiae* oppidum, latet.

k) Nota, quae nonnisi OP (atque I, et fortasse etiam h) cum terminatione *es* complectitur, apud Gruterum explicatur *Obplectes.* Quod vocabulum quum me quidem prorsus lateret, corruptum esse arbitratus sum, aliudque quaesivi, quod in ejus locum substituerem. Sed conjectura assequi difficillimum fuit, quum id quod sequitur corruptius etiam sit, nullaque in verborum serie adminicula reperiantur. Legi quidem potest *Ophelles*, quod celebratum nomen viri est, in cujus memoriam Nemeos ludos institutos esse ferunt. Sed certum nihil constituo. Ὁπλίτης etiam nota capit, si adspirationem in ea neglectam esse ponere licet. Quid multa? Incertior finio quam incepi.

l) Liber Cass. *Hupicum*, Gruterus *Hopicum* habet: cui Gruterianae interpretationi quum proxime accedat *Opicum;* id quidem subjeci: sed dubitationis causa adest in vocabulis

antecedentibus, quae ex medicamentorum genere sunt. Accedit C literae forma, cui *i* annexum. Unde *Omphacium* non absurde legas, de cujus in medicina vi Plinium consulere licet.

m) Nobis haud cognitum est hoc verbum: quod si umquam exstiterit, ab eo sane nomen *Opportunus* ducere mallem, quam a Portu, quod etymon communis omnium opinio substituit.

n) In libro Cass. *Opollens*, et sane ex *Opes* cum *Pollens* notam compositam esse, non solum ejus figura docet, sed et locus, qui ei in Collectione assignatur post *Pollens*. Novum igitur, immo melius etymon nota praebet, quam illud *Opum plenus*, quod adhuc viri docti protulerunt.

o) Gruteriana notae interpretatio est *Horcistipolis*, ignotum mihi quidem vocabulum. Ὀρχηστόπολος (*Orchestropolos* enim typographi error est) legi posse putavi, magisque in hanc sententiam adductus sum per Cangium, qui (v. Orciscopalarius) veterem librum notarum laudat, in quo *Orchistopolis* legatur.

p) Apud Gruterum corrupta, quae *Proscenium* sequuntur, *Aulium*, *Odium*, *Orcista*, *Calcidocus*, haud dubie ita emendanda sunt *Aulaeum*, *Odeum*, *Orchestra*, *Chalcidicum*. Litera G usos esse tachygraphos pro *Ch*, notissima res est (§. 311. C.).

q) Idem nomen proprium esse videtur, quod in lapidis titulo (Grut. 574. 7) legitur. Vide etiam Plinium et Suetonium.

r) *Oryza* intelligitur. Ita enim Franci sub prima regum stirpe hanc vocem pronuntiabant (Carpent. glossar.).

s) *Ortimbassis* Gruterus habet. Difficillima hujus notae enodatio est. Ab O incipit, cui annexa videtur nota *Basis* cum terminatione *im*. Ab Ὀρθὸς et Βαίνω conflatum esse conjeci hoc vocabulum aeque ac Ὀρθοβατέω, ut quasi recte stans basis *Orthobasis* di-

catur. Quodsi haec conjectura non placet, lineam a B ascendentem T interpretari licet, et *Orobitim* legere. Qua quidem lectione probata, causa etiam accusativi casus intelligitur ex Plinio (33. 5), qui „*Orobitin* vocant" cet. scribit, quemque hoc etiam loco (v. p. 414) secutos esse Collectionis auctores verisimile fit.

t) Veram interpretationis emendationem esse, sequente *Vorgii* nomine probatur, quod *Osismiorum* sive *Osismorum* oppidum fuisse constat.

u) Incertus, utrum ex *Os* et *Is* syllabis, an ex O et S literis composita sit notae figura, utroque eam modo pinxi. Posterior vero notandi ratio praeferenda esse videtur. Nomen proprium significat, quum in geographica Collectionis parte legatur. *Oescus* lego, dummodo non vana sit conjectura, quam de sequenti *Iscaballi* nomine feci, quod videsis. (p. 537. *z*)

x) Id est Os, Ossis: ita enim interdum antiqui (Priscian. L. 6) recentioresque dixerunt: quos quidem, licet id agerent, ut haud ambiguus sermo esset, nihilominus a Vossio (de vit. serm. 5. Op. T. 2. P. 2. p. 303) male intellectos esse, miror.

y) Error in notae figura esse videtur, ut syllabam Os inversam ligno inciderit artifex. Haud tamen ausus sum aliam notae formam substituere.

z) Certe depravata est Gruteriana interpretatio *Rostrum.* Nota enim, praeter *Os*, et terminationem *um*, aliam literam non habet. Locus vero, qui ei in Collectione assigna-

tur inter *Copula* et *Jungit*, significationem *Ostri*, quod adscripsi, difficilius admittere videtur. *Rostrum*, *Ossum*, et *Ostium* aliis notantur notis.

a) Παιὰν, hymnus maxime in Apollinis laudem, qui ipse etiam *Paean* dictus est.

b) Ex serie verborum conjicio, colorem significari Paederotis gemmae.

c) Duae sunt notae unius ejusdemque formae, quarum alteri punctum praecedit, alteri punctum a tergo positum est. Illa bene apud Gruterum exponitur *Paluster.* Haec apud eundem *Palinuster.* Mutatus puncti locus derivatum a primitivo *Paluster* Tironiano more arguit, quod *Paludester* est. Sed inter nomina propria comparet, ac neque id, neque *Palinuster*, nomen viri cujusdam fuisse, compertum habeo. *Palestrae* quidem foeminae nomen lapidi insculptum est (Grut. 537. 12). An vero *Palester* etiam viri nomen fuerit, idque hac nota significetur, pro certo affirmare non ausim. *Palinurus* legat, qui pro T(c)R solam literam N conspicere sibi persuaserit.

d) Ex genere caeparum Plinio (19. 32) est, unde Gruterianum *Palachina* emendavi. Nota enim inter *Ocimum* et *Allium* locatur.

c) *Palare* legere, quum a *Palo* sit, contextus prohibet, qui *Pallium*, *Palliolum*, *Palla*, *Pallare* comprehendit. *Palliare* igitur verbum esse conjeci, unde *Palliatus* est. Haud tamen congruit haec explicatio cum usitata ratione verba in Collectione notandi tertia persona praesentis vel praeteriti temporis (§. 70).

f) In hac nota et ea, quam *Pansum* interpretatus sum, incertus haesi, maleque earum processit analysis: quod ante omnia animadverti velim, ne si quis meliorem viam aperire voluerit, vana fortassis opinione mea motus proposito desistat. Alteram enim literam N quidem legi, sed invitus quippe qui nullum tali forma N in aliis notis reperirem. Quare in compositis cum Pando verbis eandem figuram P esse dixi. Duo vero P in simplici vix cogitari possunt, nisi ponas Papando olim dictum fuisse. Similis verbi *Pello* ratio est (§. 378).

g) Ex Isidoro et glossariis medii aevi id vocabulum Gruteriano *Panuncula* substitui.

h) Duae sunt notae, quae eodem vocabulo apud Gruterum explicantur, quibusque Graeca nomina adscripsi, ut distinguerentur.

i) Cave legas *Paralyticus.* Hoc enim alia nota notatur. Quid vero istud significet, aenigma est, quod non conor attingere, quoniam inter composita cum *Parat* hoc nomen legitur.

k) Duplici literae P, quae in nota est, significatione deceptus interpres apud Gruterum *Protaulis* legit.

l) Nusquam reperitur hoc vocabulum, nisi apud Priscianum, qui *Parricidam*, ait, per syncopen illius dictum esse. Aliam ex Plauto (Epid. 3. 2. 13) conjecturam addo, qui *Perenticidam* habet.

m) Duas notas, quibus hoc vocabulum significatur, recepi, alteram ex diplomatario Ludovici Pii (p. 50), alteram ex Gruteriana Collectione (p. 51). Illam Carpentierus perperam exscripsisse videtur; haec vera est.

n) Quum Gruterianum *Eupae* neque nomen cognitum sit, neque ex notae literis elici possit, equidem mera de conjectura adscripsi *Parthenope.* Ingenue confiteor, exceptis litera P et terminatione e, ceterarum literarum lectionem omnino incertam esse.

o) Ex duabus notis, quibus idem vocabulum adscripsi, Gruterus alteram in adpendicem rejecit (199), quoniam a suo libro aberat: altera apud eundem vocabulo *Pasca* explicatur, atque in libro Cass. id nomen a recentiori quodam corrigitur *Pascha;* sed *Pascua* legendum esse contextus docet. Equidem hanc notam illa veriorem esse arbitror.

p) Legendum est *Pasiphae.* Neque mirum videatur, hoc nomen proprium inter animalium nomina in Collectione insertum esse: Minotaurus enim praecedit (Ovid. Art. 1. 295).

q) Notae lectio haud dubia est, licet terminatio *tionem* ab imperito notario ficta sit, qui uno calami ductu eam absolvere debebat. *Pastio* medio aevo dicebatur census pro jure pascendi solvendus.

r) Glossae Isidori hoc nomen derivant a *Paterculo.* Haud vero scio, an Collectionem notarum tantum respexerit auctor, in qua *Paterculus* antecedit. Terminationis certe

positio derivatum ab hoc nomen non admittit. Unde mea de conjectura adscripsi *Patrius*, quam tamen pro vera venditare non ausim.

s) Ex hac etiam nota glossae Isidori illustrantur (§. 381), in quibus incisum inter haec verba delendum.

t) Casselana nota (p. 294) meliorem esse Gruterianam (p. 293), equidem arbitror.

u) Magis placet Casselana nota. Gruterianae insuper explicatio haud convenit.

x) Lege *Paedagogus*. Melior in nota ipsa inest scribendi ratio, quam in interpretatione adscripta.

y) Emendationis viam clara notae terminatio aperuit. *Cucullus* tegmenti genus erat, unde etiam *Bardocucullus*. *Pedocucullis* vero, licet in aliis libris id vocabulum haud reperiatur, pedes indutos fuisse, puto, antequam calceis induerentur.

z) Duae sunt notae apud Gruterum, quarum utrique *Pedo* adscriptum. Alteram, quia punctum, ut in ceteris a *Pede* derivatis, inferiori loco ponitur, etiam sic lego: hanc vero, quia superiori loco terminatio additur, *Pedum* interpretor.

a) Quum inter nomina propria legerem *Pelicanus*, notum quidem nomen *Peligniani*, qui consul fuit cum Pomponio, subjeci; sed propius ad Gruterianam lectionem accedit *Palicanus* (Sallust. fragm. et Quintil. 4: 2).

b) *Pelues* apud Gruterum legitur. Sed *Pelvis* alio modo notatur. Vide igitur, num hariolando verum assecutus sim.

c) Ita legendum esse, pro Gruteriano *Paenna*, ex nomine, quod sequitur, *Pluma* patet. Liber Cass. habet *Pinna*, eadem scribendi ratione, qua apud Suetonium (Claud. 33) vox effertur.

d) *Pentarici* apud Gruterum legitur. Incertus fui, utrum *Pentarchi*, an *Pentaeterici* legerem. Vicit opinio haec, quum animadvertissem, in eadem columna sequi *Palaestra*, *Palma*, ludique quinquennales. Pentaeterici certaminis in lapidis etiam titulo mentio fit (Grut. 499. 6).

e) Pro Gruteriano *Pentatheneum* adscriptum fortasse erat *Pentatheucum*, a quo sensim librariorum incuria corruptum illud nomen deflexerit. Neque mireris, cum ceteris vocabulis hoc loco notatis id nequaquam congruere. A recentiore enim insertum esse, liber Cass. docet.

f) Diminutivum antecedentis vocabuli *Pepo* esse videtur: quod quum inauditum sit; haud scio an potius nomen proprium, fortassis *Peplius*, in note lateat. Certe nomen *Peplia* in antiquis lapidibus legitur.

g) Tametsi Nonius in Ciceronis Oratore male legerit *Percessum;* certe tamen medio aevo invaluit *Percedere* verbum (Carpent. gloss.)

h) Pro Gruteriano *Perculit* ita reposui. Perfectum enim sequitur, notaque hanc lectionem efflagitare videtur.

i) Abest a libro Casselano, neque injuria. Haud enim a *Cado* est hoc verbum, ut nota arguit, sed a *Caedo.*

k) A *Percello.* Ita etiam Ammianus (17. 8), licet Vossio (Gramm. 3. 28) displiceat praeteritum *Perculsit* pro *Perculit.*

l) Ita liber Cass. et certe *Insolens* praecedit. Gruterus vero habet *Persolens*, quod scriptoribus inferioris aevi idem est ac *Assiduus*.

m) Fortasse idem quod *Pellicit*. Priscos enim *Pelliceo* dixisse, grammatici docent.

n) Inusitatum est hoc compositum. Quodsi primam notae lineam ad perpendiculum magis erexeris; commodior lectio *Immoratur* prodibit.

o) Modum excessisse auctores in componendis nominibus haec etiam nota docet (Conf. p. 419. n).

p) Duarum apud Gruterum notarum *Petrotum* et *Colobrata* lectionem emendandam esse legendumque *Peronatum*, *Colobathra*, vix est, quod dubitemus.

q) Ita Gruterus. Equidem legere malim *Perperna* propter terminationis locum, qui a *Perna*, non a *Penna*, id nomen derivatum esse arguit (§. 275).

r) Conveniunt in lectione *Puerpera*, et Gruteriana Collectio, et liber Cass. Quodsi notae literas perspexeris, notamque, qua *Puerperium* notatur, cum hac comparaveris, magis profecto placebit lectio mea. Accedit, quod *Proserpina* praecedit, cujus Graecum nomen Latina terminatione notatum esse suspicor, nisi Περσεφόνεια sit.

s) *Praesolet* liber Casselanus habet; *Persolet* Gruterus: et certe medio aevo in usu fuere *Persolentia*, *Persolenter* (Cang. et Carpent. gloss.). Neque te moveat nota *Persolitus* ab P alius formae incipiens. Hanc enim post insertam fuisse, ex libro Cass. comperi.

t) Sensus huic verbo inest, qui alio exprimi nequit: quare Latinis id usurpatum fuisse

vix dubito, quamvis in auctorum classicorum scriptis, quae supersunt, non legatur. Sane non omnia, quibus eorum auctoritas deest, temere contemserim.

u) Pro Gruterianis *Praetaedescit*, *Praetaedet*, *Praetaesum*, cur legere liceat *Pertaedescit*, cet. supra (§. 162) dixi.

x) Grammaticorum dubium, utrum secundae, an tertiae conjugationis verbum sit, nota solvit; si tanta ei sit auctoritas.

y) A *Tingo* non a *Tango* derivatum hoc verbum, licet inauditum, haud tamen damnandum. Etenim vix credo, alio uti potuisse Ciceronem ipsum, si lanam non tantum tingi, sed etiam *pertingi* jussisset. Aliud est a *Tango*, quod etiam *Pertingere* verbum vel ex optimorum auctorum libris expungerunt critici, substituentes *Pertinere* apud Caesarem (bell. civ. 3. 68), Ciceronem (nat. deor. 2. 9), Plinium (11. 37), Sallustium (Jug. 48), Livium (25. 24), aliosque. Quod si auctoritate librorum scriptorum permoti fecerunt, bene habet: ubi vero suo Marte; certe, deesse huic verbo idoneos auctores, nequidquam dicant.

z) *Pertumidam* lunam scriptum reperias apud Apulejum.

a) *Pristinum* in Gruteriana Collectione est; ad quod vocabulum in appendice adnotat „Alter liber exhibet *Pestrinum*, omnino commodius." Lectoribus certe haud commoda est brevis haec explicatio: neque quid voluerit vir doctus assequor. *Pistrinum* enim alia nota, omnino diversa ab hac, notatur. Utramque lectionem adscripsi, neutram amplector, veram restituendam esse censens ex glossis Isidori, quas saepius Collectionem nostram secutas esse vidimus. *Pestinuncium* illae dicunt eum, qui pestem nuntiat. Atqui ex duabus notis *Pestis* et *Nuntius* nostra est efficta, praeceduntque in Collectione *Pestis*, *Pestilens*, *Pestilentia*, *Pestiferum*; sine ullo igitur dubio *Pestinuntium* legendum esse arbitror.

b) Quae apud Gruterum explicantur notae nominibus *Pitaurum*, *Pitauritanus*, has ego *Petaurum*, *Petauristarius* interpretor, inter *Schoenobatica* et *Pertica* insertas. Notarum figurae ex libro Cass. sunt emendatae.

c) Antecedens nota *Petra* est, sequiturque *Petrensis*. Legendum fortasse *Petrobolum*, ut sit Πετροβόλος.

d) *Petragorius* et *Vesonna*, apud Gruterum sese excipiunt. *Vesonna Petrocoriorum* urbis nomen est, hodie *Perigeux*.

e) *Pania* inter nomina propria apud Gruterum legitur refragantibus etiam notae literis. *Phania*, sive *Phanias*, viri nomen est, a quo Φανίου θύρα in proverbii consuetudinem venisse, Eusthatius tradit.

f) Nisi in notis nusquam reperitur, quod sciam, hoc vocabulum, ex Φαρέτρα cum Ζώνιον compositum. Pharetra enim ex humeris pendebat (Herod. 7. 61), immo ex cingulo (Virg. Aen. I. 323). Literae PH, a quibus incipit nota, prohibent, quo minus Parazonium, et terminatio *ium*, quo minus Pharetratum legamus.

g) Ab F incipit nota, cujus si brevior prima linea erat, commodius PhN legebam.

h) Utrum Graecum Lyrae synonymon, ex Φίλος cum Κίθαρις compositum, an potius *Psilocitharis*, a ψήλας, legendum sit, ex ea, quae sequitur, annotatione colligas.

i) Graecum nomen Latino adscripsi. Sed vereor, ne falsa sit apud Gruterum interpretatio. Quum enim literae *Ph* et *Ps* unam eandemque figuram Tironianam habeant; *Psilocitharistes* etiam legere licet. Quam quidem lectionem ut praeferam, Suetonius (Domit. 4) facit, ex cujus libro plura hausisse Collectionis auctores, saepenumero animadverti. Certe *Chorocitharistes* et *Philocitharistes* in Collectione sese excipiunt, aeque ac Suetonius *Chorocitharistas* et *Psilocitharistas* jungit.

k) Cum notae forma, ex libro Cass. emendata, satis convenit Gruteriana interpretatio. Antecedunt *Phrygia*, *Asia*: sequitur *Phasalia*, pro quo legendum esse *Pharsaliae* conjeci. Istud vero *Philophasalia*, quamvis *Philopharsalia* legas, inextricabile aenigma est. Quodsi notae terminatio integra servanda sit, equidem *Philonica Pharsalia* interpreter, ut error sit auctoris, qui *Philonicum* (virum) *Pharsalium* apud Plinium (8. 42) legens, id nomen populi compositum esse putaverit, regionemque finxerit *Philonicam Pharsaliam*. Sin errorem esse in notae terminatione *a* statuere liceat; ea in *us* transformata, commodior lectio *Philonicus Pharsalius* erit.

l) In geographica Collectionis sectione ignotum hoc nomen legitur. Adscripsi quidem *Philippopolensium;* ipse vero dubito, an probabilis sit emendatio, quum a Philippopolis sit Philippopolitanus. Fortassis simpliciter *Polensium* (Grut. 263. 7) legendum.

m) Gruterus *Flegeton.* Paulo melius liber Cass. *Plegeton*, pro *Phlegethon*, habet.

n) Gruterianam lectionem *Diephoebus* neque admittit nota, neque, si admitteret, intelligeretur. Quare *Phoebeus* legendum esse conjeci. Jam vero sentiens, nec meam interpretationem cum Tironiana ratione derivata notandi satis convenire, suspicor, errorem in ipsa notae figura esse: cui si unam saltim lineam, quae Tironiano D sit similis, in capite addideris; *Deiphobus* legere licebit, quod magis placet.

o) Hi quidem populi intelliguntur; sed mirum, a *Phoenix* notari pluralem *Phoenixi*, et pro Phoenicia *Phoenixia.*

p) Recensentur hoc loco morborum genera; quare *Phrenesis*, *Phreneticus* lego, ubi Gruterus habet *Fremis*, *Fremiticus.* Certe a P incipiunt notae.

q) *Pri*, *Pris* Gruteriana quidem lectio est; sed meliorem Casselanam esse, punctum appositum arguit (§. 252). Id quod de similibus syllabis puncto signatis semel monuisse sufficiat.

r) Quod apud Gruterum est *Phrix* et *Phrixenum*, id ex serie verborum explico *Phryxus* et *Phryxianum.* *Phryx* enim alia nota significatur.

s) Ita lego. Quid enim inter morborum genera Gruterianum *Phisis* et *Phisicus?*

t) Apud Gruterum simpliciter legitur *Picta;* cui vero interpretationi figura notae *Pictum* adversatur. Equidem *Picta toga* (Fest. ap. Gothofr. 231. 366) posui, quoniam antecedunt indumentorum nomina. Quodsi haec conjectura haud satisfacit; licet *Pictacia* legere, qui pluralis numerus est nominis *Pictacium*, cujus Gellius (16. 7) meminit.

u) *Pictava*, hodie *Poitiers.* De ablativo casu in hujus notae interpretatione superius (p. 415. m) dixi. Eodem etiam casu legitur id nomen in Notitia imp. occid. (179. b), et in diplomate Ludovici Pii (Mabill. 314).

x) Quamvis ex literae P formis una sit, quam in litera N involutam esse non absurde dixeris, haud tamen certam lectionem habeo notae, quam aeque *Idarnes* (Curt. 4. 5), *Idanthyrsus* (Strab. 13. p. 587) *Indathuras*, cet. interpretari licet. Sed incertum non decuit a Gruteriana lectione recedere.

y) Mira est nota, ex cujus forma potius *Irata* elicitur. Haud tamen ad notae *Piraticus* figuram hanc emendare ausus sum, quoniam in libro Cass. non solum eadem conspicitur, sed etiam nota *Piraticus* ad hanc magis accedit.

z) Apud Gruterum *Bitatium* legitur, et, a BI incipere notam, perspicuum est. Sed *Nasturtium*, *Cunela*, quae proxime sequuntur, satis arguunt, *Pistacium* intelligendum esse.

Quid? quod a Graecis modo Πιςάκια, modo Φιττακια, Ψιττάκια, vel etiam a Possidonio Βιςάκια scribitur.

a) Verbum etiam *Pistrire* (Cang.), mutata tantum notae terminatione, Collectio habet.

b) In Collectione leguntur *Simia*, *Cinocefalus*, *Pethepus*, *Cerdopetephus*, *Cerdo*. Corrupte profecto. Quae omnia, si Cynocephalus, Pithecos, Cercopithecos, Cercops legeris, ex simiarum genere esse videbis. Ne per literas quidem, quibus composita est nota, *Pethepus* legere licet.

c) Utinam meliorem quis pro levi mea conjectura substituat! Notam praecedunt *Possibilia* et *Impossibilia;* sequitur *Innectit.* *Pytho* et *Pythia* alias occupant notas. Ego vero dubius et incertus haesi in Graeco Πειθώ.

d) Inter nomina propria insertum est hoc, quod ignotum. Arguit quidem literae C locus literam L (§. 286): quoniam autem sectio notae haud semper illam literam significat, et certe a nota *Placor* haec non descendit; equidem *Pacorus*, nomen omnibus notum, legere malim.

e) Dubius geminam pinxi notam.

f) Vix credo, aliquem dixisse *Probe sobrius.* Apulejus vero (Met. V. 31) „Lares" ait „pauperes nostros, sed *plane sobrios* revisamus."

g) Bis reperitur hoc nomen apud Gruterum. Prima notae figura (p. 63) corrupta est, et ex libro Cass. exsulat. Altera (p. 194), verior quidem, in libro Cass. inferiori linea augetur. Utramque, et Gruterianam, et Casselanam inserui.

h) Ignotum mihi est hoc nomen proprium. Vulgata quidem *Pedius*, et *Phedius;* sed cum notae literis haud congruunt.

i) Male quidem inter morborum nomina *Pleutopa* apud Gruterum legitur.

k) In glossis Pseudo-Isidori legitur: „Podiarius inter mimos." Atque oleum et operam perdiderunt viri docti, qui vel aliam lectionem substituere, vel vocabuli vim ac pote-

statem ex appositis verbis eruere tentarunt. Auctorem enim, ut in pluribus, hoc etiam loco solam Collectionem notarum respexisse, nomen vero ipsum haud intellexisse, mihi persuasum est (§. 381). Inter mimos Podiarium dicit, quia in Collectione, praeter alias notas, antecedunt Schoenobatica, Petaurum, Petauristarius, ludorumque genera paulo post sequuntur. Proxime ante Podiarius est nota Podium; unde Graevius illum esse ait, qui ad Podium fabulas agebat. At in theatris omnia ante Podium agebantur! Equidem *Podarius* legendum esse censeo, ut sit idem, qui Sonipes, pede scabillum sonans (Grat. Syneg. 43). Ita enim glossae veteres (Hofm. Lex. 3. 635: „Ποδοψόφοι, Podarii."

l) Licet hoc nomine notissimi sint Italiae populi; notae tamen terminatio *e* sive *ae* mira est. Si in nota manifestae non essent syllaba *po* et litera D, Puticulae legerem.

m) *Polea* conjeci; sed locus, quem obtinet nota inter farinam et polentam, repugnare videtur. *Pollens* magis congruit; sed obstat terminatio notae. Legendum fortasse *Polemonia.*

n) Ex vectigalium genere esse, sensit quidem Carpentierus; sed, nulla ipsius notae ra-

tione habita, *Portaticum* perperam interpretatus est, quod idem vocabulum, alia nota significatum, (p. 44) bene legit. Consulenda de illo nomine glossaria, quibus addo Capitularium, quod vocant, regum Francorum (L. 3. C. 12).

o) Legendum esse *Plebi populoque Romano*, et notae principalis forma, et ejus terminatio docet.

p) Lege *Postulio* (Varro ap. Gothofr. 25). Clara terminatio *lio*, est, neque admittit nota interpretationem *Postulatio*.

q) Ita legendum esse conjeci, quoniam adverbium *Postmeridie* ignoro. Quum vero *Postpridie* medio aevo dictum sit; *Postmeridie* dixisse eosdem infimae Latinitatis scriptores, conjicere licet.

r) In diplomate Ludovici Pii Carpentierus (59) legit: „ut deinceps annis singulis *aut* „*post* duorum annorum curricula peracta mandante *missionum* ministro ad nostrum ve- „niant palatium." Ego vero *post plus* et *missi* lego. Quamvis barbara videatur enuntiatio; illa tamen nota, quae ex binis aliis composita est, aliter explicari nequit; et, licet *quam* intelligi possit, quod et optimi auctores saepe omittunt, hoc tamen loco etiam *plus quam* superfluum esse videtur.

s) *Postsecus* explicatur in glossariis *Jam.* In libro Cass. est *Possecus.*

t) *Potorius* lego, quamvis *Potionarium* medio aevo dictum esse sciam. Remotior enim terminationis locus esse debebat, ut ita legi posset.

u) *Praediarium* Gruterus habet. Nota omnino abest a libro Cassel.

x) Verbum quidem ignotum, sed nomen *Praefascinius πάνυ βάσκανος* glossae interpretantur; et adverbium *Praefiscine* nemini non notum.

y) Praefectos et Primores palatii novi; sed *Prior palatio* inauditum est nomen, quantum quidem scio. *Primores palatii* legere vetat notae terminatio.

z) Interpretationem notae quae a libro Cass. omnino abest, haud intelligens, *Praeputium* significari conjeci non obstante litera D, quod a *Pudendis* fortasse id nomen deduxerint Collectionis auctores. Sed videamus, possitne alio etiam modo explicari lectio *Praepudium*. In Collectione sese excipiunt *Repudium*, *Praepudium*, *Tripudium*: quare unius ejusdemque originis et cognatae significationis haec nomina esse colligere licet. Quamvis enim in diversas sententias dubii abeant etymologi; equidem a Graeco Ποῦς ea nomina originem traxisse arbitror. Certe verborum *Repedare*, *Praepedire*, *Tripudiare* vim ac potestatem qui intellexerit, noverit etiam nominum *Repudium*, *Tripudium*, *Praepudium*, significationem. Si enim *Praepedire* est Impedire; *Praepudium* idem quod Impedimentum erit. Quodsi quis, ne hac quidem explicatione contentus, maluerit, modicam ipsius notae emendationem fieri; ei, prona literae P figura reficta, legere licebit *Propudium*, quo vocabulo nauta utitur apud Petronium (99), moram Eumolpi culpans his verbis: Et moraris, Eumolpe, tamquam *propudium* (intelligo *fieri*) ignores. — Quae quidem verba quum haud satis explicata esse videantur a viris doctis; equidem quod sentio in medium proferam, grate accepturus, si quis meliora me docebit. Ποδεὼν Graecis pes navis est, quo quasi it seu vehitur. Inde Latinis remi et vela quasi *Pedes* navales dicti sunt (Nonius Marcell. 5. 393. ap. Gothofr. p. 699. Macrobius. 6. 4): deinde, parte pro toto accepta, funes etiam, quibus vela reguntur, *Pedes* appellati (Plin. 2. 47. Virg. Aen. 5. 830). Graecis etiam Πόδα fuisse ipsum velum, auctor est Servius (ad illum Virg. loc.), qui, inde funem Latinis dictum esse *Podiam*, tradit. Jam vero praepositio *Pro* in nomine Προποδεὼν sive *Propudium* eandem vim ac potestatem habet, quam in verbis Projicio, Proficiscor, Procello, Produco, Προποδίζω, cet. obtinet, et cum eadem praepositione nomen *Propedon*, pro Propodeon, Turpilius apud Isidorum (19. 4) habet, neque, cur hanc mutemus lectionem, satis est causae. Equidem non dubito, quod Virgilio est *Pedem* facere, idem Petronio esse *Propudium* fieri, utrumque scilicet actum significare, quo naves jam jam e portu educendae velis aptantur.

a) A libro Cass. abest. Certe erravit interpres, qui *Praescitur* adscripsit.

b) Quamvis abjecto *a* legas *Pressicium*, tamen inauditum est vocabulum. *Pressorium* praecedit. *Prosicium* legere vetat literae P forma, qua numquam *Pro* vel *Prae* significatur.

c) Inter balneorum partes haec nota comparet. Graecae esse originis a Πρηστηριος conjeci, ut Presterium idem fuerit, quod Calidarium, Laconicum, sive Assum, de quo Cicero (ad Q. fr. III. 1. 1) „in balneariis assa promovi." Litera S in nota vetat, Πυριχθήριον legere.

d) Nisi alteram notae literam P transmutare liceat in N, legereque *Praetorianus;* gemino P manente, legendum esse *Propraetor* conjicio.

e) Male Gruterus *Promit.* Vero propius liber Cass. *Praemit.*

f) Inter oppidorum Italiae nomina haec nota comparet, quae apud Vulcanium paulum mutata est, eodem tamen nomine adscripto. *Privernum* diverse notatur. Haud dubie *Pisis* legendum, quod utrique notae, magisque ei, quae apud Vulcanium reperitur, convenit, quam *Privis.* Ex Livio fortasse (40. 19. et 41. 12 cet.) nomen hoc casu notarunt.

g) Gruterianam interpretationem *Proceris* corruptam esse, mihi persuasum est: quare *Pro cerastis* (Plin. 5. 32) legi, licet etymologia haud apta videatur, quum *Ceres*, *Cerealia* praecedant.

h) Modica notae mutatione *Propagatum* legere licet, quod omnino congruens videtur cum antecedente nota *Prosapia*. Errorem igitur et in notae forma, et in interpretatione, esse suspicor.

i) Levissima figurae immutatione R, quod in nota apud Gruterum est, in L transformavi.

k) Post *Lepos* a recentiori quodam inserta est haec nota, quae a libro Cass. abest, quamque haud intelligo, nisi Graecum Προληπτικὸς sit.

l) Lege *Prolexit.* *Prolicere* enim Plautus (Curc. 1. 21) habet.

m) A libro Cass. absunt tres sese excipientes notae *Prodigium*, *Prodigiolum*, *Promunctorium.* Pro hoc quidem *Promonstrum* lego. Promonstra enim Festo sunt prodigia.

n) Quae apud Gruterum (162) legitur nota *Promunctorium* a libro Cass. abest, ejusque locum occupat ea, quam *Promtuarium* explico, quoniam *Penuarium* sequitur.

o) Notam praecedit *Elephas*, unde legendum esse *Promuscis* ex similitudine terminatio-

num *is* et *it* conjeci. *Promoscida* Isidorus habet (Orig. 12. 2); *Promuscidem* Plinius (8. 7), pro quo Harduinus Proboscidem legit, quam quidem lectionem ne huic notae subjiciamus, expressum in ea M prohibet.

p) De balneis agitur. *Propnigeum* igitur fuerit, de quo consulendi Plinius (2. Epist. 17. §. 11) et Vitruvius (5. 11), ad quem Philander „fuisse" ait „qui *Propineum* legerent, cellam putantes, quam Gustatoriam Plinius vocat."

q) Propontidem hac nota significari mihi persuasum est: quare terminationem *es*, pro *is*, errorem notarii esse suspicor.

r) Ita legendum esse pro *Epytarsis*, conjeci. Certe ne *Epitasis* quidem ex literis elicitur.

s) *Prima* enim, quod Gruterus habet, aliter notatur. Praecedentes etiam notae *Puppis*, *Prora*, nostram lectionem efflagitare videntur.

t) Ita Cangius conjecit, ubi culpa typographi *Ψυχόλετρον* legitur, quem errorem ab Adelungio haud correctum esse miror. Sed notae terminatio *a* est, unde *Psychroluta* (Senec. Ep. 53) melior lectio fuerit.

u) Nota quidem *Poecinum* habere videtur, sed, perinde fuisse apud antiquos *oe* et *u*, satis docent vocabula Poeni et Puni, Pomoeria et Murus, Poena et Punio cet.

x) Videatur Cangii glossarium, cui addendi sunt Gothofredus et Ritter ad codicem Theodosianum (7. 3. 16).

y) Certe *Pulvisculus* intelligitur, ubi Gruterus habet *Pulvicula.* Notae terminatio *a* pluralem fortassis numerum designat nominis *Pulvisculum*, quo Hieronymus utitur.

z) Licet haud dubia sit notae significatio, in ejus tamen analysi haereo. Superfluum

illum a syllaba *Pun* descendentem calami ductum, nisi *i* sit, nequaquam interpretari ausim.

a) Praeter *Pupugit*, quod verum verbi *Pungo* praeteritum est, fictum etiam praeteritum *Punxit* eo consilio posuisse videntur Collectionis auctores, ut in compositis idem tempus, praemissa tantum praepositione, facilius notarent. Apud Gruterum (131) quidem etiam *Expupugit*, *Repupugit* reperias; liber vero Cass. non nisi *Expunxit*, *Repunxit* habet.

b) *Piheredis* inter nomina propria legens, *Pyladem* notari conjeci.

c) Inter *Pyra* et *Rogum* apud Gruterum legitur *Pruina:* quod licet notum sit vocabulum, mirum tamen hoc loco visum est. Quare Graecum Πυρίνη Latinitate donatum fuisse suspicatus quidem, cuique tamen liberum de dubia hujus notae lectione arbitrium facio. Conf. Silius Ital. 3. 417. seq.

d) Pro *Pirominus*, quod inter morborum nomina Gruterus habet, ita legendum esse, vix dubito.

e) Non nisi conjectura est, qua lectio mea nititur. Certe ignotus mihi inter nomina propria *Pirsus.*

f) *Pyrrhicha* legendum: nisi malueris *Pyrrhichista*, quod quidem Latinum nomen nusquam reperitur, at vero Graecum Πυῤῥιχιςὴς ipsum est.

g) Apud Gruterum leguntur *Pithon*, *Pithia*, *Pithionicis*, *Pitonissa*, quas notas explicandas esse *Pytho*, (nisi malueris Python) *Pythia*, *Pythonicis*, *Pythonissa* equidem arbitratus sum. Sed dubium in notae, qua *Pythia* significari dixi, literis est. Ei enim literae, quam in ceteris interpretatus sum O, in hoc nomine locus est nullus. Missa igitur interpretatione illa, apud Gruterum legendum esse *Python*, *Pytho*, *Pythonicis*, *Pythonissa*, jam persuasum habeo.

h) Rectius *Quadrirotum*, licet neque hoc, neque illud, alibi me legere meminerim.

i) Notae figuram quidem ad antecedentium normam emendavi; ipsum vero vocabulum ignoro. Fortasse mensurae quoddam genus eo significatur.

k) Apparet, disjungenda esse vocabula, quae coaluerunt; legendumque *Qua libuit*, *Qua libescit*. Sed mirum hoc inchoativum.

l) Meliorem lectionem *Quadrieris* lapidis titulus (Muratori 876. 3) suppeditat.

m) Composita haec nota est ex duabus simplicibus *Quatuor* et *Evangelia.* Certe partes notae plures sunt, quam ut simplici Gruteriano *Quatuor* explicari possint.

n) Liber Cass. habet *Quibus legibus:* quae tamen interpretatio minus placet, quum terminatio notam non persecet (§. 304), sed super imposita sit.

o) Haud enim noti sunt, quos Gruterus habet, *Quindecim viri satisfaciendi.* Singularis autem forma est literae Q, in superiori parte literae S involutae. Terminationem notae ad secundum verbum spectare arbitror, ut *faciundis* legere liceat.

p) Legendum esse *Quoque modo* ex nota ipsa patet, cujus principalis pars *Quoque* est, non *Quoquo*. (v. Liv. 23. 11. Sallust. Cat. 23. Jug. 30. ad Caes. 1. 4. et 2. 2).

q) Perperam Gruterus *incerta* habet. Formula esse videtur ex pactis sive contractibus

desumta. Legi etiam poteris: Quorum nomina subscripta; quae formula est in omnibus, quas vidi, missionibus militum honestis.

r) Notatum est *Cotidie*: de qua scribendi ratione videsis Quintilianum (I. 7) et recentiores auctores apud Cellarium (Orthogr. p. 335).

s) *Ragadia* a Ῥαγὰς, Fissura, Rima (Cang.) Graecam vocis originem tuetur *Rhagadia* apud Plinium (23. 7. passim) et Celsum (6. 18. 7).

t) Nota quidem habet *Rames*; sed *Ramex* intelligendus; quum de morbis hoc loco agatur.

u) Utrum *Rationator*, an *Ratiocinor* legendum esset, dubius eram. Nunc prior lectio, quam Gruterus habet, magis arridet, licet medii aevi nomen sit, idem significans, quod *Ratiocinator*. Ratiocinari verbum tertia persona notassent (§. 70).

x) In Collectione *Rabrachus* legitur, quod insigne exemplum est permutationis literarum B et V, simul et documentum praebet pronuntiationis, quam non Rau-racus, sed Ra-vracus fuisse inde cogitur. Adspiratio vero in nota ipsa est, quam a Franco auctore profectam esse suspicamur (v. p. 427. h).

y) Sensim ab hoc verbo infimae Latinitatis (Carpent. glossar.) ductum esse videtur *Rebatum*, id est, de pretio deductum.

z) In glossis Isidori *Hispidus* explicatur. Quod quidem nomen, quum classicorum librorum auctoritate destituatur, ad infimae Latinitatis exempla a viris doctis rejicitur. Attamen a Romanis olim usurpatum, atque, ut multa alia, nunc deperditum esse, ex eo colligo, quod nomen proprium *Reburri* (Ammian. 28. 4. Grut. 173. 2. 520. 5) saepius legitur.

a) *Recernantur* in codice Theodosiano legitur (15. 1. 38): neque est quod expungendum id censeat Ritterus (in gloss.), quum verus verbi sensus sit, ut remotis aedificiis adhaerentibus horrea publica *denuo cernantur.* Profecto codicis Theodosiani Latinitas haud ea est, quae ejusmodi verba respuat.

b) Id quidem pro Gruteriano *Recimus* reposui; sed dubiam esse lectionem fateor, potius-

que H quam I speciem habere calami ductum ex C exeuntem. Unde etiam *Rechamus* non abhorreret a notae elementis.

c) Quartum casum notasse videntur eo, quod saepe cum verbis Facere, Reddere, Sistere, Esse, hoc nomen conjungitur.

d) Apud Gruterum est *Refulsit*, sed adversante notae litera C. A *Fulcio* esse videtur hoc verbum, mihi quidem ignotum.

e) Regionariorum munus satis notum sequiori aevo fuit. Eorum originem exponit Baronius (II. ad a. 238).

f) Terminationem notae emendavi, ut ita (Cic. pro I. Manil. 15. Caes. b. Gall. 2. 23) explicari possit. Apud Gruterum legitur *Rei frumentum*.

g) Nomen compositum est ad eundem modum, quo Eluvies, Illuvies, Colluvies, Diluvies, Subluvies; sed illud nulla nititur auctoritate.

h) Licet ex Tertulliano notum sit *Rememorari* verbum, nomen tamen *Rememorabilis* nusquam reperitur, ipsaque nota abest a libro Casselano.

i) Per errorem omissum est in notae figura M, quam literam inseras velim, ut respondeat similibus notis *Emicat*, *Commicat*. Ipsum verbum inusitatum esse videtur.

k) Mirum hoc compositum. *Renom*, quo Gallorum poetae olim usi sunt, inde originem traxisse videtur.

l) Apud Gruterum duae sunt notae, idem vocabulum significantes. A libro Cass. altera trium literarum abest.

m) Etenim *Repe* non nisi culpa librariorum in Collectione legi arbitratus sum. Quodsi ista scribendi ratio altius repetenda sit, eam in Graeco Ῥοπή, quaerendam esse dixerim.

n) In gestis Trevirensium archiepiscoporum legi hoc verbum Cangius quidem animadvertit; mendosam vero lectionem esse suspicatus est, quum alibi id non reperiret.

o) Minime congruit haec nota cum illa, qua *Respondet* significatur, unde corruptam esse interpretationem suspicor. Transpositis literis *Resputum* legere licet, quod ideo subjeci, quia *Respuit* praecedit.

p) Mutata praepositione ex *Instigat* finxerunt insuetum hoc compositum.

q) Post *Institor* legitur apud Gruterum. Abest autem a libro Cass. Non omnino contemnendum esse hoc vocabulum, nomen *Restitrix* arguit, quo Plautus utitur.

r) In libro Cass. legitur *Ratur*, fortasse quo facilius inde formetur perfectum tempus.

s) Haud rejiciendum verbum. *Reunctores* enim (apud Plin. 29. 1) *reunxisse*, palam est.

t) *Ramnus* Gruteriana lectio est. *Rhamnos*, sequente *Cynomya*, nomine oppidi *Rhamnus* aptius mihi visum.

u) *Rastrum* quidem apud Gruterum legitur; sed praecedunt composita cum verbo *Rodere*, notaque ipsa *Ros* habet.

x) Errat Vossius (Vitia Serm. 2. 16), hoc nomen interpretans *vectigal ex vino divendito.* Immo vero *Rotaticum* solvendum erat pro damno, quod rotae in viis faciunt (v. Cangium).

y) Nisi malueris *Rubens* legere, quod aeque patitur nota.

z) Haud dubius error est notarii, qui in excerptis ex Curtii libro (§. 311) *Rubore* quidem scribere sibi visus est, sed perperam *Robore* notavit.

a) Duabus quidem notis notatur (86. et 128). Sed priorem liber Cass. interpretatur *Rubicundus*, omissa ea nota, cui apud Gruterum *Rubicundus* adscriptum est. Posterior in libro Cass. explicatur nomine *Rubrius*, quod *Rubrus* esse videtur.

b) A *Rudens.* Priscos grammaticos singulariter extulisse hoc nomen, nullo exemplo probari potest. Quare *Rudentes* voluisse notarium suspicor.

c) *Rumigera* loquela legitur in Caroli M. epistola ad Offam regem (Baluz. I. 276) *Rumigerulus* nota significari, vix credo.

d) Haeretici, qui saeculo tertio floruit, id nomen fuit. Quum vero nota, quae a libro Cass. abest, non nisi literas SBL. contineat; *Sabellus* aeque legi potest.

e) Sunt profecto notae, quas nemo umquam dixerit compositas esse, ut eis notarii in futurum uterentur. Ex iis ea est, qua notatur: *Quousque tandem abutere Catilina patientia nostra;* ex iis: *Unde de plano recte legi possit;* ex iis et ea, quam nunc interpretor: *Saepenumero patres conscripti.* Quo rarius ejusmodi enuntiationes leguntur, eo certius conjicere licet, ex ipsis primis schedis eas esse excerptas. Atque hujus inprimis notae origo egregie illustratur Plutarchi loco, quo, Catonis orationem a Ciceronis notariis notis exceptam fuisse, tradit; quas etiam Tironianas fuisse, superius (§. 25) jam dictum est, hic autem confirmatur. Etenim in hac ipsa Catonis oratione periodus incipit: *Saepenumero patres conscripti* cet. quae quidem verba, ita conjuncta, praeterquam in Catonis oratione alibi etiam legi, nemo facile sibi persuadebit. Quo magis tota illa oratio a Sallustio (Catil. 52) ad verbum nobis conservata esse videtur.

f) *Sagulatus* ex Suetonio (Vitell. 11) notum. Sed *Sagulus* etiam defendi potest. Sicut enim tam *Sagum*, quam *Sagus* (ὁ σάγος) antiqui (Varr. Virgula div. ed. Bip. 1. 315) dixerunt; ita etiam *Sagulus* pro *Sagulum* dici potuit.

g) Facilis esset emendatio *Salebrosum*. Sed praecedunt *Saluber*, *Salubre*, *Saluberrime*, et notae forma ex illis emanavit. Quare venit in mentem vocabulum *Salutabundum*, quamvis audax sit conjectura.

h) Idem quod Xenium. Vectigal esse videtur, ab advenientibus primo praestandum.

i) *Samarobriga*, immo *Samarobriva* (hodie *Amiens*); id quod confirmari videtur antecedenti nota *Ambianus*.

k) Apud Gruterum leguntur *Samons*, *Samonstralia*, *Samonstratia*: quae nomina quum nullo modo intelligerem, prima nota *Samos*, et tertia *Samos Threicia* significari conjeci. N literam ab interprete insertam esse eo arbitratus sum, quod Dionysius Halicarnassensis (L. 1) compositum nomen esse tradidit ex Thracia et Samon, quod nomen filio

Mercurii fuit. Secunda vero nota significari existimarem mysteria hujus insulae celeberrima, si umquam ea *Samostralia* nuncupata fuisse accepissem. Σαμοθρακῶν ὄργια a Clemente Alexandrino appellantur.

l) Inauditun hoc. Sed transversam notae lineam si L interpreteris, *Sacricolae* legere licebit.

m) Hoc nomen proprium quum mihi ignotum fuisset, conjeci *Sagana* legendum esse. Jam vero illud reperi apud Sallustium (Catil. 41) et Terentium (Eunuch.)

n) Certe *Sanies* legendum est, si nota ita pingitur uti in meo Gruterianae Collectionis exemplo comparet. Sed spatium, quod ante notae figuram cernitur, arguere videtur, per vitium ligni, in quo incisa est, partem ejus, qua *Ex* notatur, excidisse.

o) *Saplutus* (valde dives) apud Petronium (37) legebatur, antequam viri docti substituerent *Zaplutus*.

p) שָׂרַי Uxor Abraham, quae et *Sara*, שָׂרָה, alia nota notatur.

q) Quoniam a *Sarissa* est, cum *Ζώνιον* compositum esse hoc nomen conjicio, ut *Pharetrazonium.* Zona medio aevo etiam lorum erat, quo fortasse sustinebantur longissimae illae hastae.

r) Hac sola auctoritate nititur hoc vocabulum, quod tamen olim exstitisse cogitur ex composito *Insatiabilis*, ab optimis auctoribus usurpato. Eodem argumento Festus utitur, scribens: „nos cum adhuc dicimus Infrunitum, certum est, antiquos dixisse „Frunitum."

s) In hac notae interpretatione latere quidem videtur Graecum vocabulum Σκαιὸν. Attamen, quae praecedit, nota *Jambus* aliam explicationem suppeditat, quae sit Σκάζων, idem quod Ἴαμβος χωλὸς, quem ab Hipponacte Ephesio inventum esse, tradit Clemens Alexandrinus (Strom. 1. p. m. 133). Latinis literis scriptum hoc nomen legas apud Martialem et Plinium juniorem.

t) Haud dubie legendum *Sclerocardiacus*, ut sit *Σκληροκάρδιος*.

u) Dubius, num C, an G alteram notae literam quis putaret, utroque loco notas *Schola*, *Scholarius*, *Scholasticus*, inserui.

x) Legendum *Scholicus*. A primitiva enim hac nota derivatam esse illam, qua *Scholasticus* significatur, perspicuum est.

y) Profecto *Schoenobatica* legendum inter *Praestigiator* et *Petauristarius*, *Pertica*, cet. Apud Juvenalem (Sat. 3. 77) quidem legimus: augur, *schoenobates*, medicus, magus, omnia novit; sed notae terminatio substantivum *Schoenobates* haud admittit. *Schoenobatica* ars igitur intelligenda, quam Baulis facere Pompejum Coelius scribit (Cic. fam. 8. 1): probabilior enim mihi videtur haec lectio, quam quae vulgo circumfertur *Embaenetica*.

z) Derivatum a *Scopum* esse, utriusque notae figura declarat: neutro genere elatum hoc nomen a medii aevi scriptoribus, Cangius docet.

a) Hoc loco machinam bellicam, vel telorum genus, intelligendum esse, ex serie verborum cogitur.

b) Apud Gruterum legitur *Scriptulum*. Et ita dixisse antiquos, testis est Charisius Sosipater, qui (L. 1) „*Scriptulum*" ait „quod nunc vulgo sine T dicunt, Varro in Plau-„torino dixit." Atque etiam Graecis γράμμα idem est (Martini lex.)

c) Apud Gruterum similibus fere notis notantur *Scrupeum* et *Scrupea*. Sed mutato in posteriori nota terminationis loco (§. 275), *Scrupeda* legere magis placet.

d) Miles securicula armatus. Glossae enim Isidori interpretantur id nomen, „qui secu-„res fert." Sed Excerpta ex iisdem glossis, pro *fert* habent *facit*, ut igitur fabricator securicularum intelligendus sit.

e) Gruterianam notae figuram dedi, licet pro Tironiana notandi ratione litera X desiderari videatur.

f) Legendum *Segestrellum*, quod insuetum diminutivum est nominis *Segestrae*.

g) Populi nomen: quod quum nusquam reperirem, reposui quidem *Sotiates*, sed contorta notae analysi, quae simplicior et facilior foret positis literis *SALTis*, ut *Salatis* sive

Sallatis legi debeat, nomen quidem ignotum, quo tamen cives *Salomaci*, quod oppidum hodie etiam *Sales* appellatur (d'Anvill. Not. Gall. 250. 572), intelligi conjicio.

h) Ita in Collectione legitur. Obsoletum esse nominis Senex comparativum putavi. Curatius vero inspecta apud Gruterum notae terminatione, jam persuasum mihi est, eam neque *iori*, neque *ior* esse, sed *io* legendum, quo facto *Senecio*, nomen proprium (Grut. 415. 2. et Cassiod. chron.), prodibit.

i) Apud Gruterum legitur *Cetonium*, atque a C incipere notam haud inficior. *Cetonium* vero quum vox nihili sit, et *Cotonium* praecedat; suspicor *Cetoninum* legendum esse, quod pro Setoninum, sive Sericum, medio aevo usu venit (Carpent. glossar.).

k) Ita Gruterus. Haud dubie legendum *Sine ulla funeris pompa* (ex Cornel. Nep. Attic. in f.).

l) Ita legi pro *Simensis*, quia sequitur *In singulis mensibus.* Neutiquam vero certa est notae lectio, quum *Semestris* etiam ea significari possit.

m) Certe emendanda prava notae lectio est, sive *Sitibundus*, sive commodiorem etiam lectionem *Siticulosus* substituas.

n) Idem, quod *Sodalis*. Legitur in lapidis titulo (Fabretti p. 329. n. 481. Fleetwood p. 364).

o) Sane, quod nunc exoletum est, nomen *Somniculus* ante fuisse cogitur, quam derivatum ab eo *Somniculosus.*

p) Pro ignoto verbo *Sopescit* perfectum posui verbi *Sopio*, vera notandi ratione adductus.

q) Ita pro Gruteriano *Sororeclatum* reposui ex auctoritate Plinii (8. 48), cujus tamen libros scriptos habere *Sororiculata*, Harduinus tradit.

r) Apud Gruterum notae adscribitur *Seu mysticum spiramen.* Scilicet *Mysterium* praecedit, atque in contextum illata esse videtur glossa *Seu mysticum.*

s) Duplex praeteritum verbi *Spondeo* medio aevo usitatum fuisse videtur: *Spopondit* enim alia nota notatur. Plusquamperfectum *Sponderat* Tertullianus habet.

t) Diminutivum nominis *Sponda* esse videtur. *Spondalia* enim legere, simplex *a*, qua nota terminatur, vetat.

u) Haec enim scribendi ratio, non *Sterquilinium*, in nota inest: quo arguitur, veteres notarum interpretes accuratam literarum enodationem jam neglexisse. Pandectae Florentinae, Cato, Phaedrus, et Terentius etiam *Sterculinum* habent.

x) In glossis Isidori legitur: „*Stilinquadrum*, id est quadrum." Perperam Semlerus *Stliquadrum* substituit, quod *stl* et *stli* saepe praeponantur. Equidem numquam vidi *stl* praeponi, multo minus *stli*. Notae igitur lectionem servandam esse censeo, quum haud difficilis sit interpretatio, sive proprie Columnam quadram intelligamus, sive translate Stilum quadrum eum, qui diffluenti et soluto oppositus est (Cic. orat. 70. 235).

y) A libro Cass. abest. Omnino *Struthiocaballus* legendum, licet ignotum nomen sit.

z) Quamvis *Spurius* nomen, quod Gruterus habet, nemini non notum sit; literae tamen, quibus nota constat, huic lectioni repugnant. *Sturii* quidem ad ostia Rheni populi fuere (Plin. 4. 15), sed hoc loco nomen viro proprium esse videtur.

a) Certe ita legendum pro Gruteriano *Subapte*, et, quod sequitur, *Subapte natura.* Ceterum ex serie verborum intelligitur, ab *Apte* duci syllabam *pte*, quae possessivis interdum adjicitur.

b) Litera C in nota perspicua est. Nisi igitur *Sub conditione*, certe *Sub dicione* legendum.

c) Ἔνθυτον, Ita Cangius. Sed ne Graeca quidem vox intelligitur, nisi legatur Ἔγχυτον.

d) Incertus sum, utrum *Subcernit* sive *Succernit*, an *Secernit* legendum sit.

e) Certe insuetum nomen, quod vide utrum a Sue sit, ut Suera caro; an *Surculum*, a Surculus (Cels. 2. 18).

f) *Suffrenatus* medio aevo erat quasi freno tractus (Cang.). Sed apud antiquos etiam hoc verbum in usu fuisse, nomen *Suffrenatio* arguit, quo Plinius (36. 22) utitur.

g) Altera in hac pagina notae forma, ex libro Cass. desumta verior esse videtur.

h) Liber Cass. hanc notam non habet: quam perperam apud Gruterum explicari, patet ex geminata terminatione, quae in nota *Mille millia* eadem est.

i) Certe falsus est interpres apud Gruterum, hanc notam *Subtilae* explicans. Nec *Subtile* legi posse, ex alia notae *Subtilis* forma patet. Quem quidem errorem animadvertens *Sutile* substitueram. Jam vero meliorem etiam interpretationem ex serie verborum amplexus sum. Inter impostorum enim et praestigiatorum nomina *Sutelae* lectio commodior erit.

k) Gruterus *Subapte ingenium.* Terminatio *um* prohibet, quominus *Suopte ingenio* legi

possit. Gesnerus quidem asserit, non nisi ablativis jungi syllabam *pte;* haud vero venit in mentem viro docto, *Suumpte amicum* legi apud Plautum (Mil. 2. 4. 38), *Mepte fieri servum* apud eundem (Menaechm. 5. 8. 10), *Mihipte* apud Festum (Gothofr. 121). *Subactum ingenium* legerem, si nomina hisce praemissa non illam potius lectionem poscerent.

l) Gruterus *Simbulum* habet. *Symbolum* adscripsi; sed melior fortassis lectio fuerit *Simpulum* (Varro de L. L. 4. 26. ap. Gothofr. 21).

m) In libro Cass. haec nota frustra quaeritur. Ignotum etiam vocabulum est; et longe differt notae *Symphonia* forma, ut ne *Symphoniacus* quidem legi possit. Vexatum illud apud Columellam et Plinium vocabulum *Symonianum* adscripsi; minime vero certa est lectio.

n) Nota, quae a libro Cass. abest, *Sinteria* apud Gruterum explicatur: quae quidem interpretatio quam falsa sit, maxime arguit litera C, in nota conspicua. Adjectivum *Synteretica* (Συντηρητικὴ) substitui, ut Ars intelligeretur.

o) Olim in usu fuisse hoc verbum, composita *Adtaminat* et *Contaminat* arguunt. Medio aevo certe *Taminare* pro Adversari ponebatur (Cang.).

p) Licet nusquam reperiatur, respondet tamen adverbio Quantocius.

q) Gruterianam hanc lectionem nemo fere umquam erit qui intelligat. Equidem Ταυροκαθάψια lego, a Ταῦρος et Καθάπτομαι, cujus Graecorum ludi nomen marmori in-

sculptum (Selden. synedr. Hebr. 3. 14. 9) est. *Taurocapra* legerem, si compositum hoc nomen in usu fuisset.

r) Suspecta notae interpretatio est; qua non significari secundum nominis casum, notae *Tellus* forma docet.

s) Idem, quod *Ternodorense* castrum Gregorio Turonensi est (5. 5). Diversis enim modis hoc nomen a medii aevi scriptoribus effertur (Vales. not. Gall. p. 550).

t) *Triarcus*, *Terarcus* apud Gruterum sese excipiunt. Illud quum *Triarches* esse conjicerem, hoc *Tetrarches* interpretatus sum. Sed conjecturae parum favet utriusque notae forma, quae primitivi et derivati (§. 275) speciem habet. Accedit quod *Triarcha* alia nota notatur, et *Bieris*, *Trieris*, *Quatrieris*, *Quinqueris*, *Hexeris*, *Hepteris*, *Penteris* praecedunt, et *Catascopium* sequitur. Quare nunc persuasum habeo, legendum esse Τρισκαιδεκήρης et Τριακοντήρης.

u) Quum legi non possit *Terebra*, quod alia nota notatur, equidem *Tribula* posui, quod est a *Tritum*. Certe *Tritum* in Collectione praecedit.

x) Ex notae terminatione haec lectio cogitur. Sed per errorem positum esse *um* pro *es*, suspicor. *Termes* enim Hispaniae Tarraconensis oppidum erat, cujus cives *Termestini* retroposita terminatione notantur.

y) Notae, quam ex libro Cass. inserui, lectio haud dubia est, arguitque verbum *Ternare*, nobis quidem ignotum, sed probabiliter ab antiquis usurpatum. Namque compositum *Conternare* Hyginus (de limit. 191) habet.

z) *Tissana* sive *Tisana* lego, quo medii aevi scriptores pro Πτισάνη usi sunt. Isidorus (20. 3. f.): Succi dicti, quod sacco exprimantur, ut *tissanae*. Graecum etiam Τισάνη

aliquando reperias (Gloss. Cyrill.). Ita etiam *Tisicus* apud Petronium (64) dicitur pro *Phthisicus*.

a) Notae figuram contuli cum ea, quae in libro Cass. est. Interpretationem falsam esse, ex ipsa nota patet, cujus literas nemo quisquam *Sciroplectes* legere poterit. Nomen Τέσσαρες, quod subjeci, sponte quidem procedit; sed mirum videtur hoc loco, quo *Schoenobaticae* artis et *Petauristariorum* mentio fit. Quodsi terminationem paululum immutare liceret, ut, quod nunc *es* est, fieret *e*; probanda foret lectio *Tesserulae*, ex nota *Tessera* eo facilius procedens, quod litera R, ceteras persecans, L quoque arguere videtur (§. 286). Sed etiam alia est conjectura, quae quidem maxime serie verborum confirmatur. Scilicet quum una eademque Tironiana figura sit I jacentis cum S conjuncti, et literarum TS conjunctarum (§. 171); *Istriones* etiam, pro *Histriones*, legere possis. Pariter enim negligitur adspiratio in nota *Histria*.

b) A libro Cass. abest haec nota, quae, quum puncto terminetur, rectum casum significat, sive Θεοδότιος (2. Mach. 14. 19) sit, sive *Theodotio* (Baron. ad a. 184).

c) Laudaturi Epistolas Pauli ad Thessalonicenses effinxisse hanc notam videntur. Id quod series verborum arguit.

d) Ita pro Gruteriano *Thesis* reposui, quum notae forma ostendat, derivatum a *Thyrsus* significari nomen (§. 275).

e) Collectionis auctores (p. 82), verbum *Tingo* et *Stinguo* unum idemque esse arbitrati, a Tingo tam Retingo et Pertingo, quam Exstinguo et Distinguo, ducunt; neque injuria, siquidem verbi Stinguo eadem est significatio, quae verbi Exstinguo, illudque, quod raro legitur, fortasse ex vitiosa pronuntiatione ortum.

f) Nomen proprium *Thitidas* ignotum; *Titiades* autem antiquo marmori (Grut. 1135. 5) insculptum est.

g) Quamvis *Tumaculum* vera notae lectio sit; *Tomaculum* tamen intelligitur.

h) Lege *Tonstrinum* (Petron. 64. et 46). Evidens enim notae terminatio *um* est.

i) Revera *Torquitum* notatum esse videtur eo consilio, ut princeps verbi forma servaretur (§. 305). Idem animadvertimus in Pandectis Florentinis, quae Rumperit, Rumptum, Decederit, habent pro Ruperit, Ruptum, Decesserit (Brisson. Op. min. 395. add. Duker. de Latin. vet. juriscons. p. 367).

k) Procul dubio corrupta est apud Gruterum interpretatio trium notarum, sese excipientium, *Tasmum*, *Mololitum*, *Ololitum*: quorum in locum equidem substitui *Tostum*, *Molitum*, *Olitum*; meliorem tamen explicationem, si quis dederit, haud rejecturus. Quandoquidem pro *Tostum* legendum esse *Thasium*, jam persuasum habeo, quoniam *Parium* praecedit. Thasus enim et Paros insula utraque marmoris genere celeberrima.

l) Licet enim *Tranaticum*, quae Carpentieri lectio est, ex vectigalium quoque genere fuerit; dilucida tamen hujus notae a nota *Trabes* est deductio. Pleniori terminatione praeditam videsis apud eundem (p. 60. v. 1).

m) *Trichaptum* quidem adscripsi; sed melior succurrit lectio *Trechedipnum* (Voss. vit. serm. 1. 29), cui etiam favet verborum series.

n) Evidentes sunt hujus notae partes *Tragum* et *Pisum*: quapropter *Tragum pisinum* lego. *Tragum piscatorium* legerem, si altera notae pars a *Piscis* deduci posset. Tragi enim nomine instrumentum piscatorium medio aevo denotabant (Cang.)

o) Neque ego hoc nomen intelligo, neque Pseudo-Isidorus id intellexit (§. 381). Fortasse *Themis* legendum est. Proxime enim ad notae formam accedit illa, qua *Themistocles* notatur. Atque obscura litera, quae literis T et M sese secantibus significatur, H etiam (§. 114) explicari potest. Haud tamen inficior, secundum casum nominis *Themistoclis* vix aliter notari posse.

p) *Mappa* et *Culcita* praecedunt: quare ne conjectura quidem vocabuli sensum assequi possum.

q) Sine adspiratione Isidorus (Gothofr. 1287) etiam et Pandectae Florentinae hoc nomen efferunt (Brisson. op. min. p. 396. §. 43).

r) Gruterus *Trix* habet, quod, nisi Τρὺξ sit, non intelligo.

s) *Tumpanum* notatum est, quam quidem scribendi rationem in Pandectis Florentinis etiam reperias (Brisson. Op. min. 393. §. 13).

t) Perperam apud Gruterum legitur *Ticius*, cui interpretationi adversatur P litera, quae evidens notae pars est. Neque verum viderat, qui, in libro Cass. eandem lectionem corrigens, superscripsit *Tipus*. Emendationem meam confirmat sequens nomen Sisyphus.

u) Adjectivum esse videtur, ut intelligatur vestis sive palla (Tibull. 1. 7. 47. et 4. 2. 11). *Tyrianthinum* proxime sequitur.

x) Puncti locus hancce Gruterianae lectionis emendationem poscere videtur (§. 275. f.)

y) Falsam esse Gruterianam interpretationem, vel prima notae litera docet. Quae quum Z sit; ex rationibus supra (vid. p. 568. u) redditis *Zothecium* lego, ut idem sit quod *Zotheca*. Perinde etiam habes et Μυροθήκη, et Μυροθήκιον.

z) Marginalis nota esse videtur, fortasse ad Curtium (4. 4. 19) adscripta.

a) Pro Gruteriano *Vacuaneum* reposui inusitatum quidem nomen, quod tamen defenditur composito *Supervacaneum*.

b) *Vacuarium* et Gruterus habet, et liber Cassel. Fortasse urbis nomen est, quam Ptolemaeus *Vacorium* appellat, quaeque *Vocarium* in tabula Peutingeriana scribitur.

c) Pluralis numerus esse videtur nominis *Vas*. Licet enim, quod apud Gruterum sequitur, *Vaticinium* suadeat legere *Vates*; a libro tamen Cass. abest nomen *Vaticinium* post insertum, proximeque sequitur *Vadatur*.

d) Inter arma in Collectione ponitur. Sequitur *Varezonium*. *Pharetra*, *Pharetrazonium*

(p. 589) quum absint a libro Casselano; haec nomina illis notis ibi significari suspicatus sum. Repugnat tamen litera V, a qua notae incipiunt: quare vide, utrum *Veruta* (Gell. 10. 25) sit legendum, an *Falarica* (Liv. 21. 8. et 34. 14) sive *Phalarica* (Virg. Aen. 9. 705): variat enim scribendi ratio.

e) Vera haec notae lectio est. Namque a nota *Vas*, addita litera T cum terminatione *is*, fit *Vasatis*, cujus populi nomen Ausonius (Parental. 24. 8) habet. Eorum civitas hodie *Bazas* dicitur, et vix dubito, quin Plinii *Basabocates* iidem Vasates sint.

f) *Vassenus*, quod inter nomina propria apud Gruterum legitur, quum nusquam reperirem, magis notum *Vassidius* (Grut. 1135. 7) in ejus locum substitui.

g) Canis sagax (Cang. verbo *Canis*). Idem videtur esse, qui Martiali (14. 300) *Vertagus* est.

h) Lectionis emendatio omnino probatur serie verborum, quae apud Gruterum ita sese excipiunt: *Venum*, Venator, *Venundo*, *Venundat*, *Venundedit*. Quid, enim quaeso, *Venator* hoc loco.

i) Hoc modo apud Gruterum effertur perfectum tempus verbi Venio. Nota vero, in qua terminationis locus idem tempus satis arguit, rectius (§. 291. 325. f.) *Venit* habet.

k) Hujus notae prima litera quum simillima esset literae E, interpretatio vero efflagitaret V; incertus et dubius utroque quidem loco (p. 124. et 139) notam posui. Quoniam autem absurda est enuntiatio: Evenit in mentem; re diligentius perpensa ex comparatione demum earum notarum, cum quibus haec est composita, intellexi (vid. Praef. p. VIII), priori loco eam omnino esse delendam.

l) Nota secundum nominis casum *Vercingetorigis* (Caes. bell. G. 7. 12) habere videtur.

m) Lege Verginius. Nomina propria *Vergilius* et *Verginius*, quod idem ac *Virginius*, a verbo *Vergit* descendere videntur.

n) Mira est notae litera G, nisi C, quod in aliis etiam notis suspicatus sum, ea quoque figura notetur. Sed interpres apud Gruterum *Verruga* legit.

o) Nescio quo casu falsa omnino notae figura ad nomen *Vectura* apud Gruterum adpicta sit, qua et ego (§. 175) in errorem sum inductus, quum praeter verbum *Vehit* ejusque composita nomen quoque *Vehiculum* praecederet. Jam vero persuasum habeo, illa nota, non obstante loco, quem in Collectione obtinet, *Versura* significari, ejusque radicem esse notam verbi *Vertit*. Accedit, quod eodem Collectionis loco liber Cassel. veram nominis *Vectura* notam suppeditat.

p) In locum ignoti hujus vocabuli substitui quidem *Versor*; sed, deficiente terminatione, notae lectio numquam certa erit.

q) *Verbex* non solum adscriptum, sed etiam notatum est. Immo vero apud Petronium (57) *Berbex* legitur: quam quidem scribendi rationem, aeque atque illam, quam nota prodit, antiquam et in optimis libris atque in inscriptionibus passim usurpatam fuisse, clarissimi viri ad illum Petronii locum docent. Adde Vossium, qui (Etymol.) a *Φέρβω*, ait, fit *Φέρβεξ*

r) Et series verborum, et notae literae docent, non a Veru, quae Vossii opinio est, sed a Vervex, quia arietat, Collectionis auctores illud nomen duxisse, ideoque *Verbina* notasse.

s) Inter media vocabula *Intestina*, *Interanea*, *Ilium*, cet. ponitur *Vexa*, pro quo equidem lego *Vesicula*. *Vesica* enim aliam occupat notam.

t) Licet in Lexicis hoc nomen frustra quaeras, non male tamen eo significari possit is, qui vestes plicat, aliis *Vestiplicus* dictus.

u) Quia *Rotomagus* praecedit, haud dubie *Vellocasses* (Plin. 4. 18. Hirt. B. Gall. 8. 7), sive *Velocasses* (Caes. B. G. 2. 4), Galliae populi intelliguntur.

x) Curator viarum (Varro de L. L. 4. 1), cui Varronis interpretationi Schellerus (Lex.) adscribit: Si lectio certa. Immo vero certam esse, haec nota docet, lucemque simul, quum in Collectione proxime sequatur *Cestifer* (Cistifer), affert glossis Isidori, in quibus legitur: Violurus *et statim Cestifer.* Quae quidem verba ut mutarent et expli_ carent, operam luserunt critici, haud animadvertentes, non nisi ad notarum Collectionem respicere haec verba (§. 381).

y) In glossis Isidori etiam hoc nomine appellatur, qui Caesari (B. G. 1. 16. et 7. 33) est *Vergobretus.*

z) Populi nomen, quod *Veromanduus* Caesari et Plinio est, *Veromandus* autem in Itinerario Antonini scribitur.

a) Similia nomina sunt Tonstrinum, Pistrinum, Ustrinum.

b) Quum ex litera U surgat X, equidem *Voxare* notatum esse pro *Vocare*, superius (§. 304) dixi. Videant alii, num antiquitatis vestigium in nota lateat, ut ab *Axare* (Fest. ap. Paul.) sit, idque a futuro verbi βάζω

c) *Virdorix* apud Gruterum legitur inter nomina propria. Quod quum prorsum ignotum mihi esset nomen; in ejus locum substitui *Voltrex*, in inscriptionibus (Gruter. 780. 2. 842. 2) saepius obvium.

d) Nihil mutavi, quamvis deficiente terminatione liceat *Volucre* legere. *Volucrum* autem re vera notatum esse, ex sequenti *Involucrum* patet. Unde illud a *Volvo* derivari conjicio. Eodem vocabulo Gregorius Turonensis (3. 15) utitur, involucrum intelligens, quo vestes aliaeque res involvuntur.

e) Osismiorum civitas, sic dicta in tabula Peutingeriana. Ptolemaeo appellatur *Vorganium*.

f) Quum haec nota corrupta esse videatur; duas ejus formas inserui, quarum primam veriorem esse credo.

g) Nomen ignotum, pro quo legendum vel Zenofilus (Grut. 1111. 8), vel Zoilus.

h) Hoc nomen quum mihi ignotum sit, dubium habeo, utrum *Sosippus* intelligendus, qui victor fuit anno primo olympiadis XCVIII; an legendum *Zoippus* (Liv. 24. 4. 26. et Polyb. Legat. 1); an potius *Zeuxippus*, nomen pluribus viris commune (Liv. 33. 27. seq. Polyb. 38. Pausan.
